About AutoLog 6.3

AutoLog 6.3™ works hand-in-hand with the JAVS® Digital Recorder™ to create an Audio/Video (A/V) record of the court with a complete log of events for each case tried in the courtroom.

The AutoLog software enables one or more users on different PCs to create a log of events for each and every courtroom case. Log events are digitally time stamped and link directly to an A/V file created and stored on the Digital Recorder. All of these events are stored in an ODBC-compliant database for ease of use and distribution.

A control panel allows you to monitor and manage your room's A/V settings, permitting you to easily switch system modes (e.g., bench conference, exclude witness, etc.), and view your microphone levels. Public and private buttons are also included to let you quickly switch between public and private testimony. All private testimony is automatically withheld from the public record; moreover, system modes can be configured to automatically switch from public to private testimony.

The CaseScheduler™ button allows the user to conveniently open the application for when, or if, a case needs to be re-scheduled.

Last, but not least, a video window displays the video as it is recorded by multiple cameras and microphones and relayed via A/V files to the Digital Recorder.

This manual assumes that CaseScheduler has been installed on the system and that the user has all *User Rights* (see your administrator for details on your particular user rights).

AutoLog 6.3 features:

- An easy-to-use interface
- Digital time stamping of every log event in the courtroom
- A log of events linked directly to the A/V record for every case
- An ODBC-compliant database (SQL 2005)
- Customizable hotkeys and proceedings menus
- Editable Exhibit and Witness lists
- Private recordings and case notes (automatically withheld from public copies of the official record)
- Capacity to switch system modes and monitor microphone levels
- A video window that allows viewing of recorded video as relayed to the Digital Recorder
- Direct communication with CaseScheduler to display the current case schedule
- Entry and logging of multiple plaintiffs, defendants, exhibits, and attorneys for each case
- Courtroom information in the title bar, for operators who are monitoring more than one courtroom
- Right-click Review Event feature to case log events, allowing user to launch **CaseViewer 3** and display associated media corresponding to the event timestamp. This appears to the user as "Review Event"
- Improved USB Record-Light Integration
- Improved Microphone Tally/VU meter displays and integration

- Playback VCR controls (**CT-4a ONLY**)
- Print options in the Witness and Exhibits tabs associated with a case, allows generating reports as desired
- Enhanced window docking capabilities within the main view and tools, making it easier to manage and customize the overall layout in the main display screens
- Modified various report layouts to provide more room for dynamically sized columns
- Camera Locks and System Modes tabs, allowing independent configuration and viewing in a variety of ways within the application
- Help menu links to online application documentation
- Secure Department Filtering
- Enhanced Case Reports
- Improved User and Site management
- More case information provided in the user interface

Getting Started

Before you can use the AutoLog application a user name and password must be assigned to you. AutoLog has been designed with specific user rights in mind, which means that your court administrator can assign various rights that give you the ability to access certain functions of the application. (See the [User Rights](#) section of this manual).

Login

To access AutoLog, a user must first login. See your administrator for User Name and Password, and the user rights assigned to you.

Launch AutoLog, type in your User Name and Password, select a location and press **Login**.

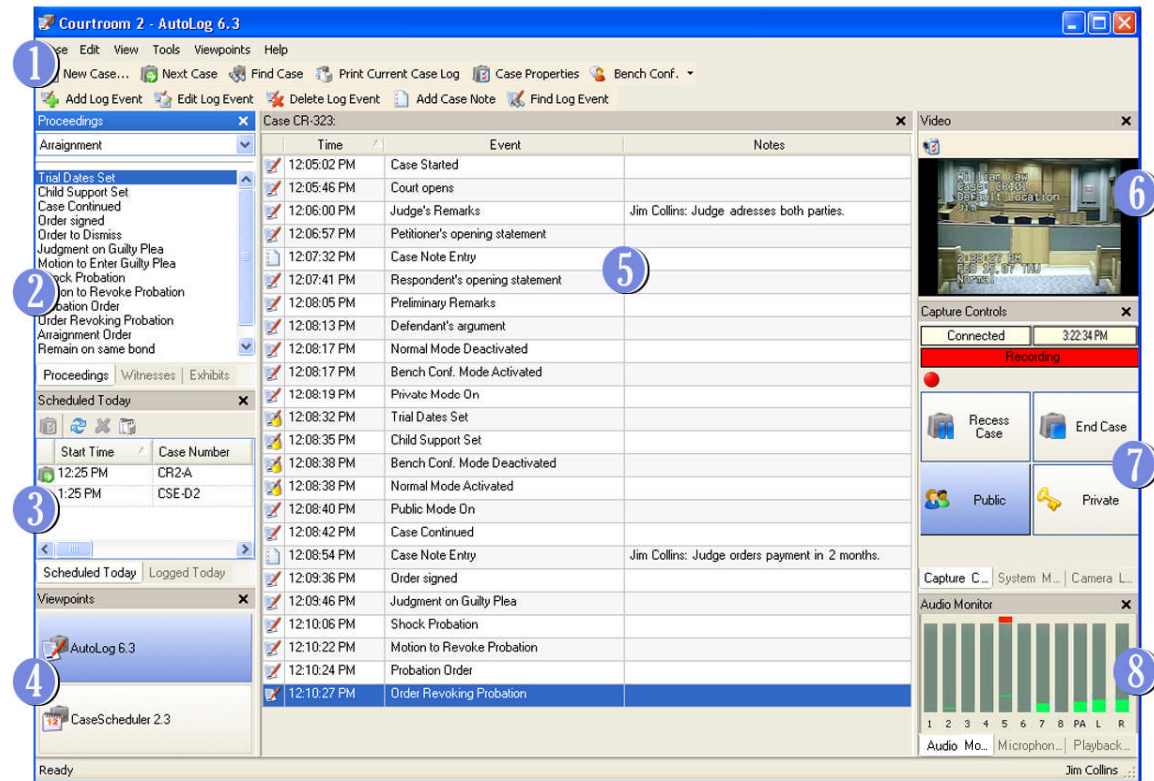

Courtroom 1

A screenshot of the 'Please Login!' dialog box. The dialog has a blue title bar with a lock icon and the text 'Please Login!'. Below the title bar is a graphic of a blue key with an orange handle. To the right of the graphic is the text 'Courtroom Login'. Below this are three input fields: 'User Name:', 'Password:', and 'Courtroom:'. The 'Courtroom:' field is a dropdown menu currently showing 'Default Location'. At the bottom right are two buttons: 'Login' and 'Cancel'.

AutoLog User Interface

AutoLog is laid out in a practical, easy-to-use format. You'll find that the Graphical User Interface—or GUI—is quite simple to navigate.

AutoLog's interface is composed of moveable tiled windows and buttons. Reference the diagram below:

- 1) Menus, Cases and Logging Toolbars
- 2) Proceedings/Witnesses/Exhibits view window
- 3) Cases Logged Today and Scheduled Today (Cases View)
- 4) AutoLog/CaseScheduler buttons
- 5) Case Log window
- 6) Video window
- 7) Capture Controls/System Modes/Camera Locks
- 8) Audio Monitor, Tally Display and Playback controls

Tool Tips

By allowing your pointer to hover over a button, you can activate its tool tip. This is a small text box that pops up with additional information about the function that particular button activates.

1) Menus, Cases and Logging Toolbars:

All menu items and function buttons are located in this area of the interface. In most instances the buttons on the toolbars are also a menu item.

2) Proceedings/Witnesses/Exhibits view window:

This area of the interface has three views accessible through tabs. The Proceedings tab includes all proceedings menus supplied by JAVS or user created. The Witnesses tab includes a list of available witnesses associated with the case and buttons to add, edit or delete any witness. The Exhibits tab includes a list of available exhibits associated with the case and buttons to add, edit or delete any exhibit. Each tab includes a print list button.

3) Logged Today and Scheduled Today (Cases View):

This area of the interface has two views. The Scheduled Today view shows all the cases that have been scheduled for the current day. The Logged Today view shows all the cases that have been logged for the current day with an array of printing, publishing and viewing options available for any case in the view. Case Properties are available for any case in the list and the list can be manually updated using the Refresh button. Cases can also be deleted from the schedule.

If Department Filtering has been enabled in JAVS SiteManager, cases in other departments may not be available to the user. These cases will be grayed out and have the department name listed in the **Case Number** column.

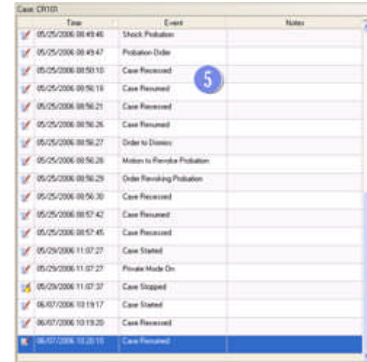

4) AutoLog/CaseScheduler buttons:

These buttons are for launching the JAVS CaseScheduler application when in AutoLog and for launching AutoLog when in CaseScheduler.

5) Case Log window:

This area of the interface is for logging all the events associated with the case. The entries can include proceedings, manual log events and case notes. Notes associated with any proceeding will also be included in this view

Time	Event	Notes
05/05/2006 00:49:46	Shack Probation	
05/05/2006 00:49:47	Probation Order	
05/05/2006 00:50:10	Case Received	
05/05/2006 00:50:18	Case Received	
05/05/2006 00:50:21	Case Received	
05/05/2006 00:50:26	Case Received	
05/05/2006 00:50:27	Order to Detain	
05/05/2006 00:50:28	Motion to Revoke Probation	
05/05/2006 00:50:29	Order Revoke Probation	
05/05/2006 00:50:30	Case Received	
05/05/2006 00:52:42	Case Received	
05/05/2006 00:52:45	Case Received	
05/05/2006 11:07:27	Case Started	
05/05/2006 11:07:27	Private Mode On	
05/05/2006 11:07:37	Case Stopped	
06/07/2006 10:19:17	Case Started	
06/07/2006 10:19:20	Case Received	
06/07/2006 10:20:10	Case Received	

6) Video window:

The video window will display the output of the JAVS automatic switching system. There are also options for viewing the cameras over TCPIP.

7) Capture Controls/System Modes/Camera Locks:

This area of the interface includes all the buttons needed to control the recording of the court proceedings, including manual public and private buttons. This window also shows the status of the recording and the system connection. A real-time clock is provided and is driven by the recording device. The two round icons show how many recorders are connected and the record status of each recorder. There is a System Modes tab which allows the user easy access to the individual system modes and a Camera Locks tab (CT-4 systems only) for easy access to the camera locks.

CT-4

8) Audio Monitor, Tally Display and Playback controls:

The Audio Monitor allows the user to monitor all the microphone inputs as well as tallies from the JAVS automatic mixer. The Microphone Tally panel allows monitoring of tallies only.

The Playback Control panel allows for control of the playback VCR as well as instant review functions. (CT-4 systems only)

CT-4

Scheduling a Case

Although the primary role of AutoLog is for logging and managing case information, it also has the ability to schedule cases for the current day. While this is useful, scheduling cases for other days, and/or months, is best suited for JAVS CaseScheduler.

CaseScheduler's Role

The basic package of AutoLog and CaseScheduler coordinates a courtroom's schedule based on the day, month, or work week. With the CaseServer™ upgrade, information can be shared among *multiple* courtrooms. No matter the package, this live network-based system allows you to schedule—on *any* date—case files and define their properties.

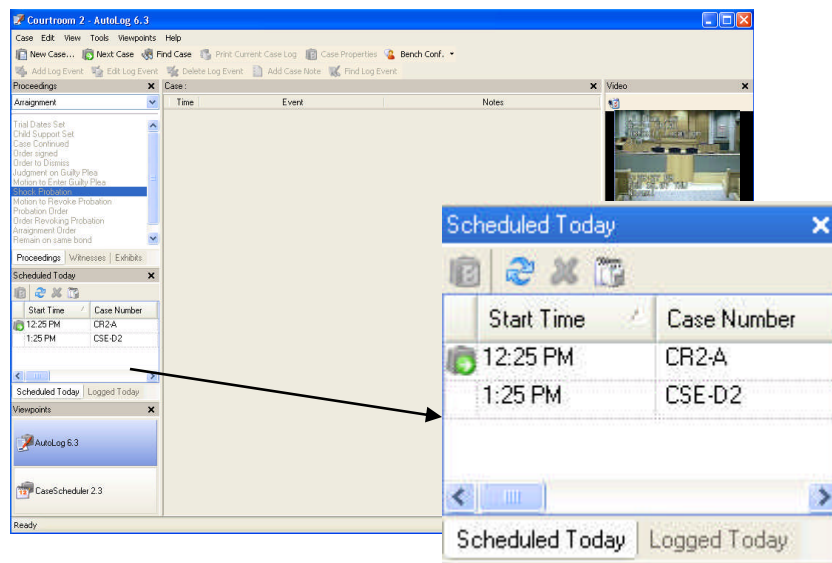

In this method, the basic groundwork for a case file (i.e., information attributed in the case's properties) can be laid out in advance in CaseScheduler; thus, the essential information is in place when you access the case through your AutoLog session. Once the properties have been set in CaseScheduler, you're ready to begin creating your courtroom's case log, no matter where you're logged in. For more information on how to schedule a case using CaseScheduler, see the JAVS CaseScheduler user manual.

Cases Scheduled Today

AutoLog is designed to work concurrently with CaseScheduler. When AutoLog opens, it displays the Case Schedules as entered with CaseScheduler in the Scheduled Today box. For each given day that AutoLog is opened, a new list will appear in the Scheduled Today list containing all the cases that were scheduled for that day by CaseScheduler.

Logging a Case

The main function of AutoLog is to create case logs of the day's proceedings, to manage case information, and to control the recorded media related to each case. Before logging can begin, the user must first either create a new case or have a case in the docket (Scheduled Today list) available for logging.

Find Case

(Alphabetical-Most Recent)

The Find Case function allows a user to locate cases that have already been logged. Utilizing a contextual string search, Find Case can locate a previously logged case by the user typing in the case number or part of the case number. As with all search functions, the more information entered in the search criteria field the more likely chance of an accurate find.

If **Department Filtering** has been enabled in JAVS SiteManager, users other than administrators will only be able to find cases assigned to their department or cases that have no department assignment.

The Find Case window gives the user options to: Start a case, edit the case log, edit case properties, add the case to today's schedule, view a case and publish a case. All of these options will be discussed later in this manual. ([Find Case Utility](#))

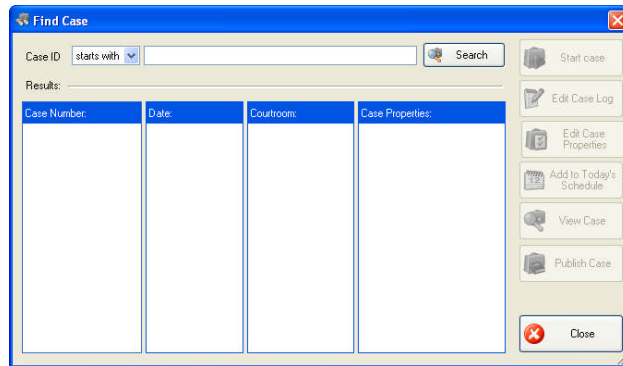

To find a case:

1. Press the **Find Case** button or select the menu item **Case>Find Case**.

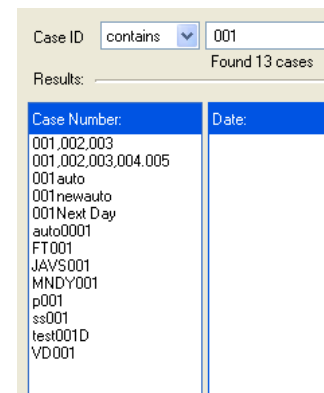

2. The **Find Case** window will open.

3. Press the **Search** button and all the cases in the database will appear in the results list.

4. Type in a partial case number and select the **"starts with"** variable. Press the **Search** button and only a case that starts with that case number will be found.
5. Select the **"contains"** variable and upon pressing the search button, any case that contains the entered text in the search field will be found.
6. Type in a specific case number and select the **"starts with"** variable. Press the Search button and the specific case is found.

7. As a Case Number is selected, the data will drilldown through the Date, Courtroom, and finally Case Properties columns.
8. Select the desired Case Number and the date(s) of the case are displayed in the **Date** field.

Find Case

Case ID: starts with ▼ 06cr40  Search

Found 1 cases

Results:

Case Number:	Date:	Courtroom:	Case Properties:
06CR40	12/11/2006		

9. Select the appropriate Date and the applicable courtrooms are displayed for that date in the **Courtroom** field.

Find Case

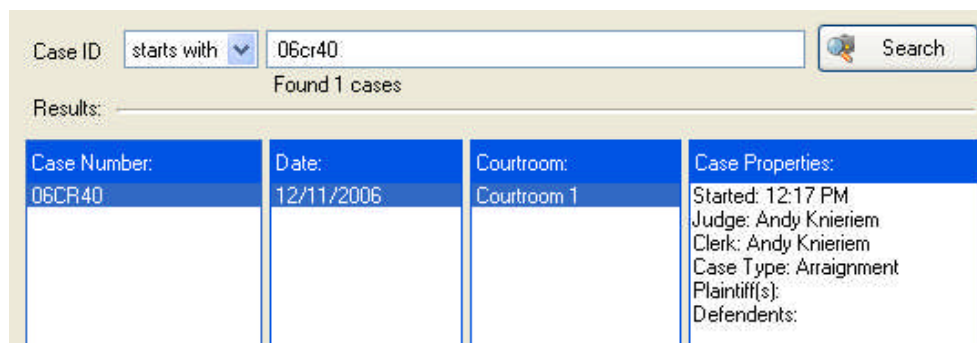

Case ID: starts with ▼ 06cr40  Search

Found 1 cases

Results:

Case Number:	Date:	Courtroom:	Case Properties:
06CR40	12/11/2006	Courtroom 1	

10. Select the appropriate Courtroom and properties for the case are displayed in the **Case Properties** field.

Find Case

Case ID: starts with ▼ 06cr40  Search

Results:

Case Number:	Date:	Courtroom:	Case Properties:
06CR40	12/11/2006	Courtroom 1	Started: 12:17 PM Judge: Andy Knieriem Clerk: Andy Knieriem Case Type: Arraignment Plaintiff(s): Defendants:

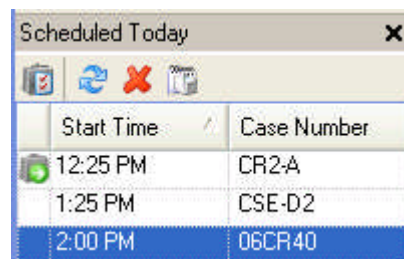

11. From this point all the options in the **Find Case** window are now available.

12. Press the **Add to Today's Schedule** button and a **Select Time** window will open.

13. Set the appropriate time for the case and press the **Add to schedule** button.
14. Close the **Find Case** window.
15. The case will appear in the **Scheduled Today** list.

Scheduled Today		
Start Time	Case Number	
12:25 PM	CR2-A	
1:25 PM	CSE-D2	
2:00 PM	06CR40	

Select a Case

This method allows the user to select a case from the **Scheduled Today** list that was pre-scheduled by CaseScheduler or added to the schedule by the AutoLog [Find Case](#) function.

To select a case on the day's docket:

1. In the [Cases View](#) select the **Scheduled Today** tab. Double-click the case you need to access; the **Start Case** dialog box opens.

The 'Scheduled Today' window shows a list of cases for the current day. The 'Start Case' dialog box is open, displaying the selected case information.

Start Time	Case Number
12:25 PM	CR2-A
1:25 PM	CSE-D2
2:00 PM	06CR40

The 'Start Case' dialog box contains the following fields:

- Case Number: 06CR40
- Case Type: Civil Bench Trial
- Case Title: State vs Smith
- Department: Default Department
- Plaintiff: (empty field)
- Prosecution: (empty field)
- Defendant: (empty field)
- Defense: (empty field)
- Judge/Justice: Harry Nowles
- Bailiff/Sheriff: Robert Bailey
- Clerk/Steno: Calvin Perck

Buttons at the bottom: Start Case, Prepare to Start Case, Add to Schedule, Cancel.

2. Make sure the case information is correct (i.e., case number, case type, case title, department, court personnel, etc.).
3. Change the Judge/Justice, Bailiff/Sheriff, or Clerk/Stenographer, by using the drop-down menu to select the appropriate personnel.

The 'Start Case' dialog box is shown with the Judge/Justice dropdown menu open, displaying a list of names: Harry Nowles, Adrian Collins, George Wapner, and Default Judge. The Bailiff/Sheriff dropdown menu is also open, showing Robert Bailey and Defaults.

Buttons at the bottom: Start Case, Prepare to Start Case, Add to Schedule, Cancel.

4. If the user has set their personal preferences, ([Edit>User Preferences](#)) pressing the **Defaults** button will populate the appropriate fields.
5. Press the **Prepare to Start Case** button if you want to queue the data without initiating recording, or press the **Start Case** button to begin recording. You can also add the case to today's docket by pressing the **Add to Schedule** button.

The buttons at the bottom of the dialog box are: Start Case, Prepare to Start Case, Add to Schedule, and Cancel.

Preparing a Case

The Prepare to Start Case function allows the user to assign a case's startup properties in a queue (see [Case Properties](#)). It primes the A/V system and prepares the data to initiate that particular case without going into Record mode. For example, a clerk is able to assign properties to a case, such as previously unknown court personnel (attorneys, bailiff, etc.), as they arrive and have this data in the queue prior to the judge's arrival in the courtroom.

New Case

AutoLog can schedule a case for the current day only and will reflect as a schedule in CaseScheduler for that day if the **Add to Schedule** function is used. If having the case documented as a schedule for that day is not important, the user can choose to start the case immediately.

To create a new case:

1. Press the **New Case** button or select the menu item **Case>New Case**. The **Start Case** window will open.

A screenshot of the "Start Case" dialog box. It has a blue title bar with the text "Start Case" and a close button. The dialog contains several input fields and dropdown menus. "Case Number" is set to "2008-03-07 22:17". "CaseType" is a dropdown menu. "Case Title" is an empty text field. "Department" is a dropdown menu set to "Default Department". "Plaintiff:", "Prosecution:", "Defendant:", and "Defense:" are text fields, each with an "Edit" button to its right. "Judge/Justice:" is a dropdown menu set to "Default Judge". "Bailiff/Sheriff:" is a dropdown menu set to "Default Bailiff", with a "Defaults" button to its right. "Clerk/Steno:" is a dropdown menu set to "Default Clerk". At the bottom, there are four buttons: "Start Case" (with a play icon), "Prepare to Start Case" (with a document icon), "Add to Schedule" (with a calendar icon), and "Cancel" (with a red X icon).

- To start a case, AutoLog requires a **Case Number**. You can enter your own case number or use the number auto-generated by AutoLog. The number consists of the year, month, day and time of day. Each time a new case is started, AutoLog will generate a unique number based on these parameters. If more than one case is created within 1 minute, AutoLog will add a "-1,-2," to the end of the number to keep it unique.

Case Number: 2008-03-07 22.17

- Use the **Case Type** pull-down to select the type of case you will be logging.

(The user can create their own case types; these are default case types created for the user's convenience. For more information refer to the [Edit Site](#) section of this manual).

- Type in the name of the case in the **Case Title** field.

Case Title: State vs Smith

- Use the **Department** pull-down to choose the department the case will be held in.

(The user can create their own Departments; For more information refer to the [Edit Site](#) section of this manual).

6. Court personnel can be selected by using the court personnel pull-downs. Select the appropriate staff for the current case. If the user has set their personal preferences, ([Edit>User Preferences](#)) pressing the **Defaults** button will populate the appropriate fields.

Adding Attorneys and Contacts

The database for JAVS AutoLog contains attorney and contact information available to use for each new case. If supplied, this information is entered into the database upon initial installation of the AutoLog system. If this information is not supplied, AutoLog gives the user the ability to add new users and contacts.

To add a prosecuting or defense attorney:

1. In the Start Case window there are four fields relevant to attorneys and contacts. Press the **Edit** button to the right of the field labeled **Prosecution**.

2. The **Edit Prosecution Attorneys** window will open.

In the lower portion of the window is a database search function for locating prosecuting attorneys that already exist in the database.

3. If information for the available attorneys has previously been entered into the database, press the **Search** button and a list of all attorneys will appear.

Found 10 entries

FirstName	LastName	Address	City
Sam	Baker	222 Two Street	
Marley	Cooper	9944 English Court	Yorkshire
Denny	Crane	345 Benton Tower	Boston
John	Noe	94 Peyton Place	Dayton
Shirley	Schmitt	4567 Lawless Lane	Boston
Allen	Shore	22 Legal Lane	Boston
Keith	Steinmetz	4128 Sweet Pea Lane	Louisville
Bill	Thompson	22 Bryson Street	Indianapolis
Jay	Walker	998 Some St	Louisville
Allen	Wills	3756 doppler st	Louisville

You can limit the search results by typing in a name or part of a name before pressing **Search**.

The Search function will search both first and last name fields.

Search All Attorneys:

Edit Attorneys Info

Remove from case

Creating a New Attorney

An attorney for a case may be new to the courthouse and probably will not be in the database. By adding this information, that attorney will be made available for future database searches.

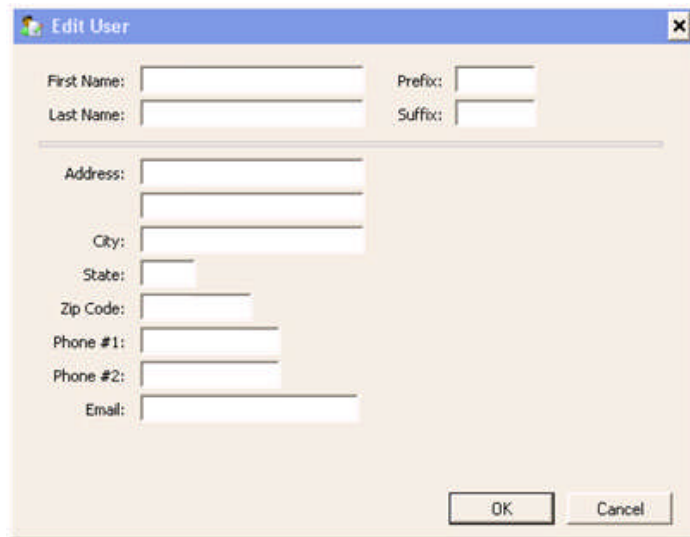

To add a new attorney:

1. Press the **Create new** button in the upper portion of the **Edit Prosecution Attorneys** window and the **Edit User** window will open.

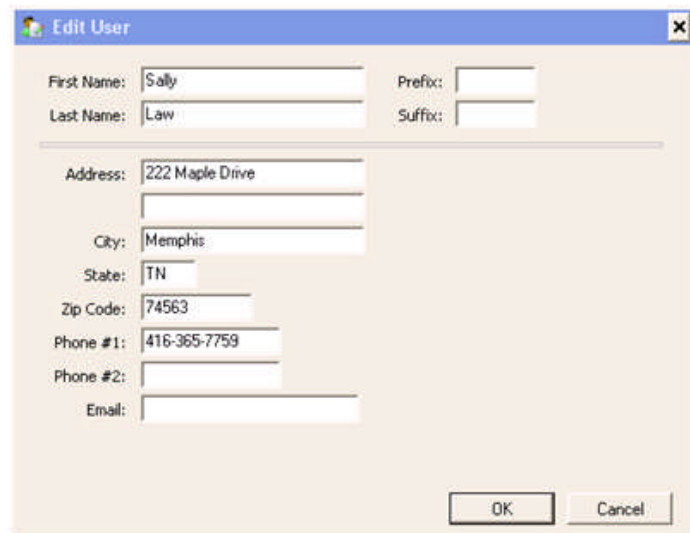

Each user will be assigned a unique **ID** (first initial followed by last name) and *can become* an AutoLog user with individual operating rights.

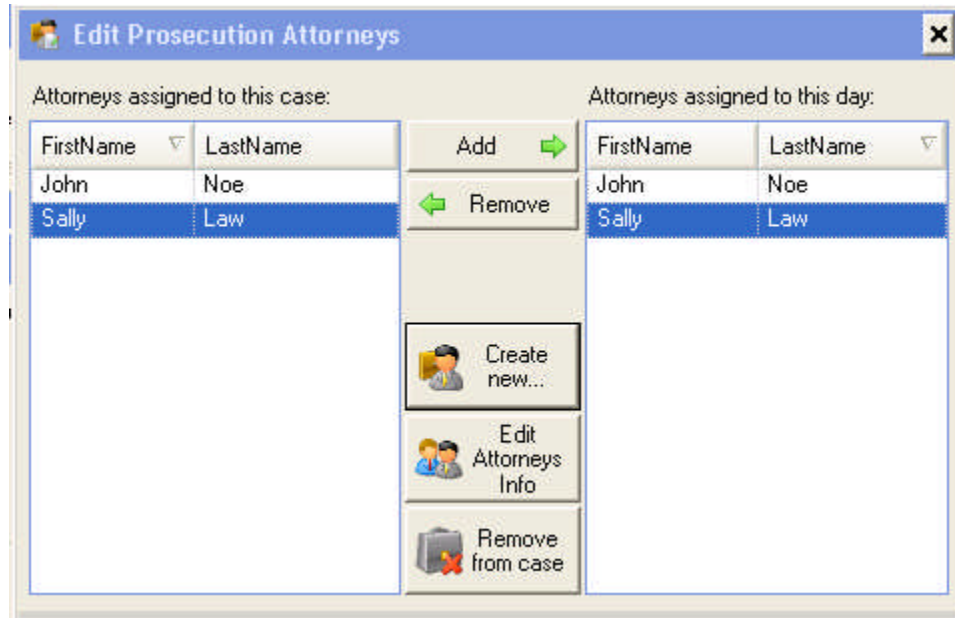

(See [Edit Users](#))

A dialog box titled "Edit User" with a close button (X) in the top right corner. It contains several text input fields: "First Name:", "Last Name:", "Prefix:", "Suffix:", "Address:" (with a multi-line field), "City:", "State:", "Zip Code:", "Phone #1:", "Phone #2:", and "Email:". At the bottom right are "OK" and "Cancel" buttons.

2. Fill in all relevant information and press the **OK** button.

The same "Edit User" dialog box as above, but with sample data entered: "First Name:" is "Sally", "Last Name:" is "Law", "Address:" is "222 Maple Drive", "City:" is "Memphis", "State:" is "TN", "Zip Code:" is "74563", and "Phone #1:" is "416-365-7759". The "OK" and "Cancel" buttons are at the bottom right.

- The newly created attorney will appear in the **Attorneys assigned to this case** and the **Attorneys assigned to this day** lists.

- After making the attorney selection(s), press the **OK** button and the attorney(s) will appear in the **Prosecution** field in the **Start Case** window.

Plaintiff:	<input type="text"/>	<input type="button" value="Edit"/>
Prosecution:	John Noe; Sally Law	<input type="button" value="Edit"/>
Defendant:	<input type="text"/>	<input type="button" value="Edit"/>
Defense:	<input type="text"/>	<input type="button" value="Edit"/>

- Follow the same procedures for adding **Defense** attorneys as for Prosecuting attorneys.

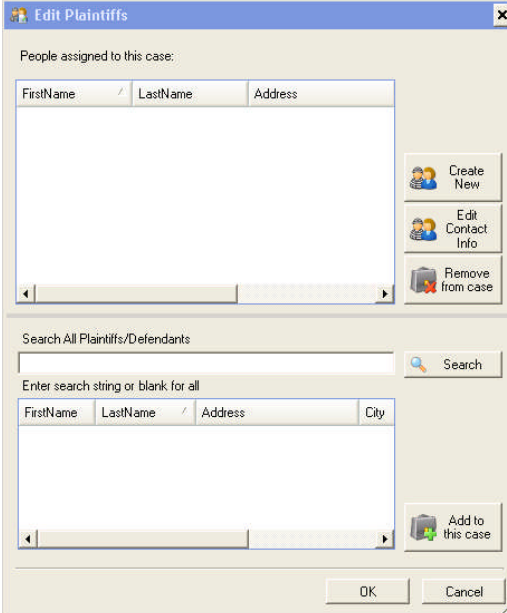

Adding a Contact

A contact is considered, in this case, to be a defendant or plaintiff. (Witnesses are also contacts and will be addressed later in this manual).

To add a plaintiff or defendant:

1. Press the **Edit** button to the right of the **Plaintiff** field and the **Edit Plaintiffs** window will open.

Plaintiff:

Edit Plaintiffs

People assigned to this case:

FirstName	LastName	Address

Search All Plaintiffs/Defendants

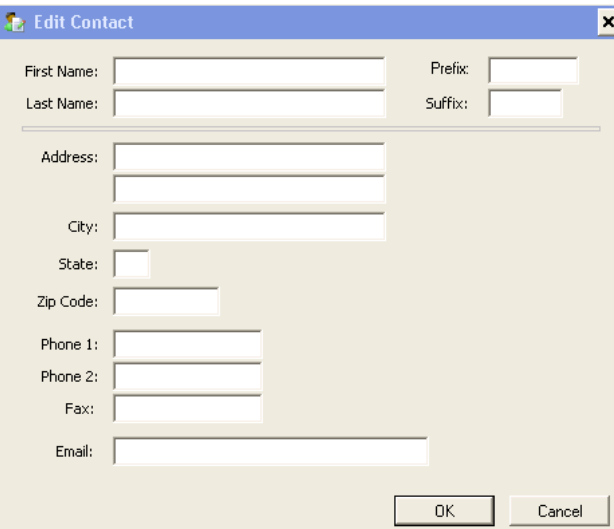

Enter search string or blank for all

FirstName	LastName	Address	City

2. For Plaintiffs that already exist in the database, type in their name or part of their name and press the **Search** button to find the particular contact.

3. Press the **Add to this Case** button to add them to the case.

4. For new Plaintiffs, press the **Create New** button and the **Edit Contact** window will open.

Edit Contact

First Name: Prefix:

Last Name: Suffix:

Address:

City:

State:

Zip Code:

Phone 1:

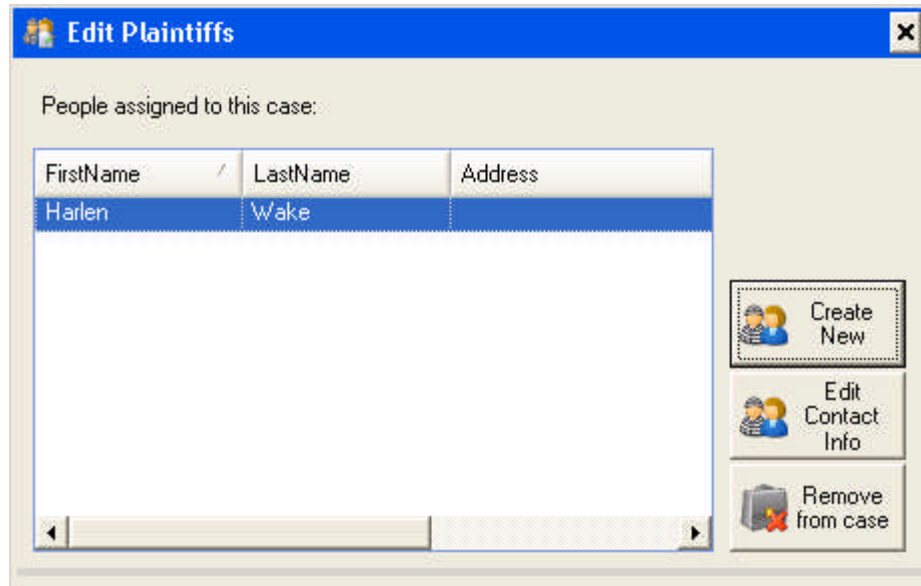

Phone 2:

Fax:

Email:

5. Fill in the relevant information and press the **OK** button.

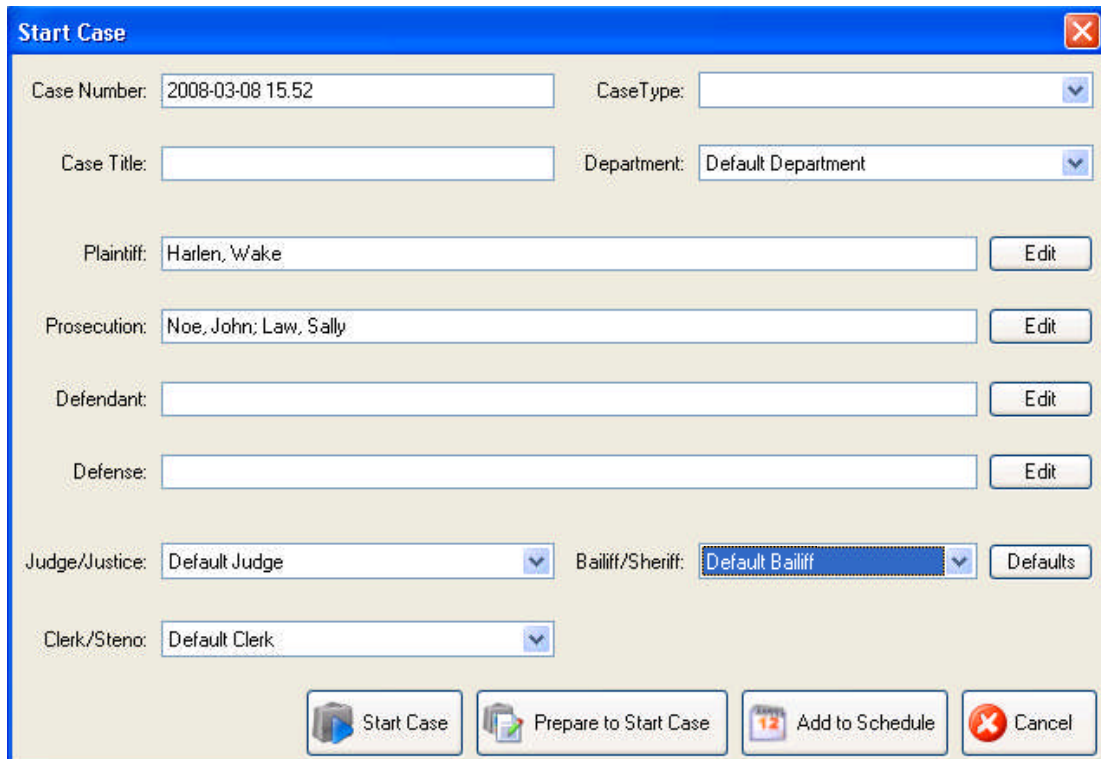

- The newly created contact will appear in the **People assigned to this case** list and will be available for searching in the database.

The **Edit Plaintiffs** window displays a list of people assigned to the current case. The list has three columns: **FirstName**, **LastName**, and **Address**. The first entry is **Harlen** and **Wake**. To the right of the list are three buttons: **Create New**, **Edit Contact Info**, and **Remove from case**.

FirstName	LastName	Address
Harlen	Wake	

- Press the **OK** button in the **Edit Plaintiffs** window and the new contact will appear in the **Plaintiffs** field in the **Start Case** window.

The **Start Case** window contains the following fields and controls:

- Case Number:** 2008-03-08 15.52
- Case Type:** (dropdown menu)
- Case Title:** (text field)
- Department:** Default Department (dropdown menu)
- Plaintiff:** Harlen, Wake (text field) with an **Edit** button
- Prosecution:** Noe, John; Law, Sally (text field) with an **Edit** button
- Defendant:** (text field) with an **Edit** button
- Defense:** (text field) with an **Edit** button
- Judge/Justice:** Default Judge (dropdown menu)
- Bailiff/Sheriff:** Default Bailiff (dropdown menu) with a **Defaults** button
- Clerk/Steno:** Default Clerk (dropdown menu)

At the bottom are four buttons: **Start Case**, **Prepare to Start Case**, **Add to Schedule**, and **Cancel**.

8. Follow the same procedures for adding **Defendants** as for Plaintiffs.
9. After completing all information, press the **Start Case** button, the **Prepare to Start Case** button or the **Add to Schedule** button.

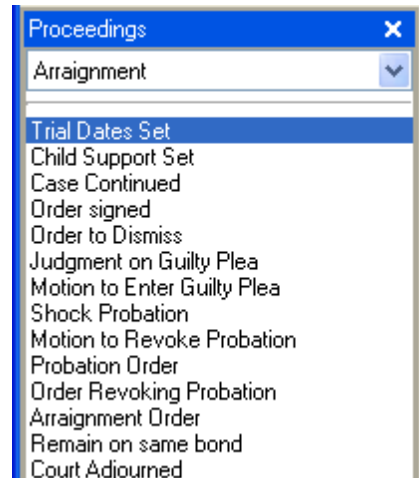

Recording and Log Entries

Once a case is started, the next step is to initiate log entries. AutoLog provides a default set of proceedings menus to use for entering into the case log. These menus can be added to, or changed, to suit the user's needs.

Each set of menus provides the user with commonly used proceedings and any menu can be used at anytime during a court session.

To enter proceedings into the Case log:

1. Start a case by pressing the **Start Case** button.

2. The system will go into record as indicated by the **Record Message Bar** and the **Record Indicator**.

Record Message Bar
Record Indicator

Optional USB External Record Light

If installed, the USB **External Record Light** will also be illuminated when the system goes into record. The External Record Light will stay on consistently when in the **Public** mode and will flash if the system is placed into the **Private** mode.

- Once the system goes into record, a log entry will be made indicating that the case has started and the proceedings menu will become active and ready for use.

Case: 2006-12-12 12.43			
Time	Event	Notes	
12:45:34	Case Started		

Proceedings ×
 Arraignment
 Trial Dates Set
 Child Support Set
 Case Continued
 Order signed
 Order to Dismiss

 Proceedings Witnesses Exhibits

Witnesses and Exhibits

Once a case is started, witnesses and exhibits can be introduced throughout the course of the session. While entering witnesses and exhibits can be done prior to the case starting, it is more likely that you will be adding them as they appear.

To add a witness to the case:

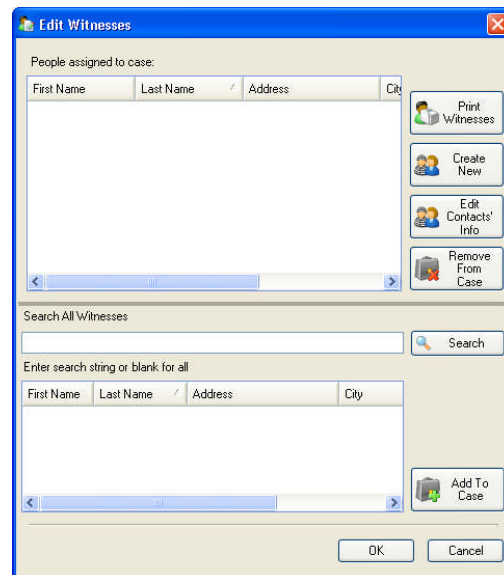

1. Select the **Witnesses** tab in the **Proceedings/Witnesses/Exhibits** view window.

2. There are 4 icons in the upper left portion of the window for adding, editing, deleting and printing a witness.

3. Press the **Add Witness** icon and the **Edit Witnesses** window will open. Or select the menu item **Edit>Add Witness**.

4. Type the witness's name or part of the name in the **Search All Witnesses** field and press the **Search** button. If the witness exists in the database they will appear in the search list.

Search All Witnesses

Jane Doe  Search

Found 1 entries

FirstName	LastName	Address	City
Jane	Doe	3456 Willow Way	Louisv

 Add to this case

5. Press the **Add to this case** button and the witness will appear in the **People assigned to this case** list.

 Edit Witnesses 

People assigned to case:

2. Change the information as needed and press the **OK** button.

To delete a witness:

1. Select the witness to be deleted and press the **Delete Witness** button.
2. A **Delete Witness** confirmation screen will open. Select **Yes** and the witness will be removed from the case.

Delete Witness?

Are you sure you wish to delete the witness Susan Williams?

Yes No

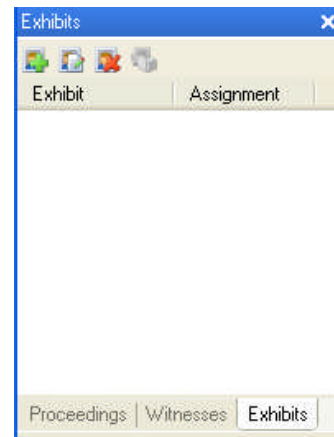

To print a witness list:

1. Press the **Print Witness List** icon in the **Witness** view and a hard copy will be sent to a connected printer.

To add an exhibit to the case:

1. Select the **Exhibits** tab in the **Proceedings/Witnesses/Exhibits** view window.
2. There are 4 icons in the upper left portion of the window for adding, editing, deleting and printing an exhibit.

3. Press the **Add Exhibit** button and the **Edit Exhibit** window will open. Or select the menu item **Edit>Add Witness**.

4. The Exhibit name is automatically entered and numbered based on the party assignment button selected. Select a party assignment and give the exhibit a description. Press the **OK** button.

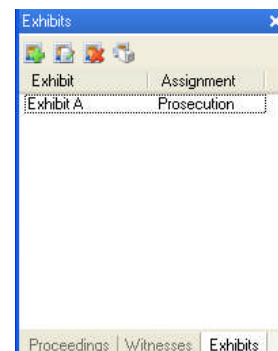

NOTE: You can type in an exhibit name if you do not wish to use the automatic naming convention.

5. If the system is in record, you can use the **Enter into log** button and the exhibit will be time stamped and placed into the case log.

	10:14:13 AM	Motion
	10:14:18 AM	Exhibit Prosecution Exhibit 1

6. The Exhibit will appear in the **Exhibits** view and is available for logging.

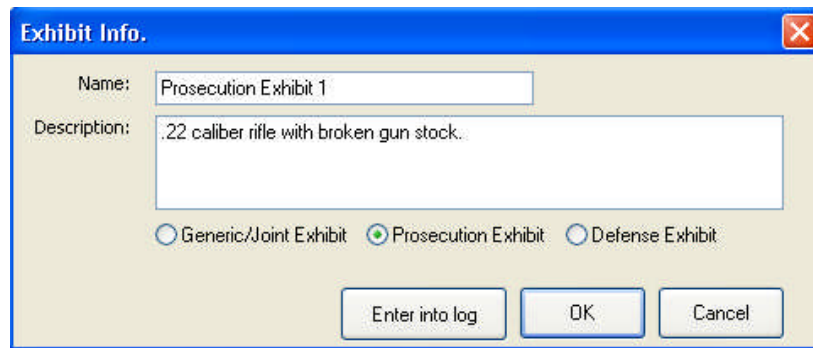

To edit an exhibit:

1. Select the exhibit to edit and press the **Edit Exhibit** button.

2. The **Edit Exhibit** window will open. Change the information as needed and press the **OK** button.

**To delete an exhibit:**

1. Select the exhibit to be deleted and press the **Delete Exhibit** button.
2. A **Delete Exhibit** confirmation window will open. Press **Yes** and the exhibit will be deleted from the case.

**To print an exhibit list:**

1. Press the **Print Exhibit List** icon in the **Exhibit** view and a hard copy will be sent to a connected printer.

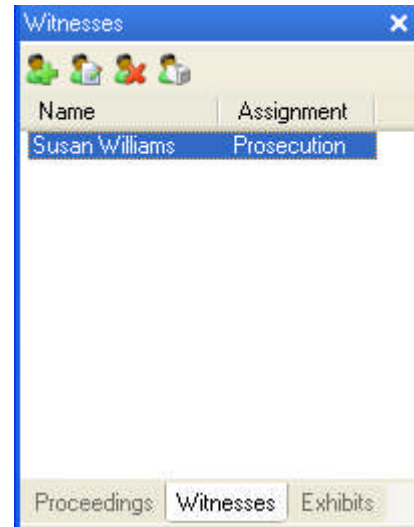

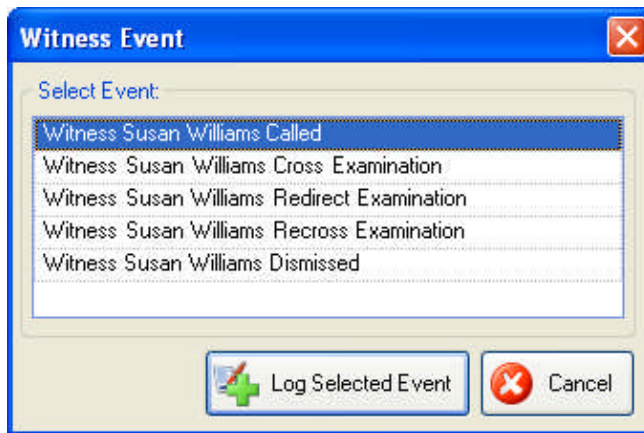

Logging Witnesses and Exhibits

After adding the witnesses and exhibits to the case, they become available for logging into the case log.

To add a witness to the case log:

1. Start the case and select the **Witnesses** tab in the **Proceedings/Witnesses/Exhibits** view window.
2. Locate the witness in the list and double-click on the witness's name; the **Witness Event** window will open.

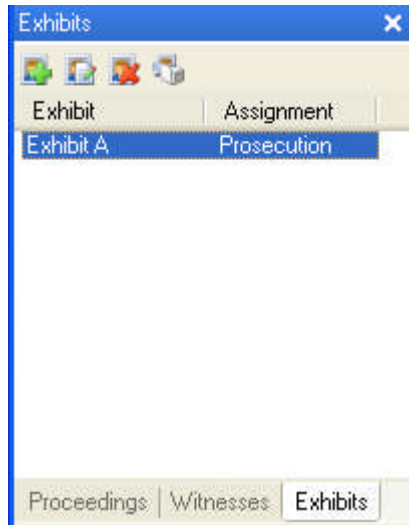

3. There are five separate log events associated with a witness. Choose the appropriate event by clicking once with the mouse and press the **Log Selected Event** button; the log event will appear in the case log.

NOTE: A quicker option for entering the **Witness Event** is to double-click the event and it will appear in the case log.

	Time	Event	Notes
	03:24:46	Court Adjourned	
	03:24:50	Court Adjourned	
	03:25:25	Order signed	
	03:25:37	Remain on same bond	
	03:25:55	Next Motion	
	03:26:03	Response	
	03:26:19	Remain on same bond	
	03:26:22	Remain on same bond	
	03:26:41	Court Adjourned

	03:27:10	Court Adjourned	
	03:27:11	Arraignment Order	
	03:27:36	Reply	
	03:27:40	Non-Dispositive Docket	
	03:28:10	Probation Order	
	03:29:10	Arraignment Order	
	03:31:26	Remain on same bond	
	03:31:31	Witness Susan Williams Called	

To add an exhibit to the case log:

1. Start the case and select the **Exhibits** tab in the **Proceedings/Witnesses/Exhibits** view window.
2. Locate the exhibit in the list and double-click the item name; the **Case Log Event** window will open.

3. Add any notes to be associated with the exhibit by pressing the **Add note** button.

- After entering any note for the exhibit, press the **OK** button and the exhibit will be added to the case log.

Case 2007-11-16 09:09: ✕

	Time	Event	Notes
	10:04:34 AM	Exhibit Prosecution Exhibit 1	
	10:14:05 AM	Defense's Voir-Dire	
	10:14:07 AM	Jury seated and sworn	
	10:14:08 AM	Invoke rule for separation of witnesses	
	10:14:10 AM	Defense's Opening Statement	
	10:14:13 AM	Motion	
	10:14:18 AM	Exhibit Prosecution Exhibit 1	
	11:18:06 AM	Exhibit A	jimc: This exhibit was found near the scene of the crime and was placed in the custody of the police department.

NOTE: All case log events can be edited, and notes can be added to each event. These notes will be displayed in the notes column of the case log. User rights will determine if a user can, or cannot, view these notes (i.e., if the notes were set as private).

Next Case

The **Next Case** icon indicates the next scheduled case on the docket. Once a case is started, a *green* checkmark will appear beside that case in the **Scheduled Today** list and the next case in chronological order will display the **Next Case** icon.

Scheduled Today ✕	
Start Time	Case Number
8:00 AM	CR-323
9:00 AM	06CR40
12:00 PM	CR1-A

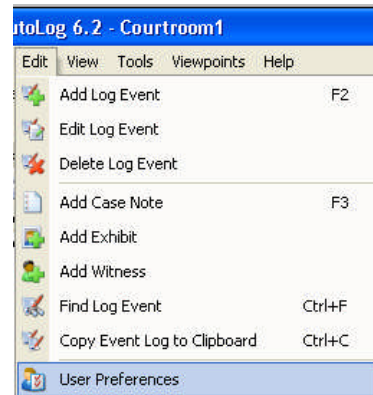

To proceed to the next scheduled case:

- Press the **Next Case** button or select the menu item **Case>Next Case** and the Start Case window opens for the next case on the docket.
- Make sure the case information is correct (i.e., case number, case type, case title, court personnel, etc.).
- Press the **Start Case** button and the next case starts. This is reflected under the Logged Today list in the Cases view.

User Preferences

Managing user default information is accomplished by reviewing and assigning information under the menu item **Edit>User Preferences**. Once set, these will become the defaults for that user.

The **User Preferences** window contains tabs for **Settings**, **Proceedings Menus**, **Case Log Display** and **User Profile**.

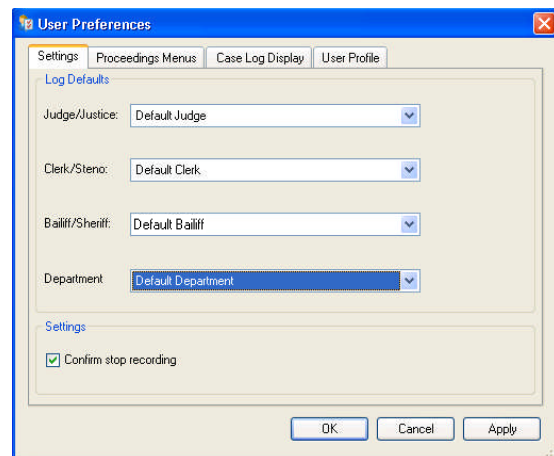

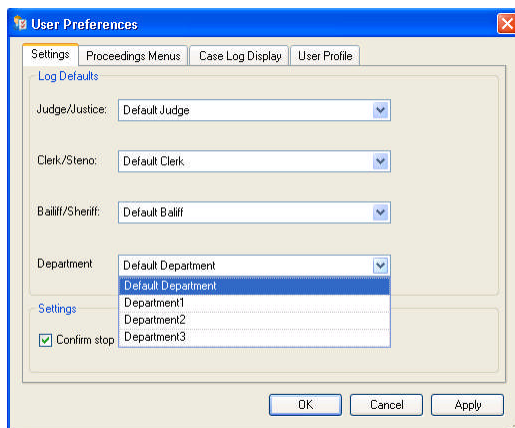

Settings

The **Settings** tab lists the default Judge/Justice, Clerk/Stenographer, Bailiff/Sheriff and Department/Division for the current user.

These defaults will appear in the Start Case dialog for each user when a case is started.

To change log defaults:

1. Select the down arrow to the right of each field and choose court personnel and department from the list.

2. Use the **Confirm stop recording** checkbox to have AutoLog prompt you any time you stop recording.

Proceedings Menu

The **Proceedings Menu** tab lists all of the default Proceedings Menu provided in the AutoLog database for the current user.

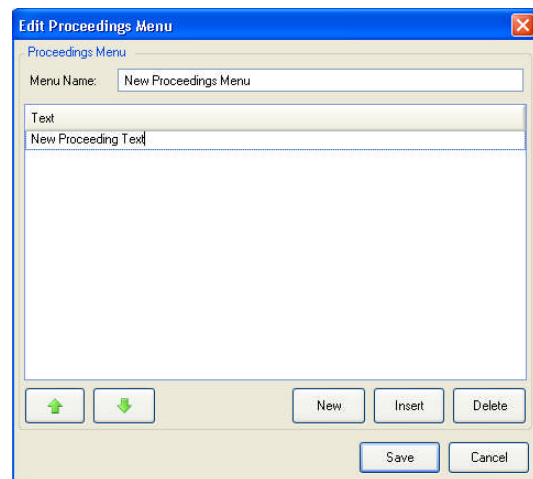

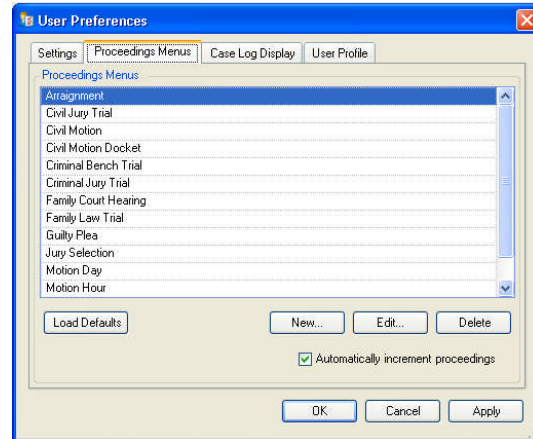

Every Proceedings Menu can be edited or deleted to fit your needs by using the **Edit** or **Delete** buttons.

You can also create your own Proceedings Menu by clicking the **New** button.

Check the **Automatically Increment Proceedings** to use the Enter key when logging.

To add or edit a new Proceedings Menu:

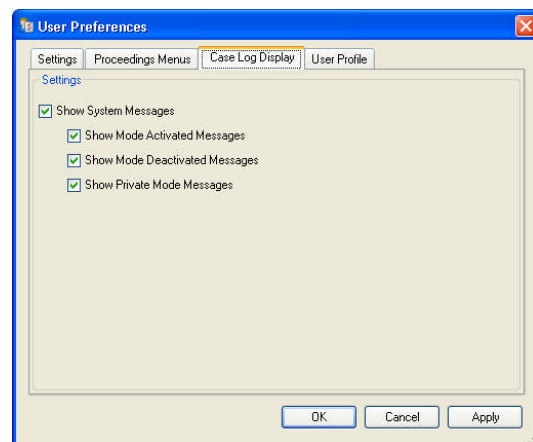

1. Click the **New** button to add a new menu, or select a menu to edit and press the **Edit** button. The **Edit Proceedings Menu** window opens.
2. Add, or edit, the menu's name in the **Menu Name** field. If you wish to add additional proceedings, press the **New** button, (this will add the new text in descending order) or the **Insert** button (this will add the text above the selected text) and type description in the **Text** field. Use the **Up** and **Down** arrows to move a selected item up or down in the list. Use the **Delete** button to remove selected proceeding text in this field.
3. Press the **Save** button.

Note: You can edit the text by double clicking on the text and typing your change.

Case Log Display

This option allows users some control of what Log Events are displayed in the Case Log window, including messages marked as Private and System Mode messages.

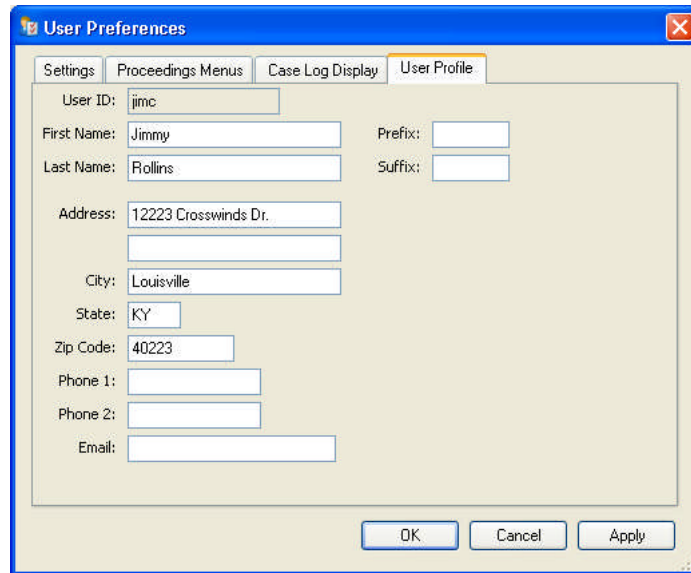

User Profile

This utility will allow the user to change their personal information.

To change your personal information:

1. Select the **User Profile** tab and a personal information form will appear.

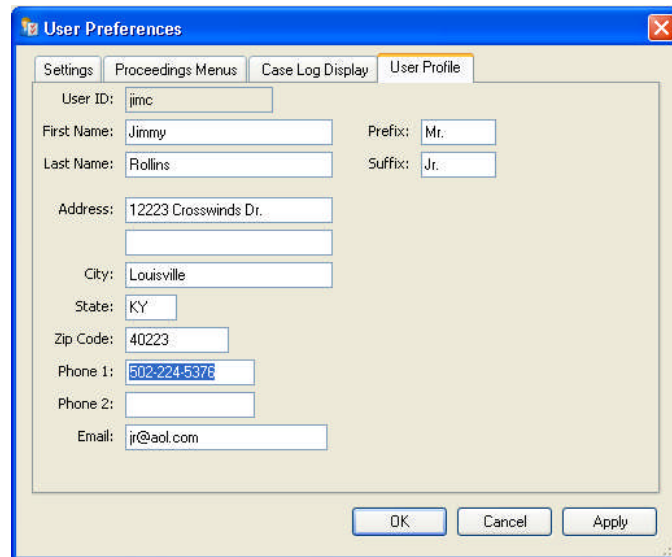

The screenshot shows the 'User Preferences' dialog box with the 'User Profile' tab selected. The form contains the following fields:

Field	Value
User ID	jimc
First Name	Jimmy
Last Name	Rollins
Address	12223 Crosswinds Dr.
City	Louisville
State	KY
Zip Code	40223
Phone 1	
Phone 2	
Email	
Prefix	
Suffix	

Buttons at the bottom: OK, Cancel, Apply.

2. Change or add your personal information as needed and press the **OK** button. Your personal information has now been changed in the database.

The screenshot shows the 'User Preferences' dialog box with the 'User Profile' tab selected, after changes have been made. The form contains the following fields:

Field	Value
User ID	jimc
First Name	Jimmy
Last Name	Rollins
Address	12223 Crosswinds Dr.
City	Louisville
State	KY
Zip Code	40223
Phone 1	502-224-5376
Phone 2	
Email	jr@aol.com
Prefix	Mr.
Suffix	Jr.

Buttons at the bottom: OK, Cancel, Apply.

Case Properties

In the JAVS software set, the ever-changing details of a case are called the **Case Properties**. Several of these properties can change on a day-to-day basis. These changes can be assigned and edited in either AutoLog or CaseScheduler by using the Case Properties function. Case Properties can be accessed on a current case basis or on a logged case basis.

Case Information

Under the **Case Information** tab you can review, add, edit or delete certain attributes of a case. Most of the details in Case Information can be modified as need be (dates are managed in CaseScheduler). In addition to being able to edit a case's title, you can add or edit information pertaining to the prosecution, defense, witnesses or exhibits. The Case Number cannot be changed.

The screenshot shows the 'Case Properties' dialog box with the 'Case Information' tab selected. The fields are as follows:

Case Number:	RC6FT	Case Type:	Arraignment
Case Title:	State vs Burns	Department:	Criminal Court
Scheduled Date(s):			
Plaintiff:	Sawyer 4th, Polly	Edit	
Prosecution:	Brown Jr., Terry	Edit	
Defendant:	Burns Jr., Nathan	Edit	
Defense:	Collier, Zelda	Edit	
Witness:	None	Edit	
Exhibit:	None	Edit	

A 'Close' button is located at the bottom right of the dialog.

Case History

The **Case Properties** dialog window also contains a tab to the **Case History**. This function lists every case's log date(s), and from here the Case Log information may be viewed or printed.

The screenshot shows the 'Case Properties' dialog box with the 'Case History' tab selected. It displays a list of log dates and associated case information.

Log Date(s):	Case Log Information:	Buttons
11/16/2007	Case Number: RC6FT Location: Courtroom1.Judge: Wills, Charles Clerk: Ketter, Mary Bailiff: Hall, Greg Sealed: No	Case History Log Case Log

A 'Close' button is located at the bottom right of the dialog.

Managing Case Information

When a new case is created, all information entered at the time of creation is stored with that case. All information related to a case such as attorneys, plaintiffs, defendants, witnesses and exhibits can be added or changed at any time for each case through the **Case Properties** dialog. Although any case can have its case properties modified, the following instructions will be for the current case.

Add a Witness

To add a witness using **Case Properties**:

1. Start or Prepare a case as outlined in the [New Case](#) section of this manual.
2. Press the **Case Properties** button or select **Case>Case Properties** and the **Case Properties** window opens.

3. Press the **Edit** button to the right of the **Witness** field and the **Edit Witnesses** window opens.

4. Follow the procedure for searching, or adding, a witness as outlined in the [Witnesses and Exhibits](#) section, step 4, of this manual.

- Press **OK** and the witness is added to the **Witness Field** in the Case Properties window. Press the **Close** button to close the Case Properties window and the witness will appear in the **Witnesses** view.

Name	Assignment
Susan Williams	Prosecution

Remove a Witness

To remove a witness using Case Properties:

- Start or Prepare a case as outlined in the [New Case](#) section of this manual.
- Press the **Case Properties** button or select **Case>Case Properties** and the **Case Properties** window opens.

- Press the **Edit** button to the right of the **Witness** field and the **Edit Witnesses** window opens.

- Select the witness to be removed. Press the **Remove From Case** button.

First Name	Last Name	Address	City
Susan	Williams		

- A **"Remove People?"** prompt appears.
- Press **Yes** and the witness(s) is removed from the case.

NOTE: If a witness has been logged as part of a case, they cannot be removed.

Edit a Witness

To edit witness information using **Case Properties**:

1. Start or Prepare a case as outlined in the [New Case](#) section of this manual.
2. Press the **Case Properties** button or select **Case>Case Properties** and the **Case Properties** window opens.

 A screenshot of the "Case Properties" window. It has two tabs: "Case Information" and "Case History". Under "Case Information", there are fields for Case Number (RC6FT), Case Type (Arrestment), Case Title (State vs Burns), and Department (Criminal Court). Below these are fields for Scheduled Date(s), Plaintiff (Sawyer 4th, Polly), Prosecution (Brown Jr., Terry), Defendant (Burns Jr., Nathan), Defense (Collier, Zelda), Witness (Williams, Susan), and Exhibit (None). Each of these fields has an "Edit" button to its right. A "Close" button is at the bottom right.

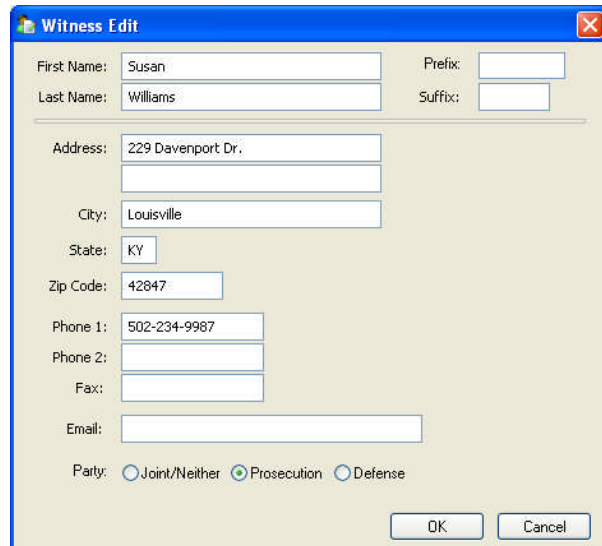

3. Press the **Edit** button to the right of the **Witness** field and the **Edit Witnesses** window opens.

4. Select the witness to be edited and press the **Edit Contact's Info** button and the **Witness Edit** window opens.

 A screenshot of the "Edit Witnesses" window. It shows a table titled "People assigned to case:" with columns for First Name, Last Name, Address, and City. The first row contains "Susan" and "Williams". To the right of the table are buttons: "Print Witnesses", "Create New", "Edit Contact's Info", and "Remove From Case". Below the table is a "Search All Witnesses" section with a search bar and a "Search" button. At the bottom are "OK" and "Cancel" buttons.

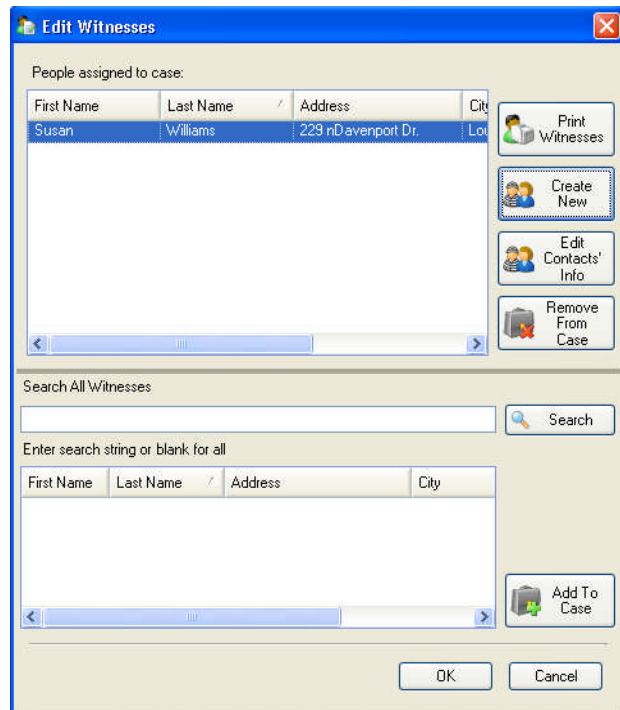

5. Change the witness information as needed and press **OK**.

The **Witness Edit** dialog box contains the following fields and controls:

- First Name:** Susan
- Last Name:** Williams
- Prefix:** (empty)
- Suffix:** (empty)
- Address:** 229 Davenport Dr. (with a second empty line below it)
- City:** Louisville
- State:** KY
- Zip Code:** 42647
- Phone 1:** 502-234-9987
- Phone 2:** (empty)
- Fax:** (empty)
- Email:** (empty)
- Party:** ☐ Joint/Neither ☒ Prosecution ☐ Defense
- Buttons:** OK, Cancel

6. You will return to the **Edit Witness** window. You can choose to edit another witness or press **OK** and return to the **Case Properties** window.

The **Edit Witnesses** dialog box contains the following elements:

- People assigned to case:** A table with columns: First Name, Last Name, Address, City.

First Name	Last Name	Address	City
Susan	Williams	229 nDavenport Dr.	Lo
- Buttons (right side):** Print Witnesses, Create New, Edit Contacts' Info, Remove From Case.
- Search All Witnesses:** A search bar with a magnifying glass icon and a Search button.
- Enter search string or blank for all:** A text input field.
- Search Results Table:** A table with columns: First Name, Last Name, Address, City.

First Name	Last Name	Address	City
------------	-----------	---------	------
- Buttons (bottom right):** Add To Case, OK, Cancel.

Add an Exhibit

To add an exhibit using **Case Properties**:

1. Start or Prepare a case as outlined in the [New Case](#) section of this manual.
2. Press the **Case Properties** button or select **Case>Case Properties** and the **Case Properties** window opens.

The Case Properties window is shown with the Case Information tab selected. It contains the following fields:

- Case Number: RCGFT
- Case Type: Arraignment
- Case Title: State vs Burns
- Department: Criminal Court
- Scheduled Date(s):
- Plaintiff: Sawyer 4th, Polly
- Prosecution: Brown Jr., Terry
- Defendant: Burns Jr., Nathan
- Defense: Collier, Zelda
- Witness: Williams, Susan
- Exhibit: None

Each field has an 'Edit' button to its right. A 'Close' button is at the bottom right.

3. Press the **Edit** button to the right of the Exhibit field and the **Exhibits** window opens.

The Exhibits window shows a table for 'Exhibits assigned to this case:' with columns 'Name' and 'Description'. On the right side, there are four buttons: 'Print Exhibits', 'Create New', 'Edit Exhibit Info.', and 'Remove from case'. 'OK' and 'Cancel' buttons are at the bottom.

4. Press the **Create New** button and the Exhibit Info window will open

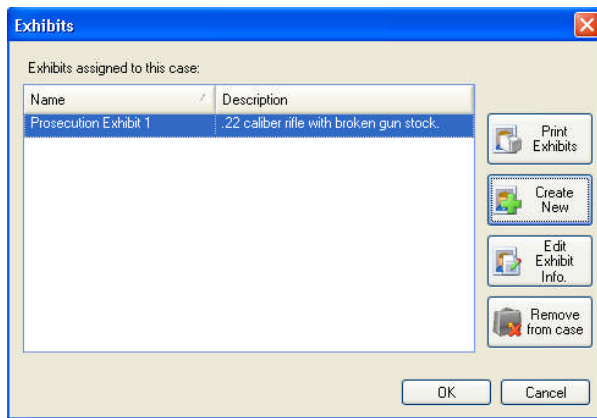

5. Use the auto generated name or enter the exhibit name and relevant exhibit information in the text fields. Make sure to check the appropriate box to designate the exhibit for the **Prosecution**, **Defense**, or **Generic/Joint**.

The Exhibit Info. window contains the following fields and options:

- Name: Prosecution Exhibit 1
- Description: .22 caliber rifle with broken gun stock.
- Radio buttons: ☐ Generic/Joint Exhibit, ☒ Prosecution Exhibit, ☐ Defense Exhibit
- Buttons: Enter into log, OK, Cancel

- Press **OK** and the exhibit is added to the **Exhibit List** in the **Exhibits** window. Press **OK** to return to the **Case Properties** window. Press the **Close** button to close the Case Properties window and the exhibit will appear in the **Exhibits** view.

Remove an Exhibit

To remove an exhibit using Case Properties:

- Start or Prepare a case as outlined in the [New Case](#) section of this manual.
- Press the **Case Properties** button or select **Case>Case Properties** and the **Case Properties** window opens.

- Select the **Edit** button to the right of the **Exhibit** field and the Exhibits window will open.

4. Select the exhibit to be removed and press the **Remove from case** button. A **"Delete Exhibit?"** prompt appears.

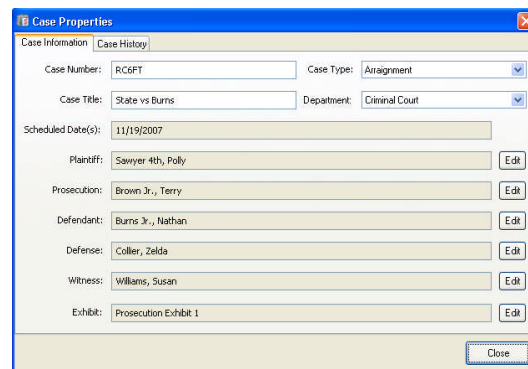

5. Press **Yes** and the exhibit is permanently deleted from the case.

NOTE: If an exhibit has been logged as part of a case, it cannot be removed.

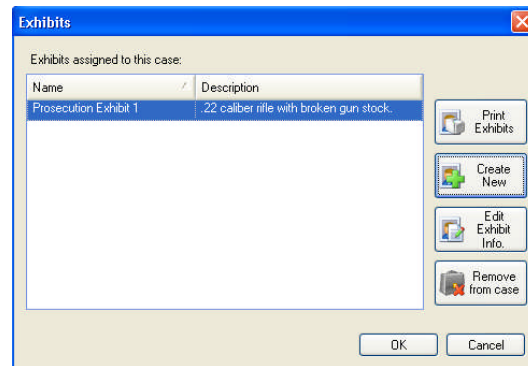

Edit an Exhibit

To edit exhibit information using **Case Properties**:

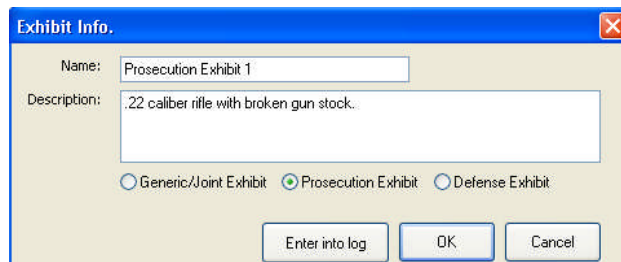

1. Start or Prepare a case as outlined in the [New Case](#) section of this manual.
2. Press the **Case Properties** button or select **Case>Case Properties** and the **Case Properties** window opens.

3. Select the **Edit** button to the right of the **Exhibit** field and the Exhibit Info window will open.

4. Change the exhibit information as needed and press **OK**. The exhibit information has now been changed.

Managing Users and Contacts

Attorneys, Plaintiffs and Defendants can also be added and edited in the Case Properties window.

The dialog for Plaintiff, Prosecution, Defendant and Defense is the same as for the New Case dialog and is accessed for each by pressing the Edit button to the right of the field. (See [Adding Attorneys and Contacts](#)).

The **Edit Plaintiff-Defendant** window will open.

2. Press the **Edit Contact Info** button and the **Edit Contacts** window will open.

A window titled "Edit Contacts" showing contact information for Donald Rowe. It includes fields for First Name, Last Name, Prefix, Suffix, Address, City, State, Zip Code, Phone 1, Phone 2, Fax, and Email. The email field contains "dr@net.net". At the bottom right are "Save" and "Cancel" buttons.

3. Select the name of the **Plaintiff-Defendant** to edit their personal information. Change or add personal information as needed and press the **Save** button.

Remove a Plaintiff or Defendant

To remove a plaintiff or defendant:

1. Select the Plaintiff or defendant from the **Edit Plaintiff-Defendant** window. Press the **Remove from Case** button. A **Remove people?** Confirmation window will open.

2. Press the **Yes** button to remove the **Plaintiff-Defendant**. The party is removed from the case.

Managing Attorneys in Case Properties vs. Case Log Properties

Attorneys can be associated with a case in numerous ways. Typically created or assigned at the initiation of a new case, in some instances a particular attorney may not be available for a case on a given day and a colleague may have to take over representation. In this scenario, the new attorney will have to be added to the day's case and become a part of the case properties.

Case Log Properties

Whereas "top-level" details are assigned to a case in the Case Properties function, the Case Log Properties are the selected details that get logged with a case, including the defaults for judge, bailiff, clerk and attorneys.

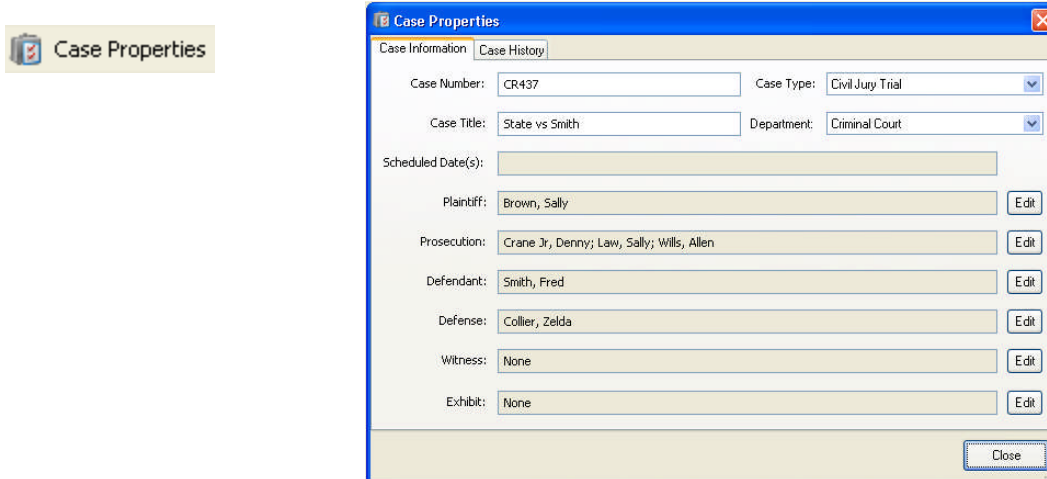

Once the Case Properties have been assigned to a case on the front end, **Case Log Properties are what permit you to review or change case information during the court session.**

As in Case Properties, Case Log Properties also gives you access to the add/edit functions for significant court personnel.

A screenshot of the "Case Log Properties" window. It contains several input fields and dropdown menus for case details. The fields are: Case Number (CR-323), Case Type (Arraignment), Case Title (State vs Carter), Department (Default Department), Plaintiff (Kentucky, State of), Prosecution (Wilson, Lawrence), Defendant (Carter, John), Defense (Allen, Donald), Judge/Justice (Default Judge), Bailiff/Sheriff (Default Bailiff), and Clerk/Steno (Default Clerk). Each of the Plaintiff, Prosecution, Defendant, and Defense fields has an "Edit" button to its right. At the bottom right are "Save" and "Cancel" buttons.

To edit/add attorneys using Case Properties:

1. Start or Prepare a case as outlined in the [New Case](#) section of this manual.
2. Press the **Case Properties** button or select **Case>Case Properties** and the **Case Properties** window opens.

The **Case Properties** window displays case information and allows editing of case details. It includes tabs for Case Information and Case History. The Case Information tab shows fields for Case Number, Case Type, Case Title, Department, Scheduled Date(s), Plaintiff, Prosecution, Defendant, Defense, Witness, and Exhibit, each with an associated Edit button.

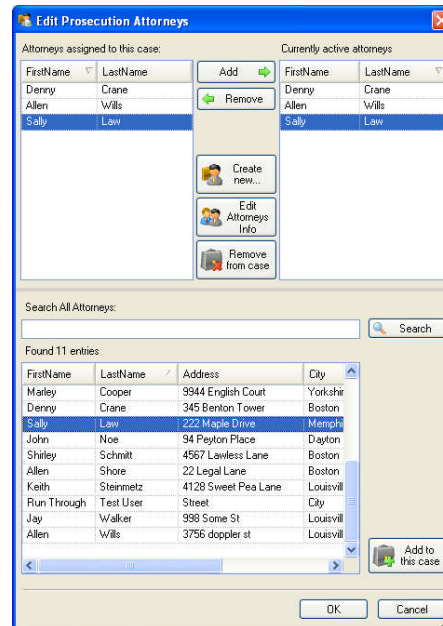

Field	Value	Action
Case Number	CR437	
Case Type	Civil Jury Trial	
Case Title	State vs Smith	
Department	Criminal Court	
Scheduled Date(s)		
Plaintiff	Brown, Sally	Edit
Prosecution	Crane Jr, Denny; Law, Sally; Wills, Allen	Edit
Defendant	Smith, Fred	Edit
Defense	Collier, Zelda	Edit
Witness	None	Edit
Exhibit	None	Edit

3. Press the **Edit** button next to the Prosecution or Defense text field and the **Edit (Prosecution or Defense) Attorneys** window opens.

NOTE: You can add or remove attorneys to or from the case properties. You can also use the **Search** button to find attorneys in your database. If the attorney does not exist in your database, press the **Create New** button to add them.

For more details, refer to the [Adding Attorneys and Contacts](#) section of this manual.

4. Press **OK** once you have made the appropriate changes.

The **Edit Prosecution Attorneys** window allows managing attorneys assigned to a case. It shows a list of currently active attorneys and a search interface to find attorneys in the database.

Attorneys assigned to this case:				Currently active attorneys

Buttons: Add to this case, OK, Cancel

To edit/add attorneys using Case Log Properties:

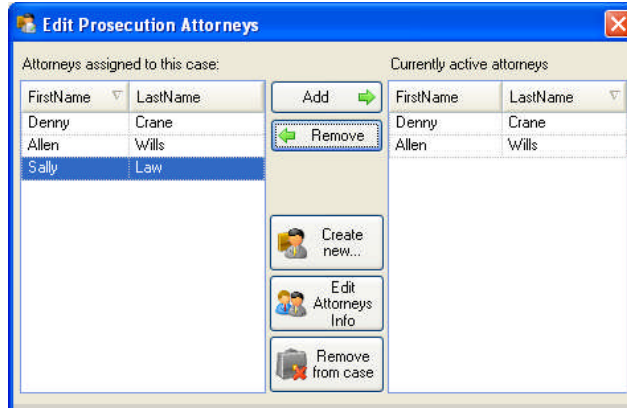

1. Select the menu item **Case>Case Log Properties** and the **Case Log Properties** window opens.
2. Press the **Edit** button next to the attorney text field and the **Edit (Prosecution or Defense) Attorneys** window opens.

For more details, refer to the [Adding Attorneys and Contacts](#) section of this manual.

3. Press **OK** once you have made the appropriate changes.

Attorneys Assigned to this Case/Day

Attorneys assigned to a particular case aren't always required to attend every proceeding. AutoLog enables you to designate on which days the case attorneys are present or not. In the Edit Prosecution Attorneys and Edit Defense Attorneys windows are two columns: one for attorneys assigned to the case and another for those in attendance that particular day.

To assign case attorneys to a particular day:

1. Select the menu item **Case>Case Log Properties** to access the Edit Attorneys function.
2. Regarding their attendance in the courtroom, use the **Add** or **Remove** buttons to assign case attorneys to a particular day.
3. If a new attorney needs to be created, press the **Create New** button. For more details, refer to the [Adding Attorneys and Contacts](#) section of this manual.
4. Press **OK** when finished. The attorneys are now assigned to the day's proceedings.

Log Events

AutoLog automatically creates a Log Event when a case starts, when a case is recessed or resumes, when a case ends, and when system events take place (i.e., Bench Conference, Voir Dire, etc.).

In addition, AutoLog also allows users to log events manually by using an array of functions and utilities.

If a case was previously logged, you can view those logged events along with the current day's events.

Select **View>All Case Events**.

	Time	Event	Notes
	11:07:27	Case Started	
	11:07:40	Preliminary Remarks	
	11:07:44	Jury panel sworn	
	11:08:05	Juror Question	
	11:08:30	Question by Jury placed on record by Court	
	11:08:41	Jury seated and sworn	
	11:08:44	Jury Instructions	
	11:10:25	Court Voir-Dire	
	11:10:37	Remarks to Jury panel by court	
	11:11:22	Case Recessed	
	02:51:24	Case Resumed	
	02:51:41	Return of Jury	
	02:52:37	Commonwealth's Opening Statement	
	02:52:52	Case for Commonwealth	

Add a Log Event

Most log events are added through the Proceedings menu, the Witnesses menu, the Exhibits menu, or the Add Log Event button. Note that Proceedings, Witnesses, and Exhibits are all tabs in the same window view (see [AutoLog User Interface](#) for more information).

Adding Custom Log Events

To add a log event to the case log other than the ones in the Proceedings, Witnesses, and Exhibits tabs:

1. Press **Add Log Event** button in the logging toolbar or select the menu item **Edit>Add Log Event** and the **Case Log Event** window opens.

2. Fill in the **Event Text** field with the Log Event title.

The 'Case Log Event' dialog box contains the following fields and controls:

- Event Time:** A time selection field showing 10:26:14 AM.
- Event Text:** A text input field for the event title.
- Event Type:** Radio buttons for 'Public Event' (selected) and 'Private Event'.
- Notes:** A large text area for additional notes.
- Buttons:** 'Add Note', 'Delete Note', 'OK', and 'Cancel' at the bottom.

3. Press the **OK** button. The Log Event has now been added.

Case: cr101			
	Time	Event	Notes
	03:47:19	Case Started	
	03:47:32	Preliminary Remark	
	03:47:38	State's opening statement	
	03:47:47	Defense opening statement	
	03:47:56	ADD THIS LOG EVENT	

Time Stamping Log Events

In order to maintain an accurate case log, AutoLog time stamps a Log Event the moment the Add Log Event button is pressed--thus stamping the event as soon as it occurs, not when the related data has been entered and the OK button pressed, as this process can take from several seconds to even a minute or two later.

Edit a Log Event

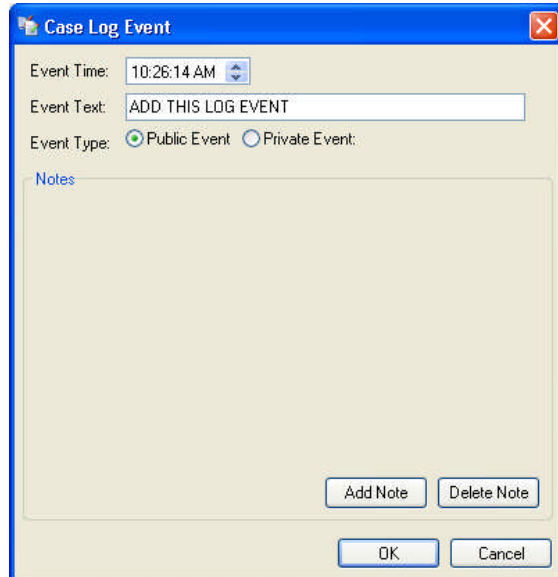

To edit a case log event:

1. Select the Log Event you wish to edit in the Case Log window. Press the **Edit Log Event** button or select the menu item **Edit>Edit Log Event**. You can also double-click on the Entry and the **Case Log Event** window opens.

2. Make the desired changes to the Event Text or Event Time.

NOTE: To change a log event's time, select the hour, minute, or second and use the up/down arrow to change it; or manually key in the time. This could change the placement of the event if the time stamp precedes or follows another log event. Also, depending on your rights, you may not be able to change the Event Time.

A dialog box titled "Case Log Event" with a blue border and a close button (X) in the top right corner. It contains the following fields and controls:

- Event Time:** A text box showing "10:26:14 AM" with up and down arrow buttons on the right.
- Event Text:** A text box containing "ADD THIS LOG EVENT".
- Event Type:** Two radio buttons labeled "Public Event" (which is selected) and "Private Event".
- Notes:** A large, empty text area for adding notes.
- Buttons:** At the bottom right, there are four buttons: "Add Note", "Delete Note", "OK", and "Cancel".

NOTE: System events such as Start Case, Recess Case, Resume Case, End Case and mode change messages cannot be edited.

Public/Private Case Logs

In some cases, not every event is intended to be logged in the public record of a proceeding. Clicking the “**Public Event**” or “**Private Event**” radio buttons controls whether or not the log event appears on the case log entry intended for the public record. A private event is not available in the printed case log or viewable without certain user rights. This is a reversible process—meaning an entry marked as private can once more be made public if desired—unless the event was created in a Private System Mode (see [System Settings](#)).

To make a log event private:

1. Double-click on a Log Event in the Case Log window; the **Case Log Event** window opens.
2. Select the **Private Event** radio button.

3. Press the **OK** button. The Log Event has now been edited and made private as indicated by the **Private Event** icon.

	10:42:11 AM	Motion to Revoke Probation	
	10:42:13 AM	EDIT THIS LOG EVENT	

Delete a Log Event

To delete a log event:

1. Select the Log Event you wish to delete in the Case Log window.
2. Press the **Delete Log Event** button or select the menu item **Edit>Delete Log Event**.

3. A **Delete Event?** confirmation will appear. Press **Yes** and the event will be deleted.

WARNING!

Make sure you've selected the **CORRECT** Log Event to delete. This process **cannot** be undone.

Event Notes

An Event Note typically consists of pertinent information entered as an addendum to a Log Event. Like any Log Event, Event Notes are editable by double-clicking in the notes column of the event to access its properties.

Event Notes may be entered as public or private. By default, Event Notes are entered as notes for the public record. If needed, AutoLog users can annotate private notes viewable only by those with the appropriate user rights. Private notes are not included as part of a case log's public record, unless they are specifically marked as such.

Log Event notes are tagged by your user name. With the appropriate rights, other users may be able to add, edit, or delete Event Notes.

Add Public Event Note

To add a Public Event Note to an existing Log Event:

1. Double-click the Log Event in the Case Log window. The **Case Log Event** window opens with the Log Event listed in the Event Text field.
2. Press the **Add Note** button and the **Notes** entry field becomes active.

3. Enter text in the **Notes** entry field. Ensure the **Public Note** radio button is selected.
4. Press the **OK** button. The note appears in the Log Event's **Notes** column.

 A screenshot of the "Case Log Event" dialog box. It has a blue title bar with the text "Case Log Event" and a close button. The main area is light beige. At the top, there's a label "Event Time:" followed by a time selection dropdown showing "11:46:01 AM". Below that is a label "Event Text:" followed by a text box containing "Jury instructions". Then, a label "Event Type:" followed by two radio buttons: "Public Event" (which is selected) and "Private Event". Below this is a section titled "Notes" with a tab labeled "Note 1". Inside this section, there's a label "Created By:" followed by the text "jmc". Below that is a large text area containing the text: "Judge dismissed a sick juror by the name of Elizabeth Seabolt. Reserve juror Benny Youngblood called to duty." At the bottom of the "Notes" section are two radio buttons: "Public Note" (selected) and "Private Note". At the very bottom of the dialog are four buttons: "Add Note", "Delete Note", "OK", and "Cancel".

NOTE: Double-clicking on the event field of the Log Event will open the Case Log Event window. To activate the Notes, select the Add Note button. However, if you double-click on the notes field of the Log Event, the Notes entry field will automatically become active when the Case Log Event window opens.

Add Private Event Note

To add a Private Event Note to an existing Log Event:

1. Double-click the Log Event in the Case Log window. The **Case Log Event** window opens with the Log Event listed in the Event Text field.
2. Press the **Add Note** button to activate the **Notes** entry field; enter desired text.
3. Under the **Notes** text field, Ensure the **Private Note** radio button is selected.
4. Press the **OK** button. The note appears marked as **Private** in the Log Event's **Notes** column.

NOTE: Other users may be able to view your private notes if they have assigned user rights.

Edit Event Note

To edit an Event Note:

1. Double-click the **Notes** field of the Log Event. The **Case Log Event** window opens with the Log Event listed in the Event Text field.
2. Make the desired changes to the text in the **Notes** field.
3. Press the **OK** button. The edited Event Note appears in the Log Event's **Notes** column.

Delete Event Note

To delete an Event Note:

1. Double-click the **Notes** field of the Log Event. The **Case Log Event** window opens with the Log Event listed in the Event Text field.
2. Press the **Delete Note** button to remove the information in the **Notes** field. 
3. Press the **OK** button. The Event Note has now been deleted from the Log Event's **Notes** column.

NOTE: Make sure you've selected the **CORRECT** Log Event. This process **cannot** be undone.

Case Notes

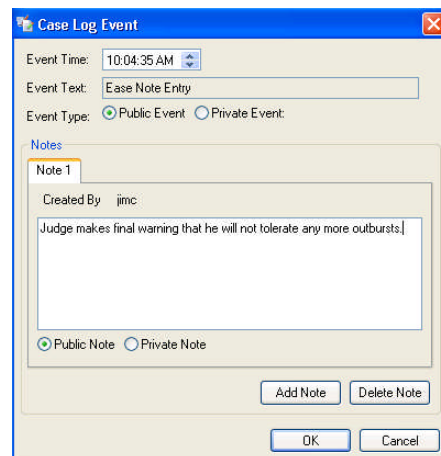

Case Notes differ from Event Notes in that they are not associated with any particular log event. AutoLog will handle the Case Note just like a log event and will be time stamped at the point of initiation. The Event Text field cannot be changed like a log event and will always read "Case Note Entry". You can, however, change the Event Time and the note(s) associated with the Case Note and the event and notes can be public or private.

To add a Case Note that is not linked to an event:

1. Press the **Add Case Note** button or select the menu item **Edit>Add Case Note**. The **Case Log Event** window opens with "**Case Note Entry**" listed in the Event Text field.

2. Enter text in the Notes text field or change the event time.

The screenshot shows the 'Case Log Event' window. It has a title bar with a close button. Inside, there's an 'Event Time' field set to '10:04:35 AM'. Below it is the 'Event Text' field containing 'Case Note Entry'. The 'Event Type' section has two radio buttons: 'Public Event' (selected) and 'Private Event'. A 'Notes' section is expanded, showing 'Note 1' with a text area containing 'Judge makes final warning that he will not tolerate any more outbursts.'. Below the text area are 'Public Note' (selected) and 'Private Note' radio buttons. At the bottom right are 'Add Note', 'Delete Note', 'OK', and 'Cancel' buttons.

- Press the **OK** button. The Case Note appears in the Case Log window as its own log event.

Case: CR1022		
Time	Event	Notes
09:37:41	Case Started	
09:37:48	Case Continued	
09:38:01	Preliminary Remarks	
09:38:19	Jury panel sworn	
09:38:29	Commonwealth's Voir-Dire	
09:39:21	Case Recessed	
10:34:48	Case Note Entry	jmc: Judge makes final warning to the courtroom that he will tolerate no more outbursts.

Review Event

The Review Event function allows the user to review the case log and associated audio and video media by launching JAVS CaseViewer.

To review the case log from a selected log event:

- Right click on any event logged from the proceedings menu or manually logged by the user, i.e. **Add Log Event** or **Add Case Note**. A **Review Event** selection will appear.

5/10/2007 10:25:11 PM	Case Continued	
5/10/2007 10:25:16 PM	Order signed	
5/10/2007 10:25:18 PM	Order to Dismiss	
5/10/2007 10:25:20 PM	Judgment on guilty plea	

- Left click the **Review Event** selection and JAVS CaseViewer will open and play from the selected log event.

Edit Case Log

For each case that is recorded and ended, AutoLog creates a case log that consists of the log display including any event notes or case notes associated with that case. The case will appear in the **Logged Today** view. Limited editing can be performed on the case log and a hard copy can also be printed of the log.

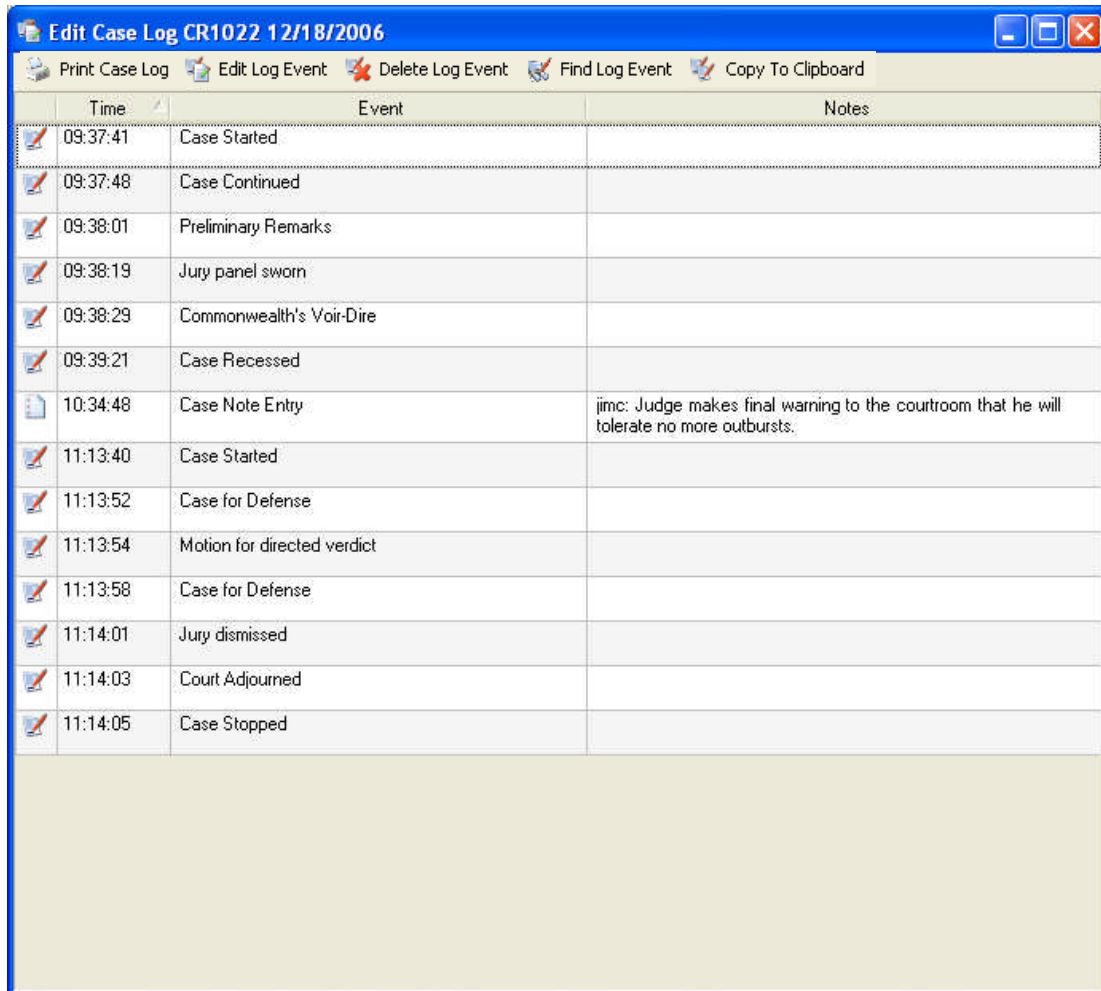

To edit the case log:

- In the **Logged Today** view, select the desired case for case log editing.

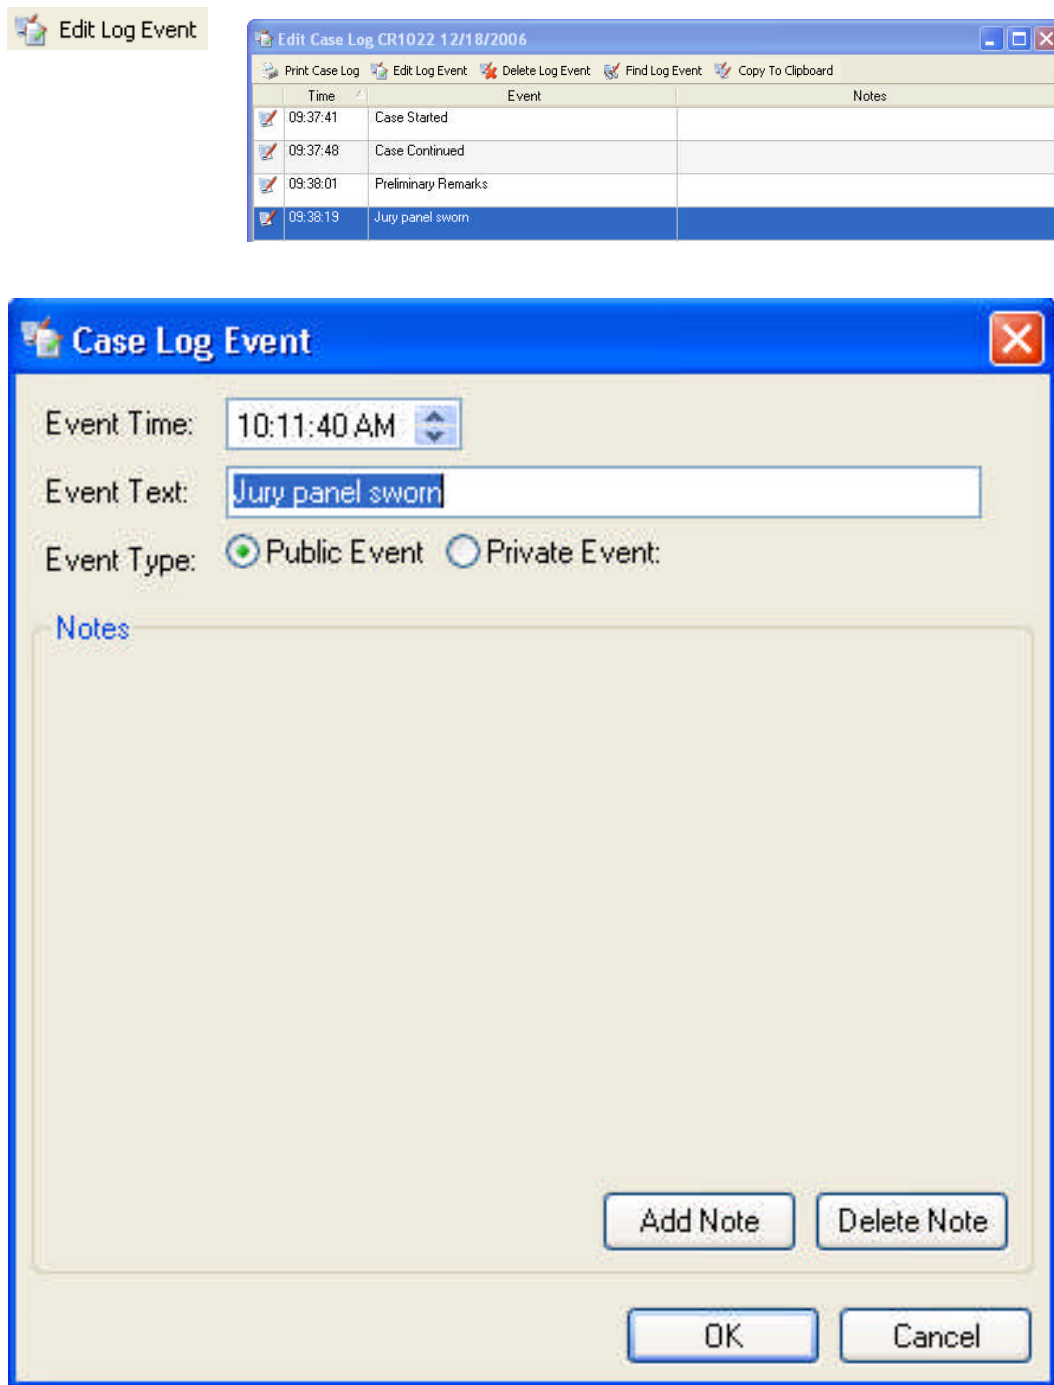

Logged Today		
Start Time	Case Number	Case Name
11:46 AM	CSE-D2	De
11:55 AM	CR1022	Sta
<div> <div><</div> <div>...</div> <div>></div> </div>		
<div> <div>Scheduled Today</div> <div>Logged Today</div> </div>		

NOTE: A case must have been started or prepared to appear in the Logged Today view.

2. Press the **Edit Case Log** button and the **Edit Case Log** window will open.

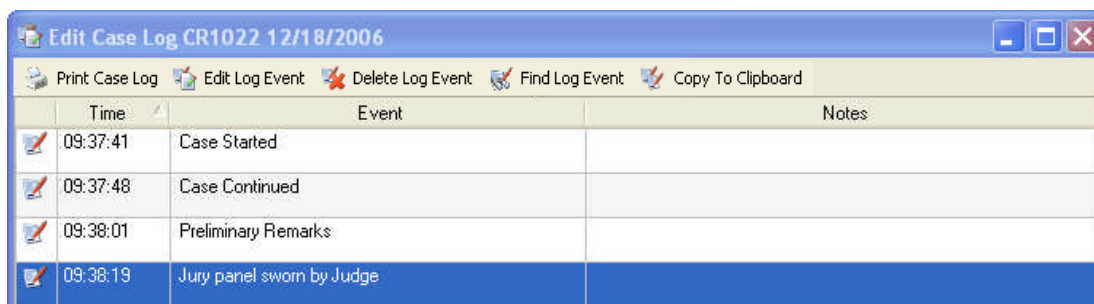

3. Double-click on any event in the **Edit Case Log** window, or select an event and press the **Edit Log Event** button and the **Case Log Event** window will open.

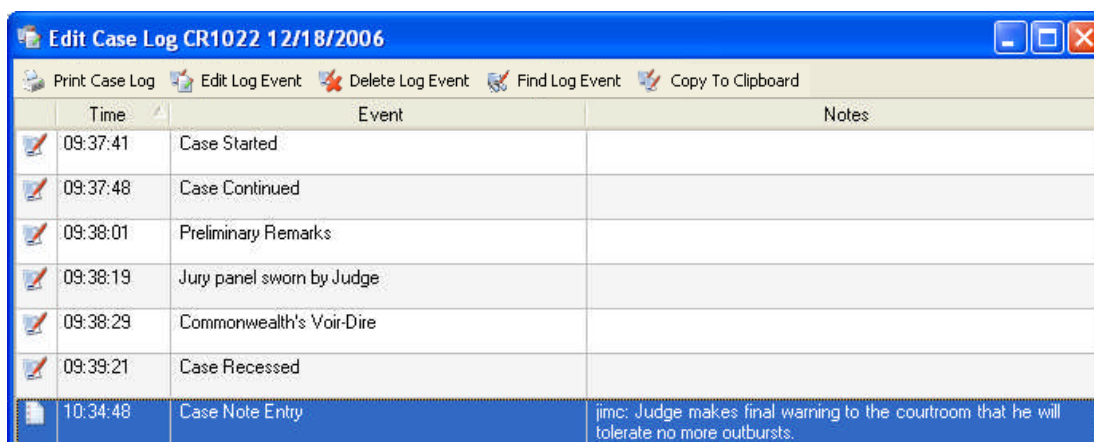

4. Edit the Event Text, change the Event Time, or make the event public or private. (See how **to make a log event private** in the [Edit a Log Event](#) section of this manual).

- Press the **OK** button and you will return to the **Edit Case Log** window with the event text or time changed, and/or a public or private indication to the event.

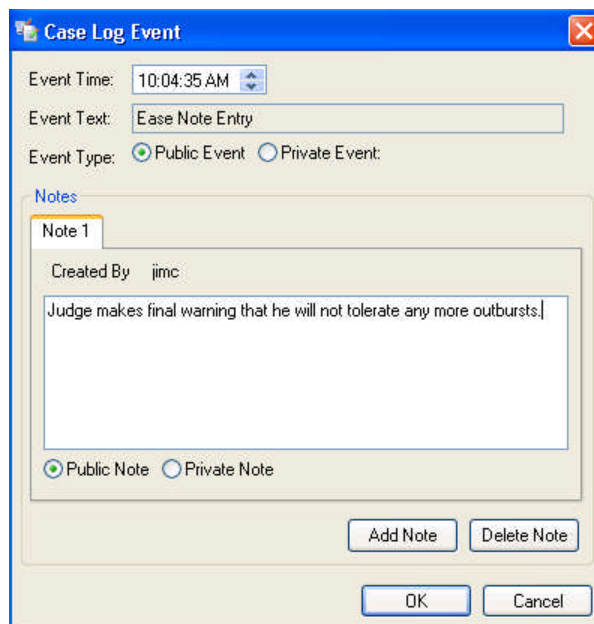

To edit an event note:

- In the **Edit Case Log** window, double-click the **Notes** field of the Log Event or Case Note to be changed, or select an event and press the **Edit Log Event** button.

- The **Case Log Event** window will open with the notes field active.
- Change the note(s) as needed, or make the notes public or private. (See [Add Private Event Note](#) section of this manual).

- Press the **OK** button and you will return to the **Edit Case Log** window with the note(s) edited, and/or a public or private indication to the note(s).

	10:04:35 AM	Ease Note Entry	jmc: Judge makes final warning that he will not tolerate any more outbursts.
---	-------------	-----------------	--

To delete a log event:

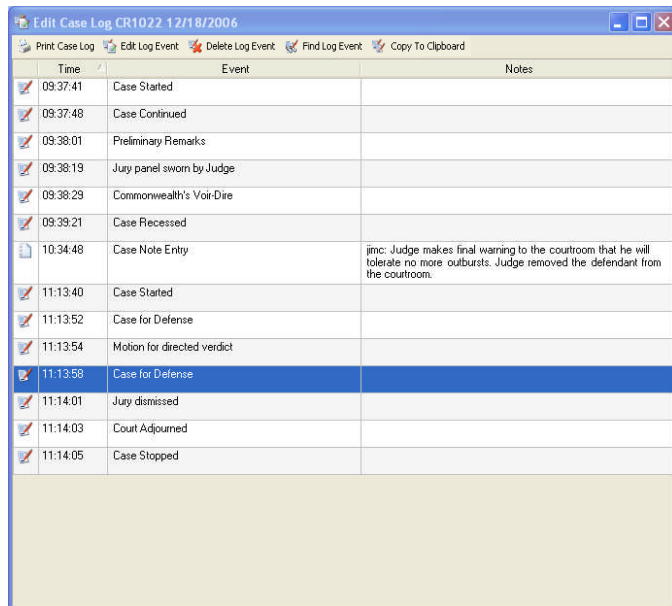

- Select the event to be deleted in the **Edit Case Log** window.
- Press the **Delete Log Event** button or use the **Delete** key on the keyboard.

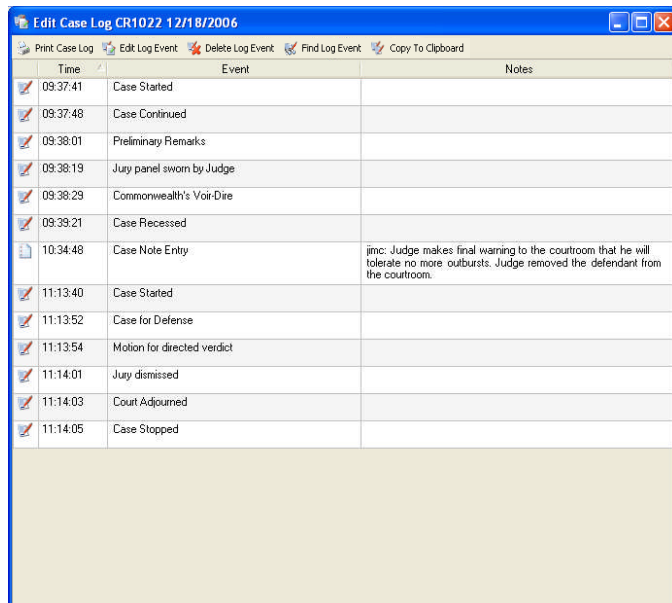

- A “**Delete Event?**” confirmation screen will appear.

- Select **Yes** and the event has been removed from the case log.

Time	Event	Notes
09:37:41	Case Started	
09:37:48	Case Continued	
09:38:01	Preliminary Remarks	
09:38:19	Jury panel sworn by Judge	
09:38:29	Commonwealth's Voir-Dire	
09:39:21	Case Recessed	
10:34:48	Case Note Entry	jmc: Judge makes final warning to the courtroom that he will tolerate no more outbursts. Judge removed the defendant from the courtroom.
11:13:40	Case Started	
11:13:52	Case for Defense	
11:13:54	Motion for directed verdict	
11:13:58	Case for Defense	
11:14:01	Jury dismissed	
11:14:03	Court Adjourned	
11:14:05	Case Stopped	

Time	Event	Notes
09:37:41	Case Started	
09:37:48	Case Continued	
09:38:01	Preliminary Remarks	
09:38:19	Jury panel sworn by Judge	
09:38:29	Commonwealth's Voir-Dire	
09:39:21	Case Recessed	
11:13:40	Case Started	
11:13:52	Case for Defense	
11:13:54	Motion for directed verdict	
11:14:01	Jury dismissed	
11:14:03	Court Adjourned	
11:14:05	Case Stopped	

WARNING!

Make sure you've selected the **CORRECT** Log Event to delete. This process **cannot** be undone.

Find Log Event

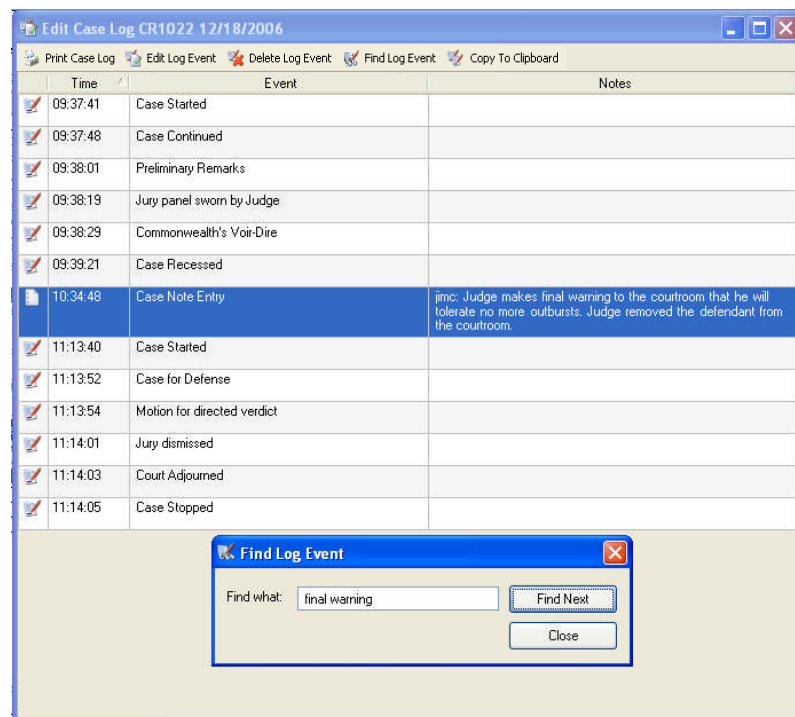

A case log for any given day can be filled with many case log events--and events you wish to edit can be hard to find. The **Find Log Event** function allows the user to do a string search of the log events or event notes to more easily locate the event(s) for editing. This function is also available for the current case log during a court session.

To find a log event or event note:

1. In the **Edit Case Log** window, press the **Find Log Event** button and a **Find Log Event** search field will open.

2. Type in all or part of a word or string of words you wish to find and press the **Find Next** button.
3. The **Find Log Event** function will locate the event(s) that contain the search string typed in the search field.
4. Press **Find Next** again to locate any other events that contain the specified search string.

NOTE: The Find Log event will search the entire Log Event column as well as the Notes column.

Copy To Clipboard

The Copy to Clipboard button will copy the contents of the case log into the Windows clipboard buffer and is available for pasting into any text editing program.

Printing the Case Log

Once the case log has been edited to suit your needs, a hard copy can be produced if a local or network printer is connected to your particular system.

To print a case log:

1. From the **Edit Case Log** window, press the **Print Case Log** button and the **Case Log Report** window will open.

A screenshot of the "Case Log Report" window. It has a blue title bar with the text "Case Log Report" and a close button. The window is divided into two main sections. The top section, titled "Case Information", contains two labels: "Case Number:" followed by "CR-323" and "Case Title:" followed by "State vs Carter". The bottom section is divided into two parts. On the left, titled "Filter", there are three checkboxes: "Include Private Events", "Include Notes", and "Include Private Notes". On the right, titled "Sessions", there is a table with two columns: "Location" and "Date". The first row of the table is highlighted in blue and contains the text "Courtroom 2" and "03/07/2008". At the bottom right of the window are two buttons: "OK" and "Cancel".

Location	Date
Courtroom 2	03/07/2008

2. In the **Filter** section, you can select whether to include public or private events and notes:

Include Private Events are the events that have been marked as private by a user so that users who do not have the rights cannot view these events.

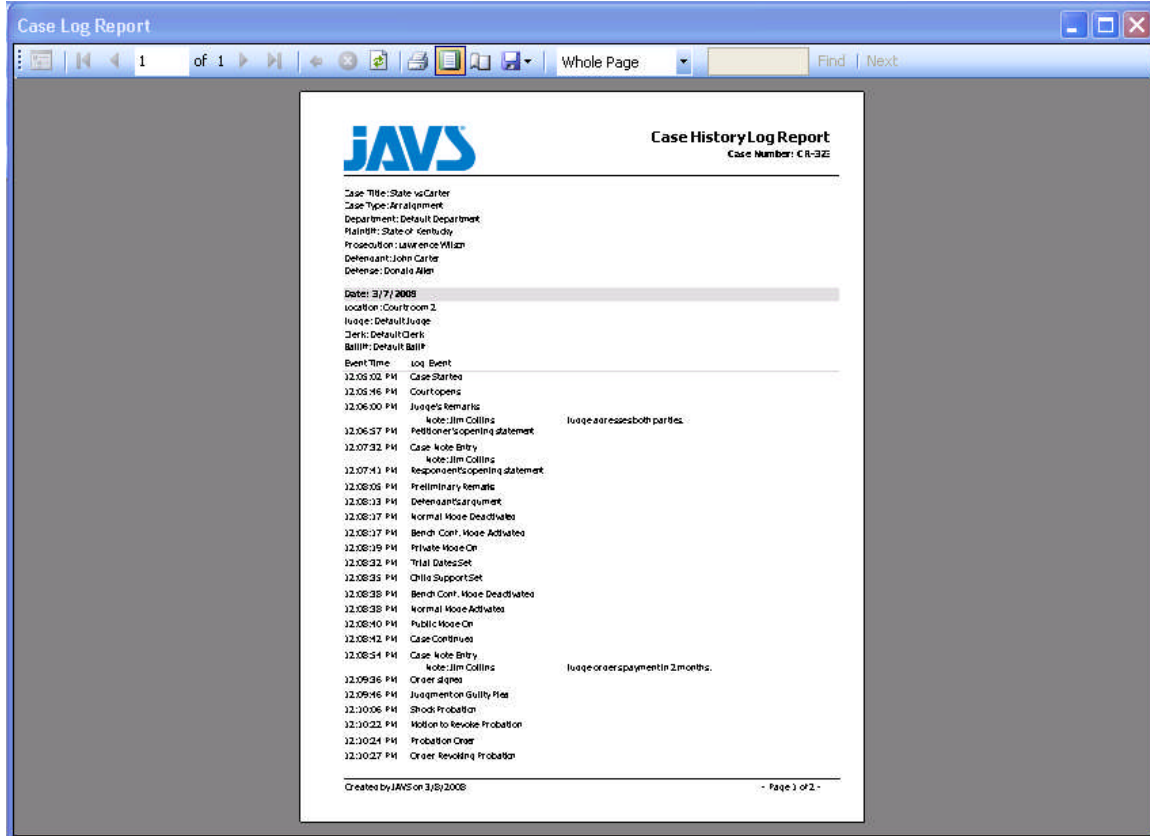

Include Notes will print all public notes associated with each event.

Include Private Notes will print all notes, including those marked by the user as private.

A close-up screenshot of the "Filter" section of the "Case Log Report" window. It shows three checkboxes: "Include Private Events", "Include Notes", and "Include Private Notes".

Filter
<input type="checkbox"/> Include Private Events
<input type="checkbox"/> Include Notes
<input type="checkbox"/> Include Private Notes

- Press the **OK** button and the Case Log Report print preview will open.

- Press the Print button to print the Case Log. 
- When finished printing, close the **Edit Case Log** window.

Printing and Publishing

AutoLog provides tools for printing case logs, schedules, case histories, witness lists and exhibit lists. It also provides tools for publishing the media (Audio/Video) associated with a case and includes case logs and notes associated with each case.

Printing

AutoLog can generate a paper record of any case log or case log history as well as customize what events and notes are printed.

Print Current Case Log

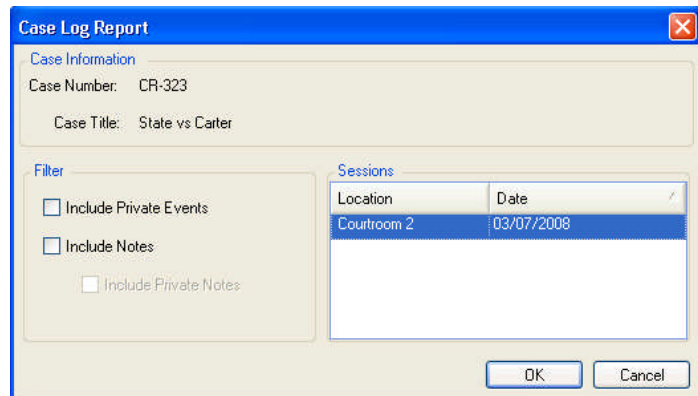

The **Print Current Case Log** command allows the user to print the case log of the case that is currently in session.

To print the current case log:

1. Start or Prepare a case as outlined in the [New Case](#) section of this manual.
2. Select the menu item **Case>Print Current Case Log**, or press the **Print Current Case Log** button.

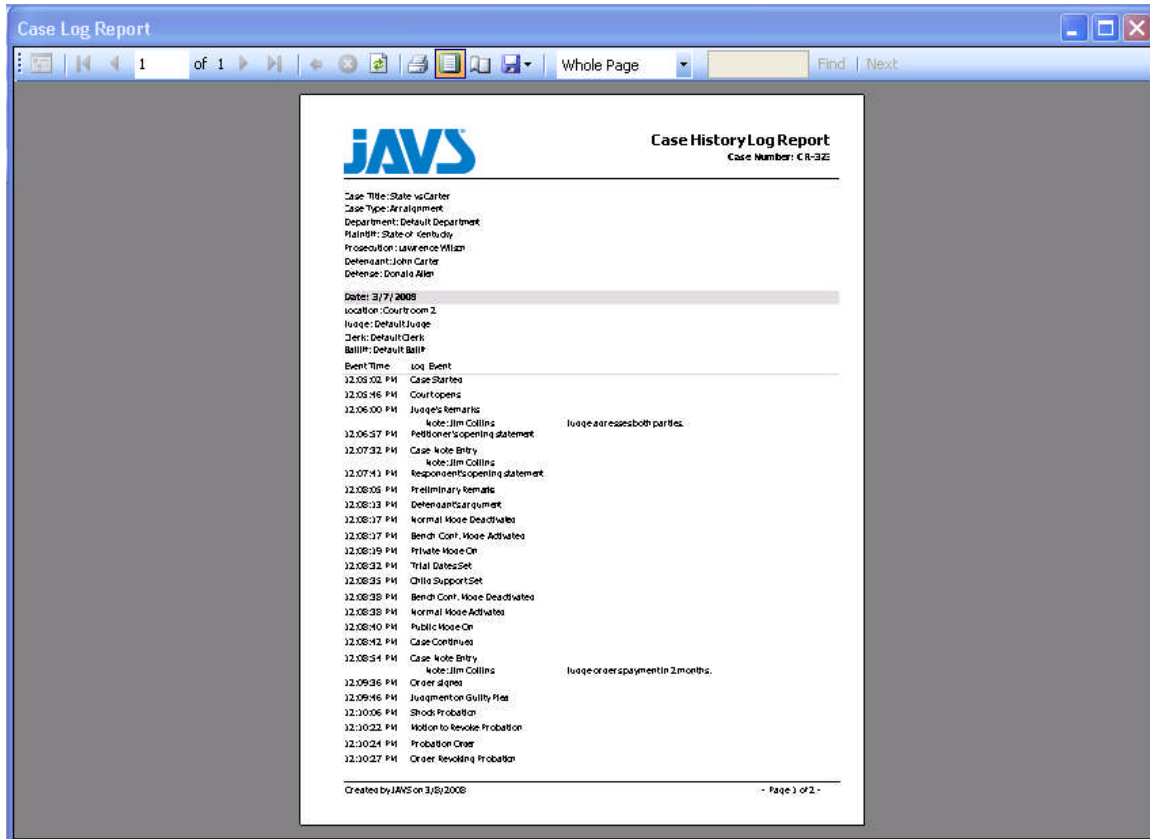

3. The **Case Log Report** window will open for the current case.
4. For options to Include Private Events, Notes and Private Notes, see [Printing the Case Log](#) section of this manual for **Case Log Report Filter** selections.

A screenshot of the "Case Log Report" dialog box. It has a blue title bar and a light beige background. The "Case Information" section shows "Case Number: CR-323" and "Case Title: State vs Carter". The "Filter" section has three checkboxes: "Include Private Events", "Include Notes", and "Include Private Notes", all of which are unchecked. The "Sessions" section contains a table with two columns: "Location" and "Date". The first row of the table is highlighted in blue and contains the values "Courtroom 2" and "03/07/2008". At the bottom right are "OK" and "Cancel" buttons.

Location	Date
Courtroom 2	03/07/2008

6. Press the **OK** button and the Case Log Report print preview will open.

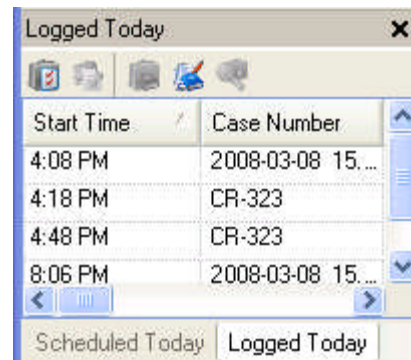

7. Press the Print button to print the Case Log. 

Print All Today's Case Logs

The **Print All Today's Case Logs** command allows the user to print a hard copy of all the cases that are in the Logged Today view.

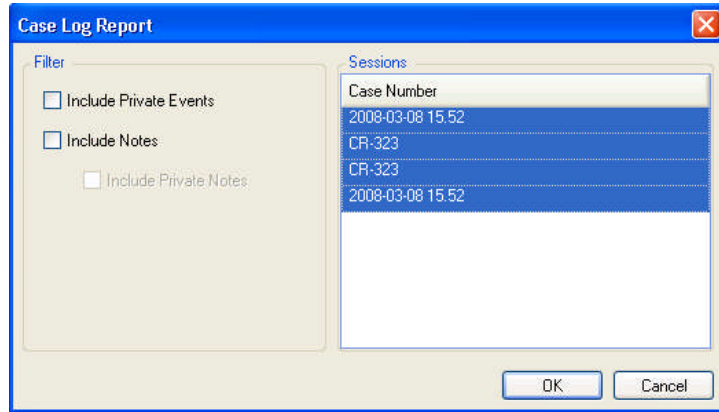

To print all today's case logs:

1. In the Cases View, select the **Logged Today** tab. A list of all the cases logged for the current day will be displayed. (If no cases have been logged today there will be no list in the Logged Today view).

Select the menu item **Case>Print All Today's Logs**; the **Case Log Report** window will open.

- For options to Include Private Events, Notes and Private Notes, see [Printing the Case Log](#) section of this manual for **Case Log Report** Filter selections.
- Select all or particular cases you wish to print. Press the **OK** button and a **Preview** window will open.

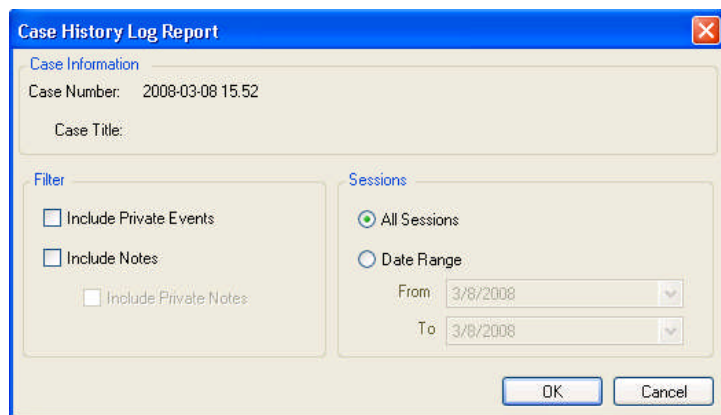

- Since there are multiple cases to be printed in this example, the **Preview** window will show each case on an individual page.
- Press the **Print** button in the **Preview** window to complete the printing process. 

Print Case History

The **Print Case History** command will allow the user to print an entire history of the current case in session. As with all print commands, the user can choose to print public and private events and case notes.

To print a case history:

- Start or Prepare a case as outlined in the [New Case](#) section of this manual.
- Select the menu item **Case>Print Case History** and the **Case History Log Report** window will open.

- For options to Include Private Events, Notes and Private Notes, see [Printing the Case Log](#) section of this manual for **Case Log Report** Filter selections.

- In the **Sessions** section you can choose either: 1) **All Sessions** and the print will include every date that the case was in session; or, 2) **Date Range** and a choice of dates will be available for printing; select the date(s) for printing.

Sessions

☐ All Sessions

☒ Date Range

From: 3/8/2008

To: 3/8/2008

- Press the **OK** button and a **Preview** window will open.
- Press the **Print** button in the **Preview** window to complete the printing process. 

Printing from Case Properties

Printing the current Case Log or the current Case History can also be printed from the Case Properties window.

To print a case log from case properties:

- Start or Prepare a case as outlined in the [New Case](#) section of this manual.
- Select the menu item **Case>Case Properties**, or select the **Case Properties** button.

- The **Case Properties** window for the current case will open.

Case Properties

Case Information Case History

Case Number: CR2-A Case Type: Civil Motion

Case Title: Carter vs Black Department: Department2

Scheduled Date(s): 2/27/2008; 2/29/2008; 3/4/2008; 3/7/2008

Plaintiff: Carter, John Edit

Prosecution: Allen, Donald Edit

Defendant: Black, John Edit

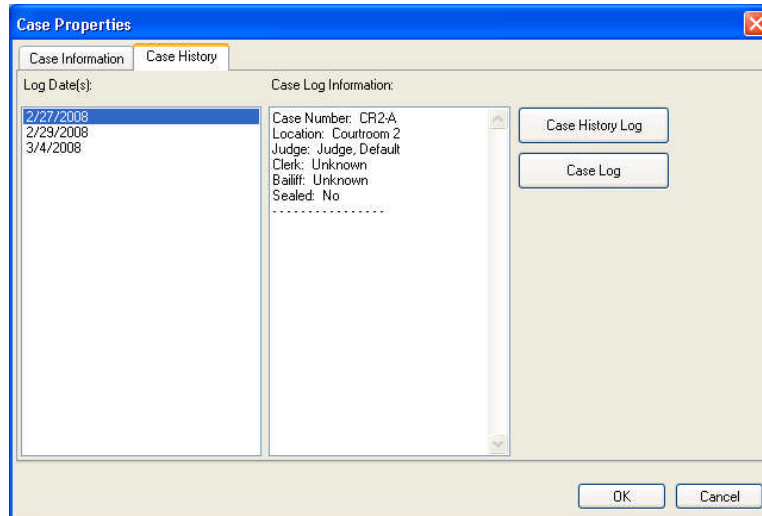

Defense: Law, Sally Edit

Witness: Edit

Exhibit: Edit

OK Cancel

4. Select the **Case History** tab and dates associated with the current case will show in the Log Date(s) column.
5. Select one of the dates in the list, and the **Case Log Information** column will show the number of times the case was started and stopped for a given date.

6. You can choose to print any one of the dates by selecting a date and pressing the **Case Log** button.
7. Selecting the **Case History Log** button will print individual case logs for all dates the case has been in session.

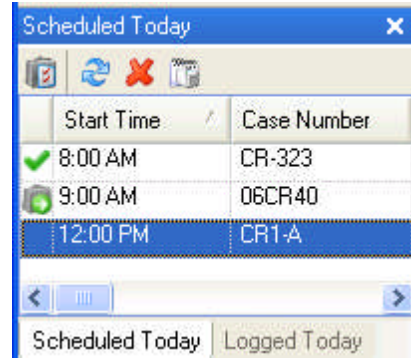

8. The **Case Log Report** window will open. See [Printing the Case Log](#) section of this manual for **Case Log Report** Filter and printer selections.

Print Today's Schedule

AutoLog gives the user the ability to print a hard copy of the day's schedule.

To print today's schedule:

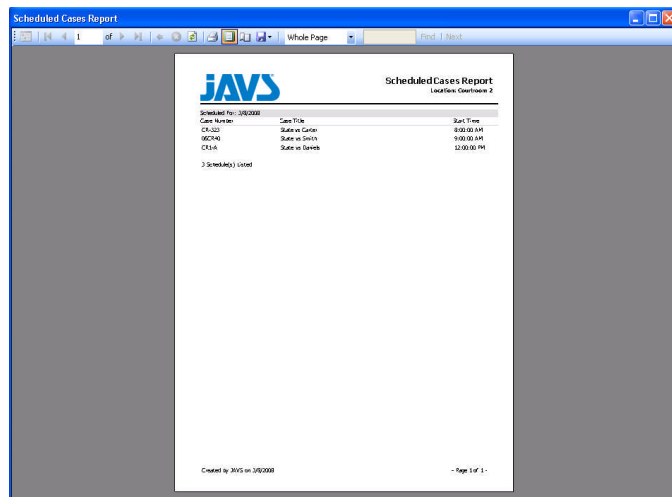

1. Ensure that there are cases scheduled in the **Scheduled Today** view. See the JAVS CaseScheduler manual for information on how to schedule a case or see the [Add to Today's Schedule](#) section of this manual.

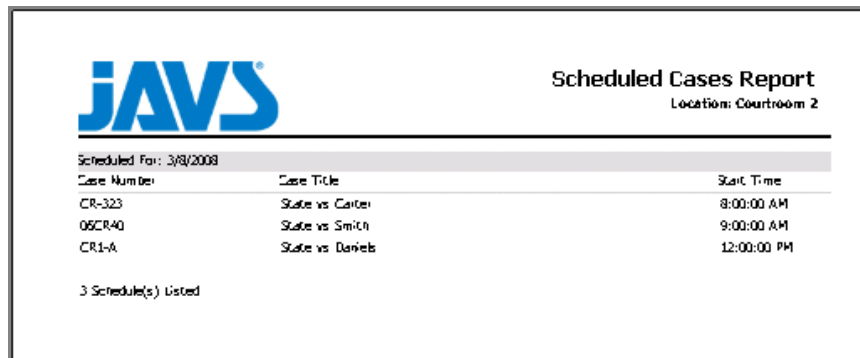

2. Press the **Print Today's Schedule** button and the **Scheduled Cases Report** will open.

3. Press the **Print** button in the **Preview** window to complete the printing process.

4. A hard copy will be printed of today's scheduled cases with the title of the case and the scheduled time.

Printing Witness and Exhibit Lists

If a case has witnesses and exhibits associated with it, a list of either or both can be printed to hard copy. The witness and exhibit lists can be accessed through Case Properties, and can be a case that has already been logged or a case that is currently in session.

To print a witness list:

1. Use the [Find Case](#) function to locate a case that contains witnesses and exhibits and add to today's schedule, or start a [New Case](#) and add [Witnesses and Exhibits](#).
2. Start or Prepare the case.
3. Press the **Case Properties** button or select the menu item **Case>Case Properties**.
4. The **Case Properties** window will open with the available witnesses and exhibits associated with the case.

5. Select the **Edit** button to the right of the **Witness** field and the **Edit Witnesses** window will open. Press the **Print Witnesses** button and the **Witness List Report** dialog window will open.
6. Press the **Print** button in the **Preview** window.
7. A hard copy of the available witnesses for the case will be printed.

To print an exhibit list:

1. Use the [Find Case](#) function to locate a case that contains witnesses and exhibits and add to today's schedule, or start a [New Case](#) and add [Witnesses and Exhibits](#).
2. Start or Prepare the case.
3. Press the **Case Properties** button or select the menu item **Case>Case Properties**.

4. The **Case Properties** window will open with the available witnesses and exhibits associated with the case.

5. Select the **Edit** button to the right of the **Exhibits** field and the **Exhibits** window will open. Press the **Print Exhibits** button and an **Exhibit List Report** window will open.

6. Press the **Print** button in the **Preview** window.
7. A hard copy of the available exhibits for the case will be printed.

Publishing

The **Publishing** function of AutoLog allows the user to publish cases to CD, DVD or a Network Share folder. The published cases will consist of the audio/video media and CVL files, which when launched, will open JAVS CaseViewer. You can view the case with the options chosen for public and private information and the case log.

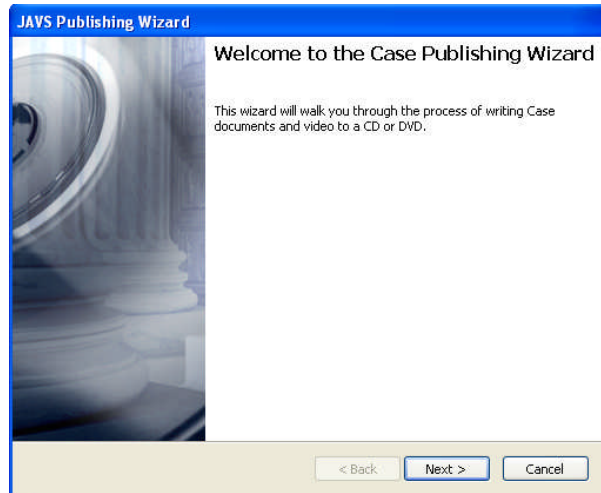

Publish Current Case

Publishing can be performed on a current case basis or on a logged case basis. AutoLog also allows publishing of the current day's cases or any other day's cases.

To publish a current case:

1. Start or Prepare a case as outlined in the [New Case](#) section of this manual.

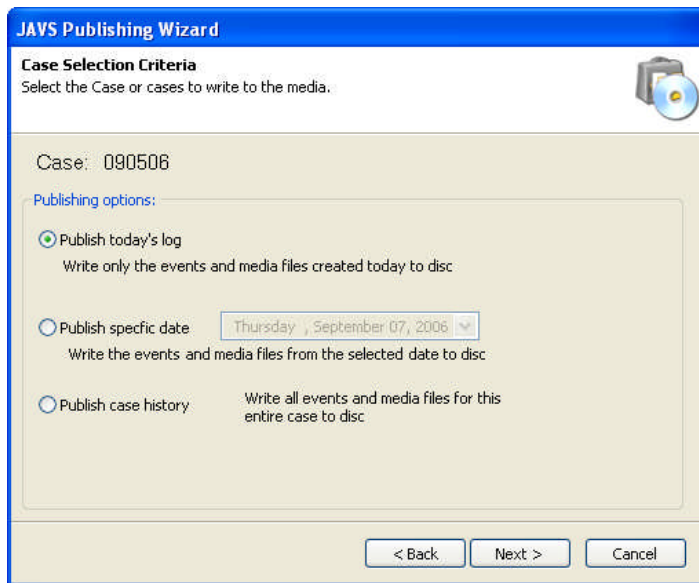

2. Select the menu item **Case>Publish Current Case** and the **JAVS Publishing Wizard** main screen will open.

3. Select **Next** and the **Case Selection Criteria** screen will appear.

You can choose to publish only the current case, a specific date for that case, or the entire case history for that case.

NOTE: A case history means that a case has been logged more than once on different dates and times.

4. Press the **Next** button when the Case Selection Criteria has been chosen.

- The **Select Files** screen will appear, which will allow you to select what documents will be included with the published case.

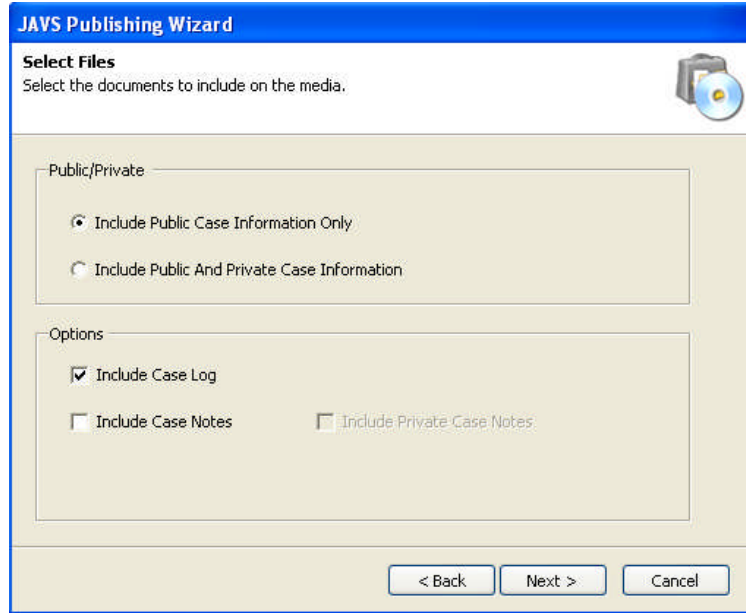

Public/Private

Include Public Case Information Only will publish the media (audio and video) that is marked as public.

Include Public And Private Case Information will publish all the media associated with the case.

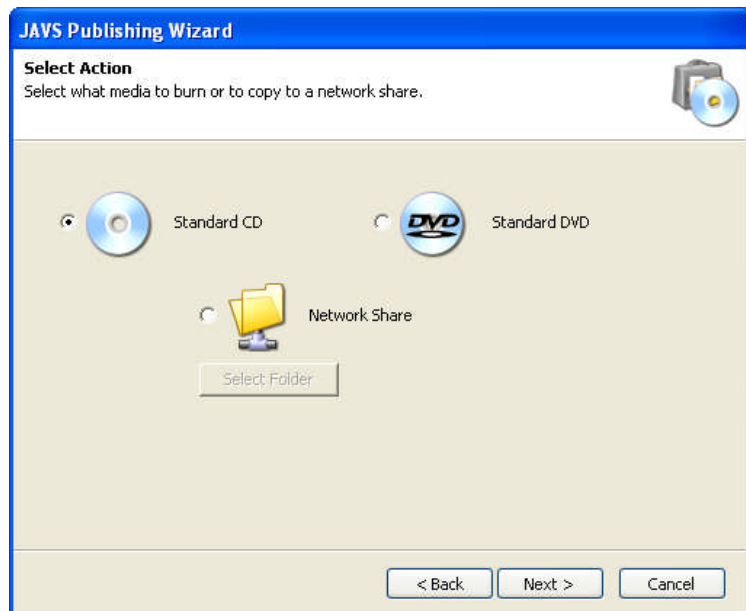

Options

Here you can choose to include the case log, and public and/or private notes in the case log.

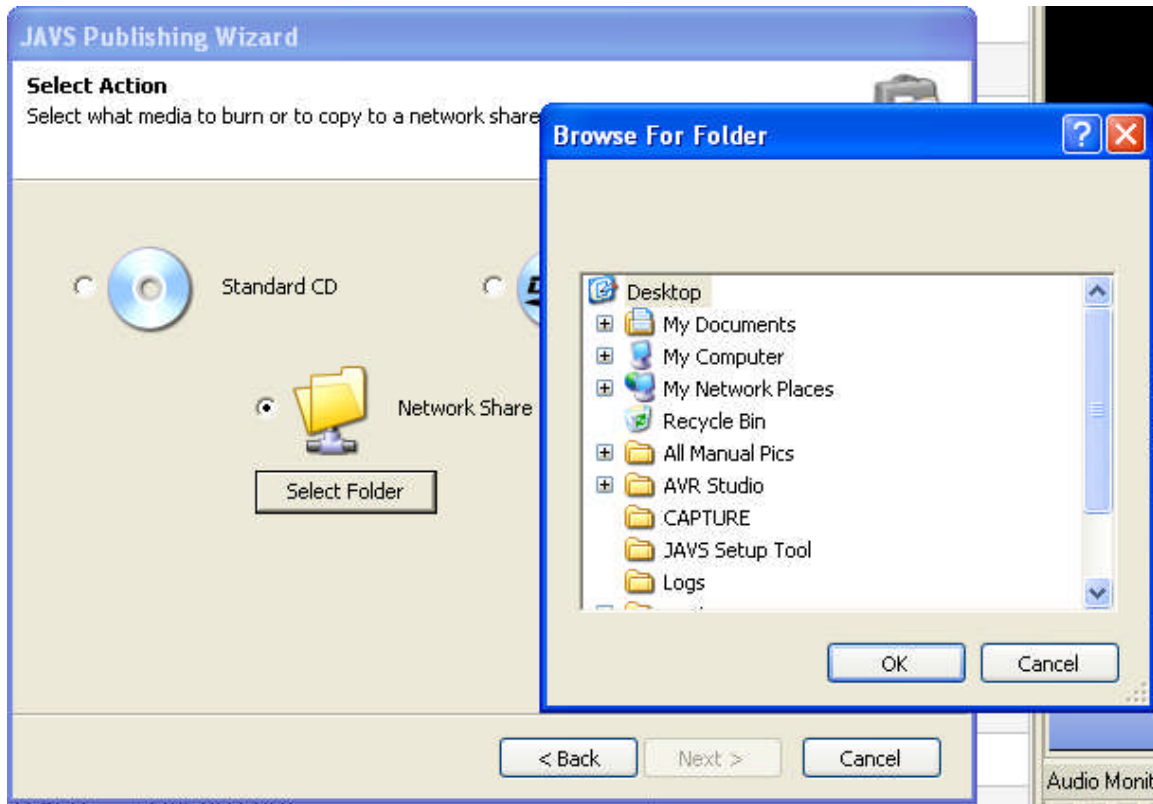

- Press **Next** and the **Select Action** screen will appear.

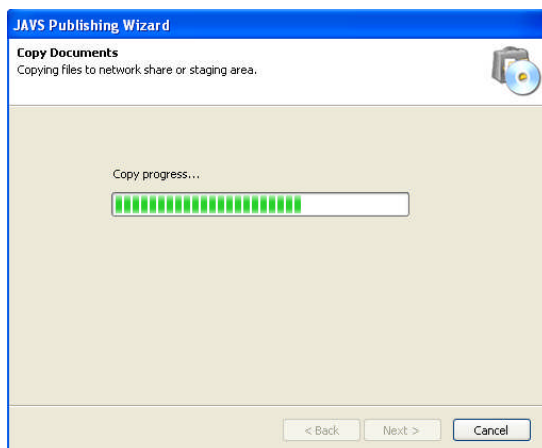

You can choose to publish to **CD**, **DVD** or to a **Network Share** folder.

If **Network Share** is selected, press the **Select Folder** button and you will be prompted to select a folder for the media to be copied to.

- After selecting the media type or folder, press the **Next** button and the copy and burn process will begin. There will be a status bar to inform you of the progress. When the process is finished, the **Completed** screen will appear. Press the **Finish** button and your files are ready to view in JAVS CaseViewer.

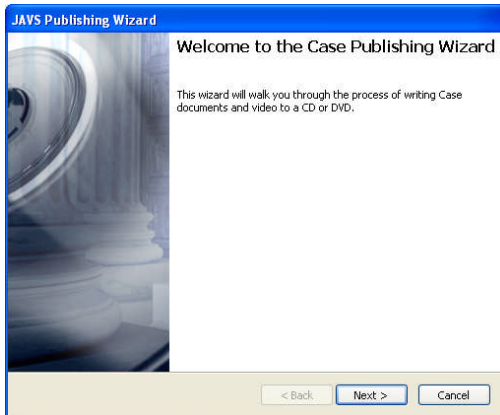

For more information about viewing cases, see the JAVS CaseViewer user manual.

Publish an Entire Day's Cases

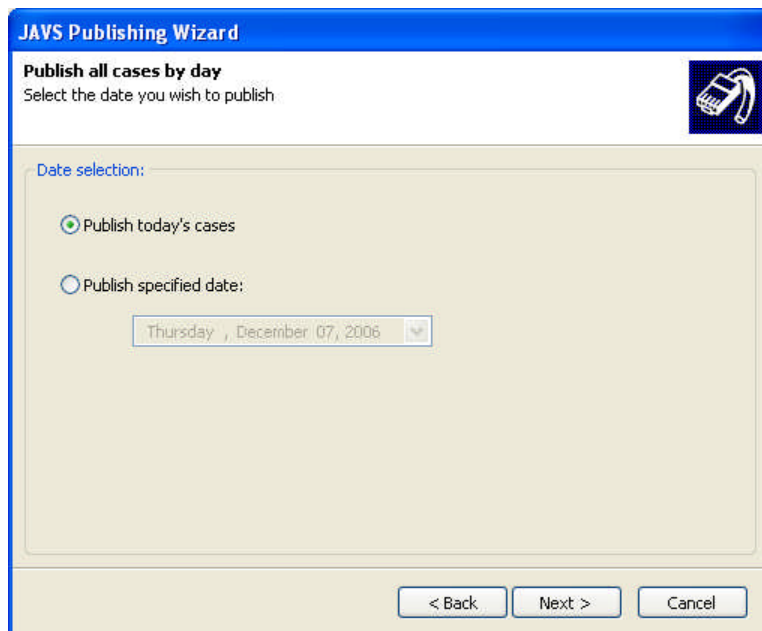

AutoLog gives you the ability to publish any day's case logs. The case logs can be published to CD, DVD or a Network Share folder. The published cases will consist of the audio/video media and CVL files for each case, which when launched, will open JAVS CaseViewer. You can view the case with the options chosen for public and private information and the case log.

To publish an entire day's cases:

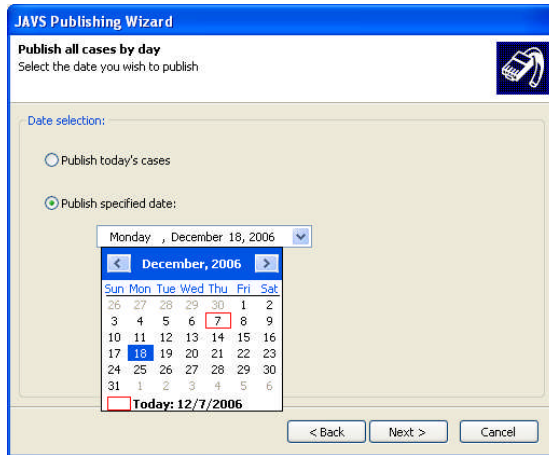

1. Select the menu item **Case>Publish an Entire Day's Cases** and the JAVS Publishing Wizard screen will open. Press the **Next** button.

2. The next screen offers the choice to **Publish today's cases** or **Publish specified date**. Selecting **Publish today's cases** will publish all cases in the Logged Today view.

3. Select **Publish specified date** and the calendar pull down will become active. Select the date you wish to publish and that date will be present in the pull down window. Press the **Next** button.

<input checked="" type="checkbox"/> VR-765	State vs Downs	Criminal Court

< Back Next > Cancel

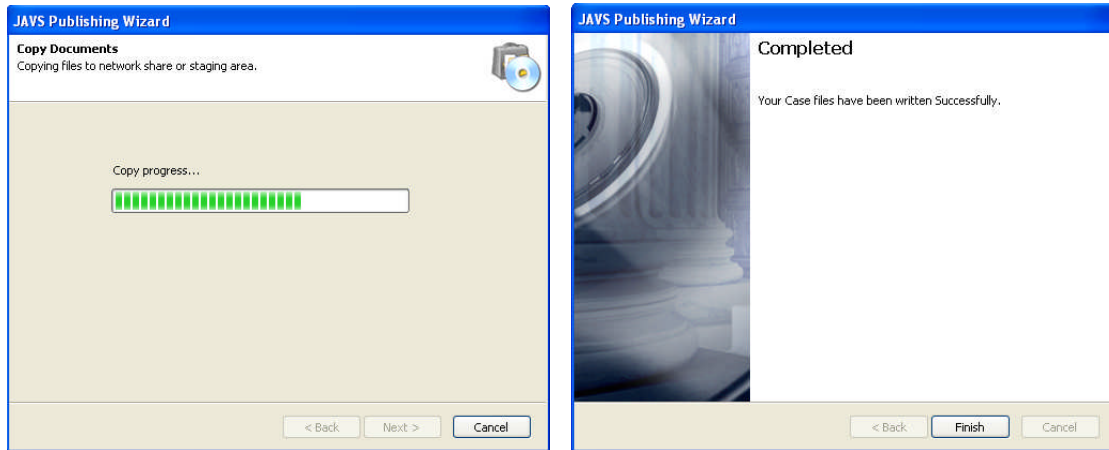

6. Make selections as necessary and press the **Next** button. The **Select Action** screen will appear and you select the type of media to publish to--**CD**, **DVD** or **Network Share** folder.

7. If **Network Share** is selected, press the **Select Folder** button and you will be prompted to select a folder for the media to be copied to.

- After selecting the media type or folder, press the **Next** button and the copy and burn process will begin. There will be a status bar to inform you of the progress. When the process is finished, the **Completed** screen will appear. Press the **Finish** button and your files are ready to view.

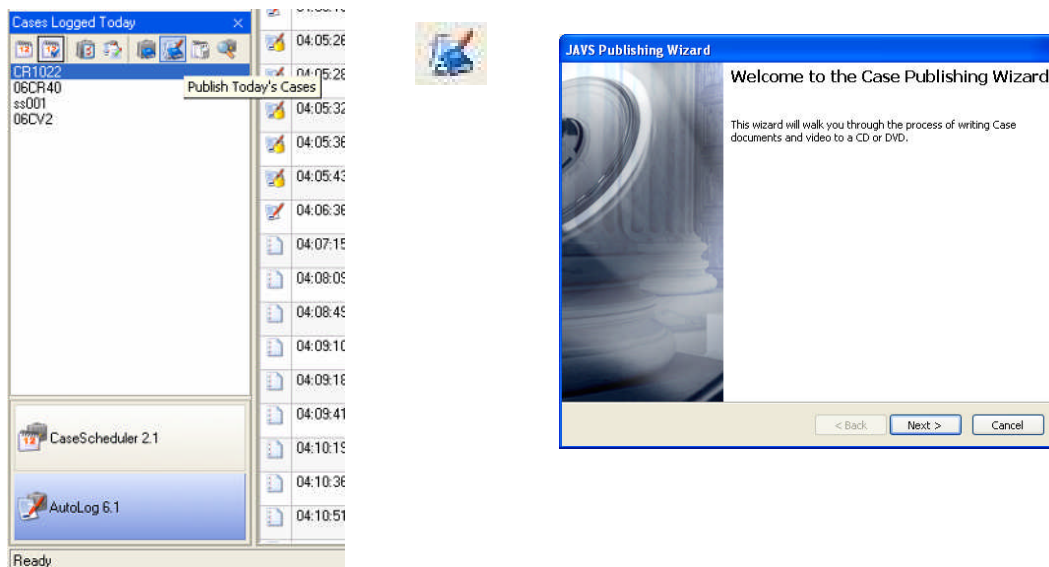

Publish Today's Cases

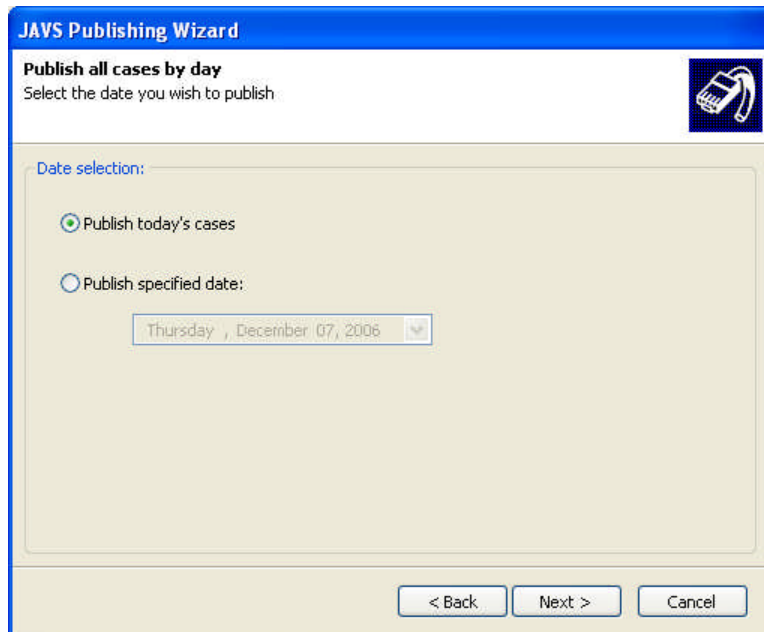

The **Publish Today's Cases** command works the same as Publish an Entire Day's Cases, with the exception of how it is initiated. The **Publish Today's Cases** command resides in the Logged Today view and allows the user to conveniently publish the current day's cases at the end of a court day.

To publish today's cases:

- In the **Logged Today** view, press the **Publish Today's Cases** button and the **JAVS Publishing Wizard** screen will open. Press the **Next** button.

2. Select the **Publish today's cases** in the Date Selection choices and press the **Next** button.

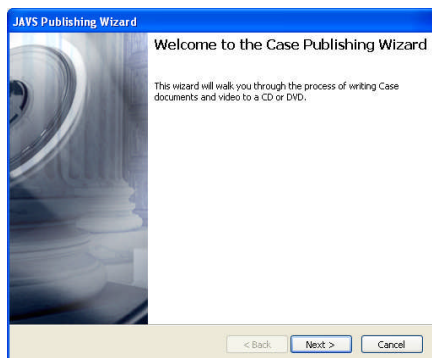

3. Follow the steps outlined in the [Publish an Entire Day's Cases](#) section, step 4 of this manual.

Publish Selected Case

The **Publish Selected Case** allows the user to publish a single case from the Logged Today view. If the case has a history, the user can publish individual days the case was in session, the current day or the entire case history.

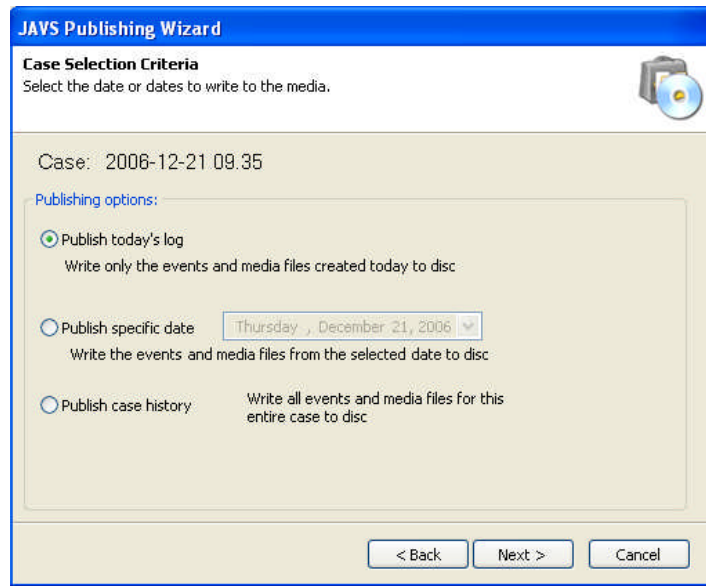

To publish a selected case:

1. In the **Logged Today** view, select a case to publish and press the **Publish Selected Case** button. The **JAVS Publishing Wizard** screen will open.

2. Press the **Next** button and the **Case Selection Criteria** for the selected case will open.

3. In **Publishing Options**, you can choose to publish only the current case, a specific date for that case, or the entire case history for that case.
4. Press next and follow the steps outlined in the [Publish an Entire Day's Cases](#) section, step 4 of this manual.

HTML Log

During Publishing, the case log is also integrated to an HTML browser for those users that are not at an AutoLog station and need to view or print a case log or view a case.

To view an HTML case log:

1. Locate the folder or DVD or CD media that the files were published to.
2. Press the Folders button to see a file tree to the left of the screen and open the tree to see the files you wish to view. The files in the **published folder** will be structured by case number, year, month and day.

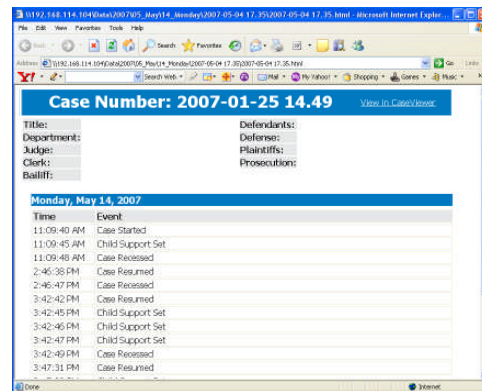

- Each case will have an associated CVL and HTML file. These files will contain the case log for each case with multiple logs for given days the case was in session.

2008-02-27 09.38-1.html	7 KB	HTML Document
2008-02-27 09.38-1.cvl	5 KB	CaseViewer3.exe
2008-02-27 09.38.html	5 KB	HTML Document
2008-02-27 09.38.cvl	3 KB	CaseViewer3.exe
2008-02-27 09.31.html	18 KB	HTML Document
2008-02-27 09.31.cvl	14 KB	CaseViewer3.exe

- Locate the day folder of the case to view the log file. Selecting the Individual day folder will show the files that are only related to that particular day. This folder will contain the CVL file for JAVS CaseViewer, the media files that were recorded during the court proceedings and the individual HTML log file.

- Double click the HTML file and the case log for that case will open in an internet browser window.

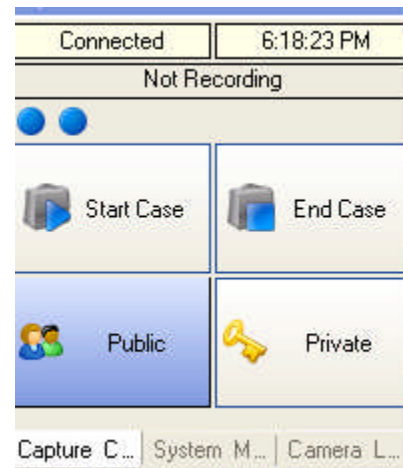

Capture Controls

In the Capture Controls window, AutoLog monitors connectivity status and also provides handy buttons for starting, recessing, resuming, and ending cases, as well as entering public and private recording modes.

Net Status: This display shows whether or not AutoLog is connected to the PDR (Primary Digital Recorder) via a network connection. If the status reads “Not Connected,” a connectivity problem may exist.

Recording/Not Recording: Shows the status of the current case and whether AutoLog is recording or not recording...

Current Time: Shows the current time of AutoLog’s event manager and is the time used to time stamp each event.

Device Indicators: The two round icons show how many recorders are connected and the record status of each recorder. Blue shows connected and not recording, Red shows connected and recording and yellow indicates there is a problem with the recording service. If a connection problem exists the icons will be grey.

Control Buttons: These controls enable quick access to the Start Case, Recess Case, Resume Case, and End Case functions. The Public and Private buttons enable you to override the public/private system mode settings (i.e., a bench conference mode marked as private can be countermanded here by an operator with user rights). All buttons, when pressed, create a time stamped log event.

- **Start Case:** Use this button to start a case when a case has been prepared using the Prepare to Start Case function. This button will change to Recess Case when initiated.
- **Recess Case:** Once a case is started, the Start button becomes the Recess button. Use this button to pause a case for break (e.g., lunch).
- **Resume Case:** Once the Recess button is pressed, the Recess Case button becomes the Resume button. Use this button to resume a case that has been recessed.
- **End Case:** Use this button to end a case and unload it from AutoLog. Once a case is ended, it will appear in the Logged Today list.
- **Public/Private:** Use these buttons to manually put AutoLog into a public or private state.

View Tabs: Shows the Capture Controls (Precision, CTVI and CT-4), System Modes (Precision, CTVI and CT-4) and Camera Locks (CT-4 systems only).

Playback Controls

This function is only available for the CT-4 system.

AutpLog 6.3 provides a playback control panel used for Instant review as well as provides normal playback functions for the VCR for videotape presentations.

The Instant Review function is used in two separate applications: Control Center systems and non-Control Center systems.

Instant Review

In a **non-Control Center** system, a playback VCR is used as a recorder during normal proceedings. The **Review** button will set the system into an **Instant Review** mode by stopping the playback VCR from recording and rewinding 30 seconds, and then goes into play. The Video Out from the VCR is also routed to the courtroom monitor. You can use the playback functions on the panel to control the VCR or you can continue to press the **Review** button to rewind back 30 seconds each time you press it. After each 30 seconds are achieved the VCR will go into play. Pressing the **Return** button will advance the VCR to the point in which it came out of record when **Instant Review** was initiated, and the system will put the VCR back into record.

In a **Control Center** system, the instant review function will control a digital recorder that takes the place of the VCR. Pressing the **Review** button will place Control Center in an **Instant Review** mode. The **Stop** and **Pause** buttons will place the Control Center Instant Review into the pause mode and the **Play** button will initiate a play command.

Pressing **Fast Forward** and **Rewind** will advance or back up the Control Center Instant Review playback. Press the **Return** button to set the system back into a normal recording mode.

Playback

The Playback control panel will also be used for playback of any VHS tape inserted into the playback VCR. This playback can be on or off *the court record* by pressing the **Playback Mode** button located in the Modes panel.

To initiate playback mode:

1. While the system is in normal recording operation, press the **Stop** button on the **Playback Control** panel. The playback VCR will stop.
2. Press any of the VCR playback buttons to control the VCR.
3. To place the playback on *the court record*, press the **Playback Mode** button (see [Mode Activation](#)) and the VHS playback will be recorded.
4. To return the VCR to the record mode, use the VCR controls to place the VHS tape where you want to go into record and press the **Record** button.

NOTE: For Control Center systems, the Show Monitor button on the Control Center screen must be selected to route the playback to the courtroom monitor.

System Settings

Public/Private System Modes

AutoLog's audio/video capabilities are customizable, allowing your JAVS technician to configure a wide variety of System Modes.

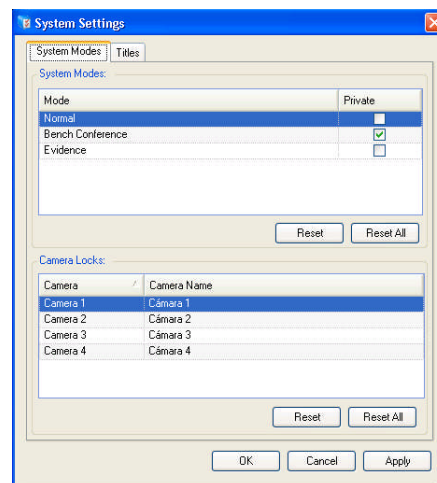

Some examples: A bench conference mode can be created to mark and record statements between attorneys and the judge as private, strictly limiting reception to the bench; a mode for video conference can be set up for a remotely-stationed A/V system to conduct special hearings; or, perhaps a mode in the courtroom specifically dedicated for recording evidence and/or presentations.

Once System Modes are set up, the System Settings utility allows the user to control if these modes are public or private.

NOTE: CT-4A System Modes are preset. Precision, Precision Plus, and CT-Vi System Modes are customizable.

To make a System Mode public or private:

1. Select **Tools>System Settings**; the **System Settings** window opens.
2. Check the appropriate box in the **Private** column to make it private, or un-check it to make it public.
3. Press **OK**. The new System Mode privacy settings are now active.

NOTE: You can also switch the current case log between public and private modes by selecting menu item **Case>Public Mode** or **Case>Private Mode**.

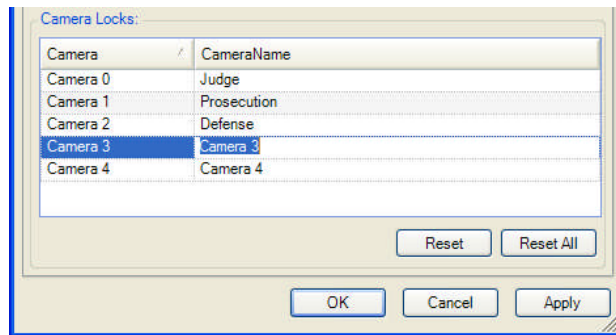

Camera Settings

This function is only available for the CT-4A system.

This function allows you to customize your camera names. You can return the settings to their default mode by selecting and clicking the Reset button, or click the Reset All button to change all attributes back to their default label.

To assign names/titles to cameras:

1. Select **Tools>System Settings**; the **System Settings** window opens.
2. In the **System Modes** tab, select a camera in the Camera Name field under **Camera Locks**.
3. Enter a new title for the desired camera.
4. Click **OK**. New camera name is now assigned.

NOTE: These camera names are reflected in the AutoLog interface for the user's benefit in controlling the A/V and switching modes; they do not change in the on-screen display.

On-Screen Display/Microphone Titles

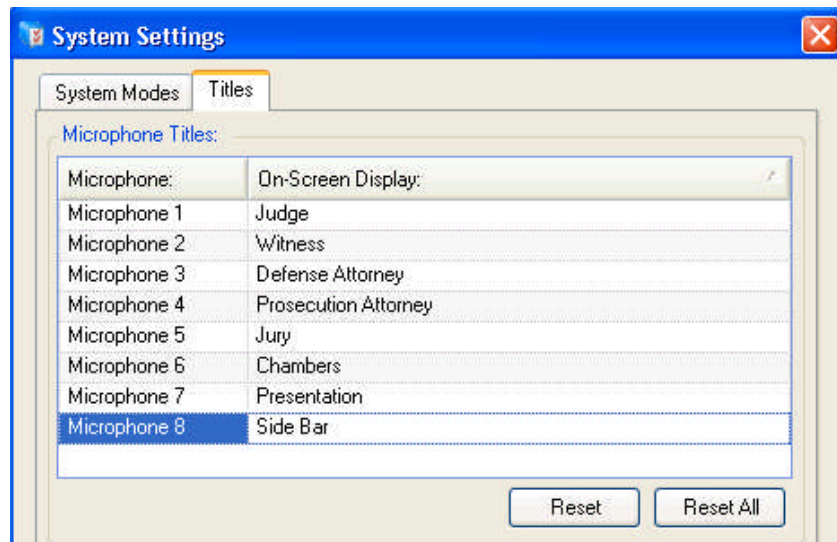

This function is only available for the Precision, Precision Plus, and CT-Vi systems.

In **Tools>System Settings**, the **Titles** tab brings up the On-Screen Display settings: Microphone Titles and System Titles.

AutoLog's On-Screen display shows the assigned title for each person's active microphone whenever they are speaking.

To configure the On-Screen Display microphone settings:

1. Select **Tools>System Settings**; the **System Settings** window opens.
2. Select the **Titles** tab.
3. Select the applicable text field in the On-Screen Display list under Microphone Titles and replace AutoLog's default microphone titles with your own.
4. Press **OK**. Microphones have now been renamed in the On-Screen Display.

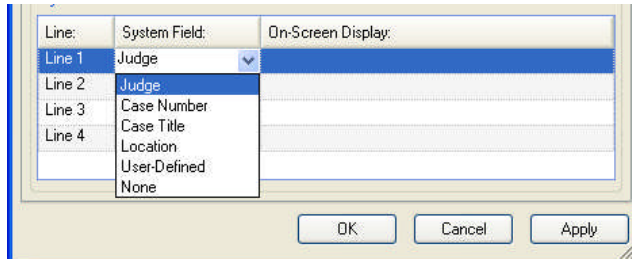

Additionally, up to four courtroom System Titles are available in the System Field, which allow you to further customize the on-screen display. The available selections are:

- **Judge:** Displays the current judge's name on-screen in the line indicated.
- **Case Number:** Displays the current case number in the indicated line.
- **Case Title:** Displays the current case title in the indicated line.
- **Location:** Displays the courtroom name in the indicated line.
- **User-Defined:** Allows user to type their own text for on-screen display in the indicated line.
- **None:** No text displayed.

To select one of the six choices, click in the **System Field** column to activate a drop-down menu of choices.

To configure the On-Screen Display System Titles settings:

1. Select **Tools>System Settings**; the **System Settings** window opens.
2. Select the **Titles** tab.
4. Select the applicable text field in the On-Screen Display list under System Titles and replace AutoLog's default titles with your own.
5. Press **OK**. The On-Screen System Titles have now been renamed.

NOTE: Your system technician controls where these lines will be positioned in your on-screen display.

Utilities

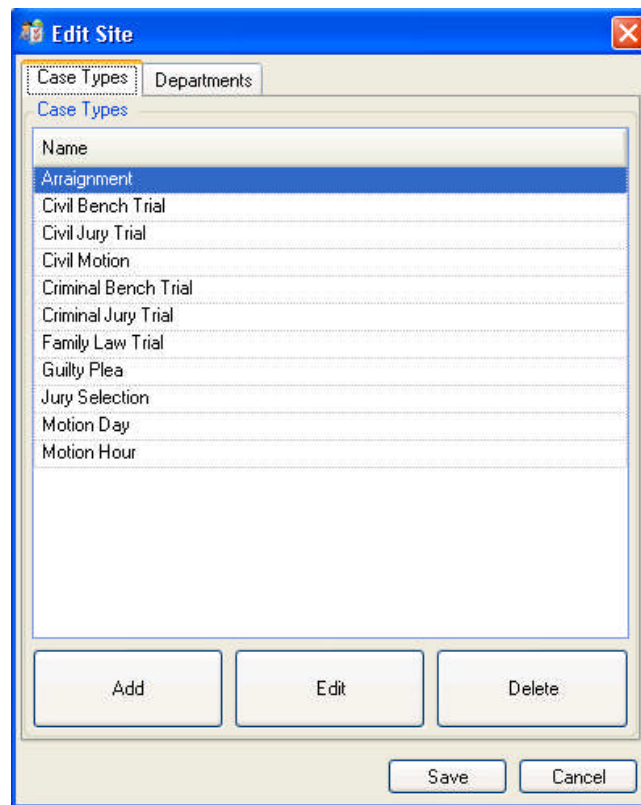

JAVS AutoLog provides many utilities to allow the user to configure and customize the way they do their job. Each utility discussed in this section may or may not be available to some users due to the individual rights assignments made by your court administrator or IT department. This section will assume that the user has all user rights.

Edit User and Edit Site Utilities

The **Edit Users** and **Edit Site** commands are utility tools used to add and edit users, assign passwords and apply user types and user templates to users. (These utilities require the Edit Users And Staff user right to be able to use the utility. Your Administrator can provide you with specific rights).

To launch the **Edit Site** utility:

1. Select **Tools>Edit Site** and the Edit Site window will open. The **Edit Site** window allows the user to add, edit or delete **Case Types** and **Departments**. JAVS provides a default list of Case Types to choose from, and a Default department.

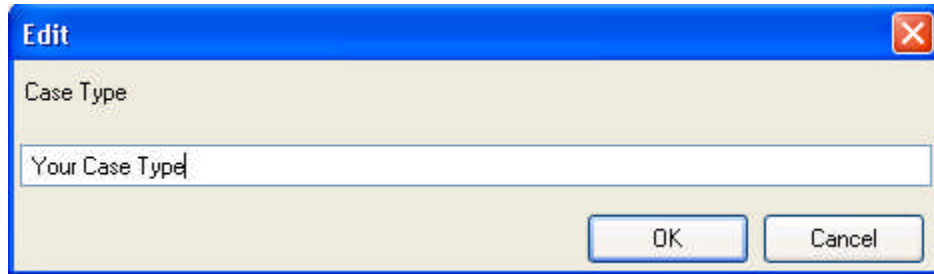

The **Add**, **Edit** and **Delete** buttons will be active for both Case Types and Department tabs. The **Edit** button will only allow the user to change the name of the Case Type or Department.

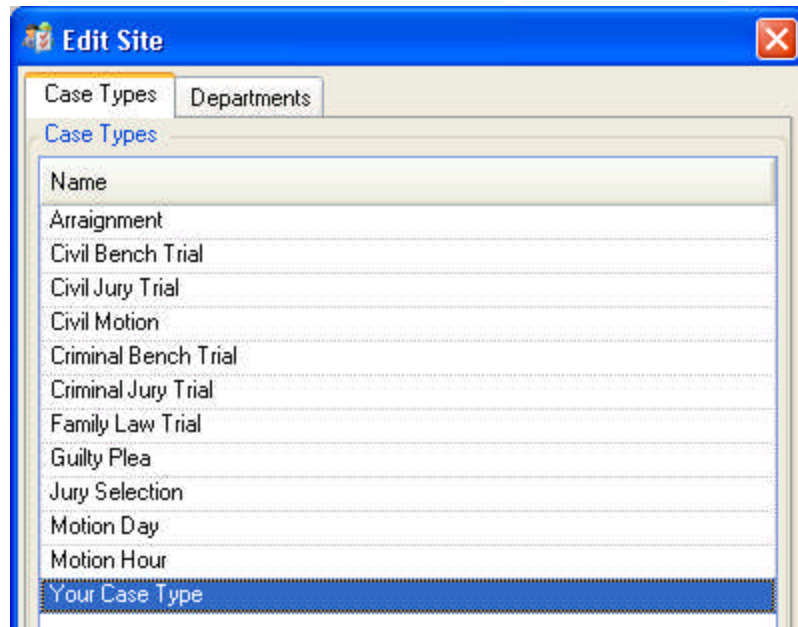

NOTE: You **must** press the **Save** button to retain your additions or changes.

To add a case type:

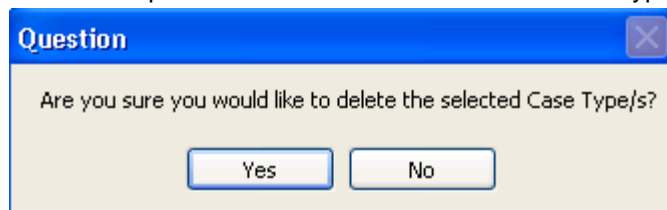

1. Press the **Add** button and the Case Type **Edit** window will open. Type in the new case type and press the **OK** button.

A dialog box titled "Edit" with a close button (X) in the top right corner. It contains a text field labeled "Case Type" with the placeholder text "Your Case Type". At the bottom right, there are two buttons: "OK" and "Cancel".

2. The new case type will appear in the **Case Types** list and will be available in the Case type pull-down in the New Case dialog.

A dialog box titled "Edit Site" with a close button (X) in the top right corner. It has two tabs: "Case Types" (selected) and "Departments". Under the "Case Types" tab, there is a list box labeled "Case Types" with a "Name" header. The list contains the following items: Arraignment, Civil Bench Trial, Civil Jury Trial, Civil Motion, Criminal Bench Trial, Criminal Jury Trial, Family Law Trial, Guilty Plea, Jury Selection, Motion Day, Motion Hour, and "Your Case Type" (which is highlighted in blue).**To delete a case type:**

1. Select the Case Type to be deleted and press the **Delete** button. A delete Case Type confirmation window will appear.
2. Press **Yes** to delete and **No** to cancel.

A dialog box titled "Question" with a close button (X) in the top right corner. It contains the text "Are you sure you would like to delete the selected Case Type/s?". At the bottom, there are two buttons: "Yes" and "No".

To add a department:

1. Select the **Department** tab in the Edit Site window.

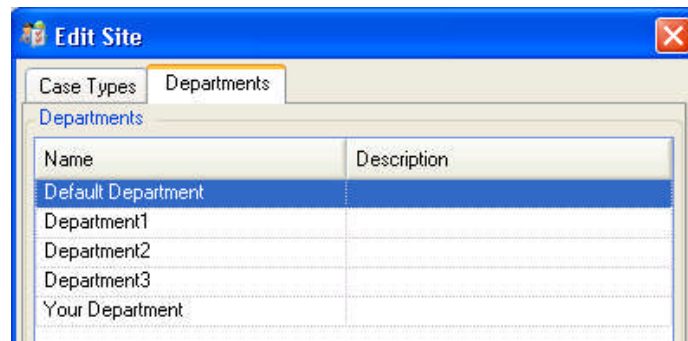

2. Press the **Add** button and a Department **Edit** window will open.

3. Type in the new department and press **OK**.

4. The new department will appear in the **Departments** list and will be available in the Department pull-down in the New Case dialog.

**To delete a department:**

1. Select a department and press the **Delete** button and a **Delete Department** confirmation window will appear.

2. Select **Yes** to delete and **No** to cancel.
3. Press the **Save** button to save all of your changes and close the **Edit Site** window.

Note: You cannot delete a department if it has been part of a logged case.

To launch the Edit Users utility:

1. Select **Tools>Edit Users** and the **Edit Users** window will open. The Edit Users window will allow the user to create new users and assign passwords, User Classes and Templates. User's information can be edited and security assignments changed. The window consists of two tabs, **General** tab and the **Security** tab.

The screenshot shows the 'Edit Users' window with a list of users on the left and a form for editing user information on the right. The 'General' tab is selected.

Add New User

Save Cancel

To add a new user:

1. Press the **Add New User** button and the **New User Wizard** window will open, Type in the new ID, personal information and password then press the **Next** button. (If a user already exists, a Duplicate Name notice will appear. Select a new ID until successful).

The 'New User Wizard' window contains the following fields:

- User ID: [Text Box]
- First Name: [Text Box]
- Last Name: [Text Box]
- Prefix: [Text Box]
- Suffix: [Text Box]
- Address: [Text Box]
- City: [Text Box]
- State: [Text Box]
- Zip Code: [Text Box]
- Phone 1: [Text Box]
- Phone 2: [Text Box]
- Email: [Text Box]
- Password: [Text Box (masked with asterisks)]
- Reenter Password: [Text Box (masked with asterisks)]

Navigation buttons at the bottom: < Back, Next >, Cancel.

2. The next window (below) of the wizard is for assigning the user class and template for the user. Use the pull-down fields to assign the user. For a user to be able to log in to JAVS AutoLog, they must first be assigned a password, a user class and user template. JAVS has created a default set of User Classes and Templates to assign to new users or re-assign to pre-existing users.

For Example:

If the new user is a judge, he can be assigned a User Class of Judge with a Template of Judge Advanced. This Judge would have JAVS AutoLog and JAVS CaseScheduler advanced user rights. A listing of assigned rights will appear when the **Template** is selected.

The 'New User Wizard' window shows the following configuration:

- User Class: Unknown
- Template: None

Name	Description
None	

Navigation buttons at the bottom: < Back, Next >, Cancel.

The 'New User Wizard' window shows the following configuration:

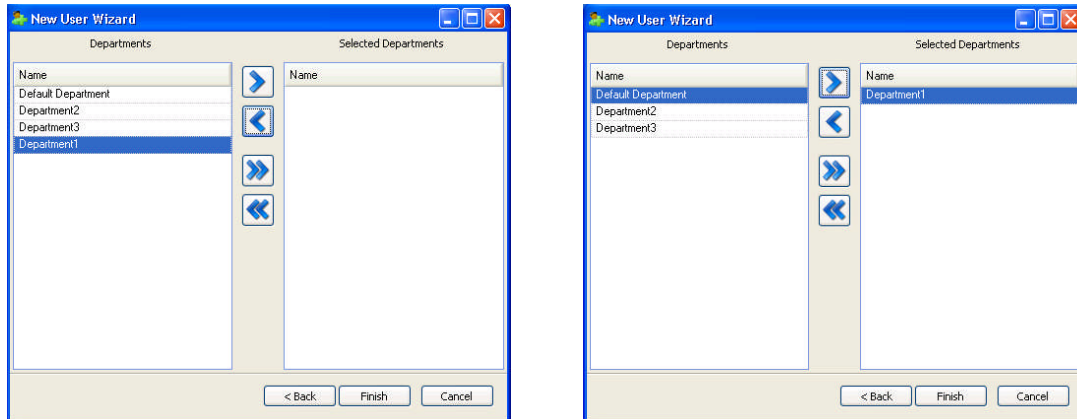

- User Class: Judge
- Template: Judge Advanced

Name	Description
Judge Standard

Navigation buttons at the bottom: < Back, Next >, Cancel.

Templates and User Classes are generally set up by JAVS or your Administrator. Users and Group rights should be available through your Administrator. (See [User Rights](#)).

3. Press the **Finish** button and you will return to the **Edit Users** window. The new user will appear in the user list.
4. If **Department Filtering** is enabled, the **Finish** button will not be available in the second window of the wizard. Pressing the **Next** button will open a department assignment window; this window will contain a list of pre-created departments (either by the user or by your JAVS technician: see [Edit Site](#)) for assigning users.

5. Select a department for assignment from the **Departments** list and press the single right arrow. That department will be added to the **Selected Departments** list and the user will only be able to access case information pertaining to that department.
6. Press the double right arrow to add all departments to the user or ctrl. Click to select multiple departments.
6. Press the **Finish** button and the user will appear in the user list in the **Edit User** window.

NOTE: By default, Department filtering allows administrators to access all departments whether they are assigned a department or not.

Security Tab

Selecting the Security tab will give access to a user's security information and display the user assigned rights and the department(s) the user is assigned to.

In this window you can change a user's password, change department assignment (Department Filtering only) and change or re-assign User Class and Templates.

To change a user's password:

1. Press the **Change Password** button. The Change Password window will open.
2. Change and confirm your password and press **OK**.

A dialog box titled "Change Password" with a close button (X) in the top right corner. It contains three text input fields: "User Name" with the value "fwilson", "Password" with masked characters "XXXXXXXX", and "Confirm Password" with masked characters "XXXXXXXX". At the bottom right are "OK" and "Cancel" buttons.

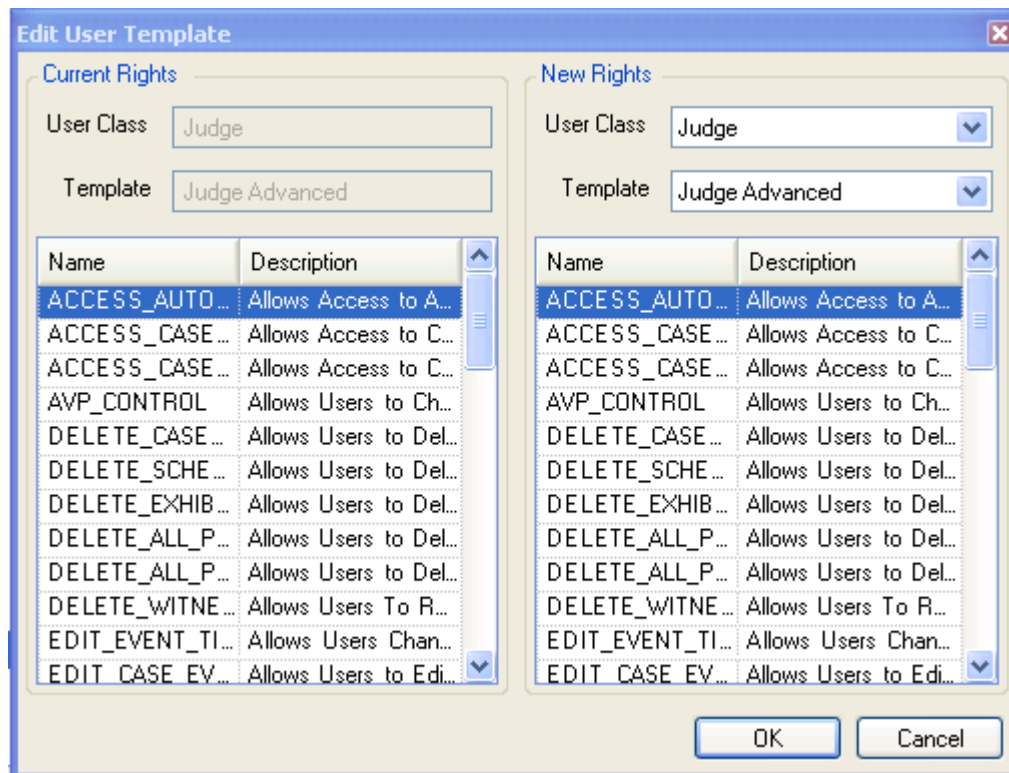

To change User Class and Template:

1. Press the Edit button to the right of the User Class and Template fields.

A form section with two text input fields. The first is labeled "User Class" and contains the text "Judge". The second is labeled "Template" and contains the text "Judge Advanced". To the right of these fields is a vertical button labeled "Edit".

2. The Edit User Template window will open. On the left is the current User Class and Template and on the right is where the new assignment will be displayed.

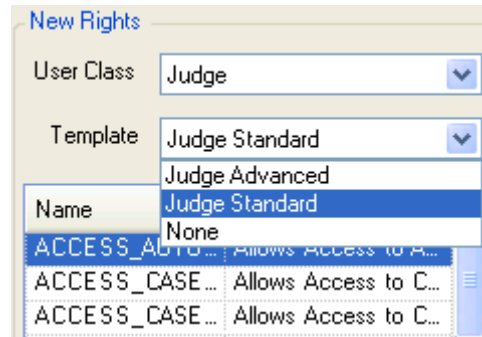

A dialog box titled "Edit User Template" with a close button (X) in the top right corner. It is divided into two main sections: "Current Rights" on the left and "New Rights" on the right. Each section has a "User Class" dropdown menu (both set to "Judge") and a "Template" dropdown menu (both set to "Judge Advanced"). Below each dropdown is a table with two columns: "Name" and "Description".

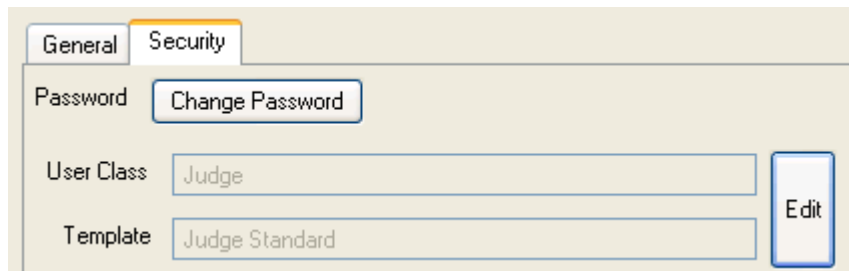

Name	Description

DELETE_ALL_P...	Allows Users to Del...
DELETE_WITNE...	Allows Users To R...
EDIT_EVENT_TI...	Allows Users Chan...
EDIT_CASE_EV...	Allows Users to Edi...

The "New Rights" section contains an identical table. At the bottom right of the dialog are "OK" and "Cancel" buttons.

- Use the User Class and Template pull downs to re-assign the user's rights. The new results will be displayed in the right column.

- Press the **OK** button and the new user rights will appear in the **Security** tab of the **Edit Users** window. A new set of rights will be displayed for the changes.

To assign or re-assign departments: (Department Filtering only)

- Use the right and left arrows to add and remove departments. The **single** arrows will move one department at a time or the **double** arrows will move all the departments. You can also select multiple departments by cntrl. select.
- When all changes have been made, press the **Save** button to retain your changes.

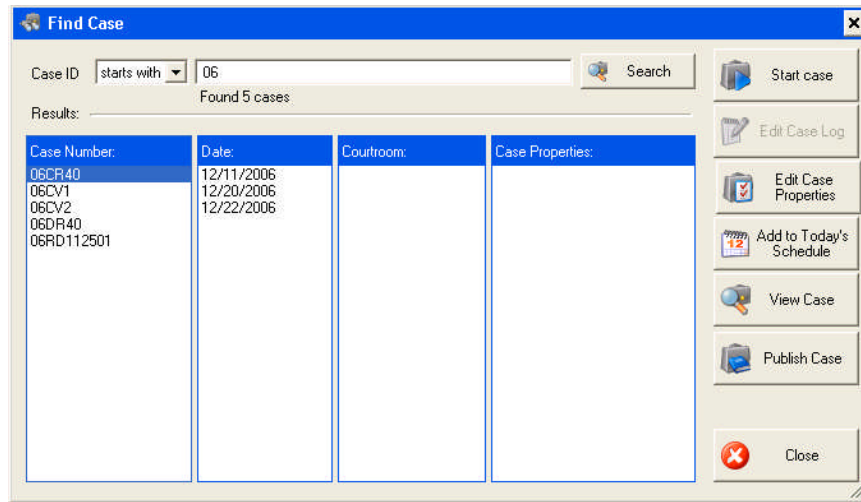

NOTE: If a user's information is changed by the same user, that user must Login again for the changes to take effect. Conversely, if you change a users information that is currently logged in, that user must also login again

Find Case Utility

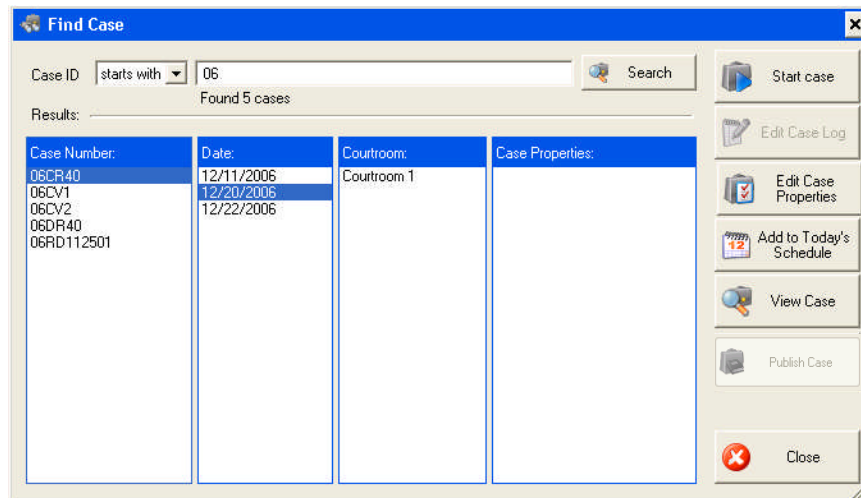

This section will illustrate how to use the options available once a case is located. Refer to the [Find Case](#) section of this manual for more information on how to find a case.

To Start an Existing Case:

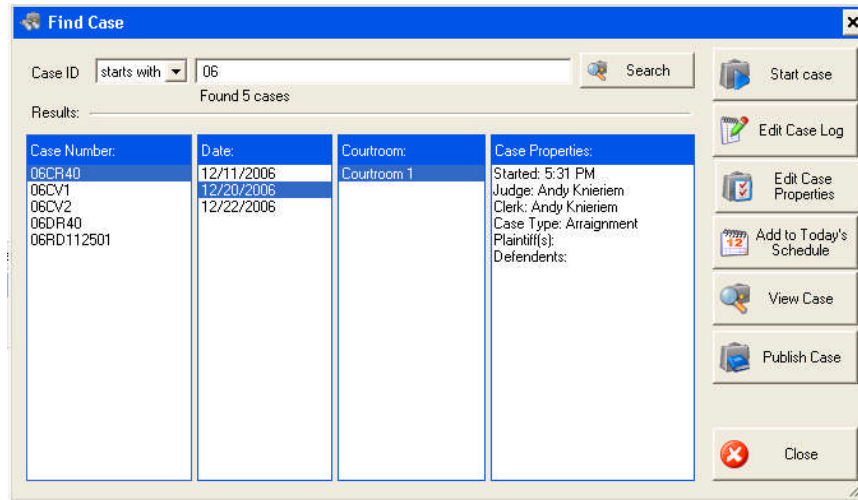

1. Select the case you searched for, the data will drilldown through the Date, Courtroom, and finally Case Properties fields.
2. Select the appropriate **Case Number**; the case's dates are displayed in the **Date** field.

3. Select the appropriate **Date**, and the applicable courtrooms are displayed for that date in the **Courtroom** field.

4. Select the appropriate **Courtroom**, and the Case Properties are called up and displayed in the **Case Properties** field. All Find Case options are now available.

5. Press the **Start Case** button; the **Start Case** window opens.

6. Verify the case's information is correct (i.e., case number, case type, date, title, court personnel, etc.).

7. Press the **Prepare to Start Case** button if you want to queue the data without initiating recording, or press the **Start Case** button to begin recording. Case starts. Pressing **Add to Schedule** will add the case to today's docket at the time you want.

To Edit a Case Log:

1. Follow the instructions on how to find a case in the [Find Case](#) section of this manual.
2. Select the case, date and courtroom of the case you searched for, the data will drilldown to the Case Properties field.
3. Press the **Edit Case Log** button and the Edit Case Log window will open.

4. Follow the steps outlined in the [Edit Case Log](#) section of this manual.

To View a Case:

1. Follow the instructions on how to find a case in the [Find Case](#) section of this manual.
2. Select the case, date and courtroom of the case you searched for, the data will drilldown to the Case Properties field.
3. Press the **View Case** button and the JAVS CaseViewer application will open.

4. See the JAVS CaseViewer User Manual for more information on how to operate the CaseViewer application.

To Publish a Case:

1. Follow the instructions on how to find a case in the [Find Case](#) section of this manual.
2. Select the case, date and courtroom of the case you searched for, the data will drilldown to the Case Properties field.
3. Press the **Publish Case** and the JAVS Publishing wizard will open.

4. Follow the instructions in the [Publish Current Case](#) section of this manual.

To Edit Case Properties:

1. Follow the instructions on how to find a case in the [Find Case](#) section of this manual.
2. Select the case, date and courtroom of the case you searched for, the data will drilldown to the Case Properties field.
3. Press the **Edit Case Properties** button and the Case Properties for the selected case will open.

4. For more information, see the [Case Properties](#) section of this manual.

Configure Shortcuts

JAVS AutoLog gives the user the ability to map the keyboard with shortcuts for their most used commands with user configurable hotkeys. Once configured, the programmed keys will be saved for each windows user.

The default configured keys in AutoLog are:

New Case.....Ctrl+N

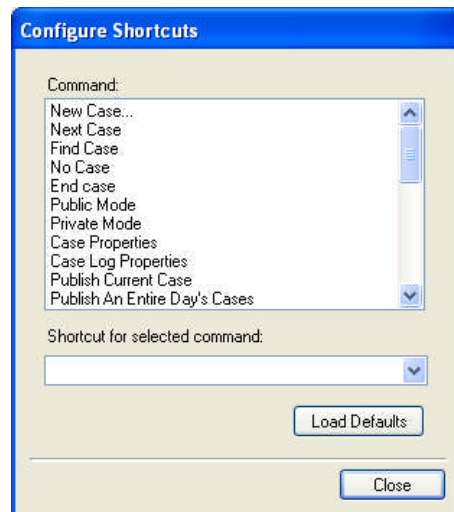

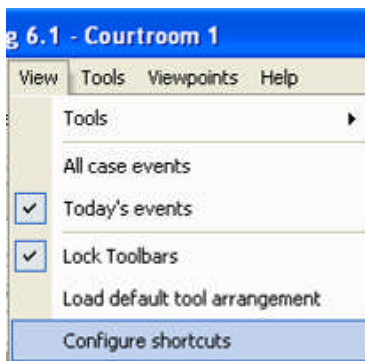

Find Log Event.....Ctrl+F

Add Log Event.....F2

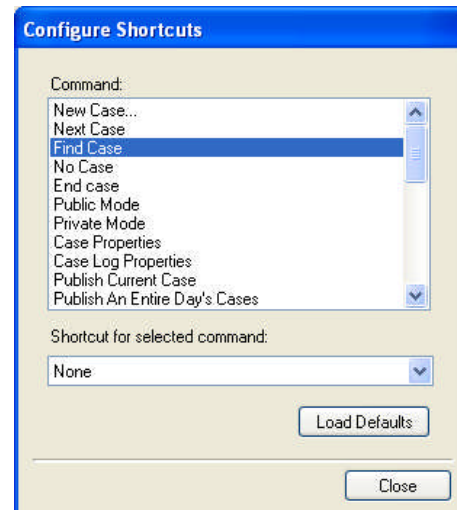

Add Case Note.....F3

To configure the keyboard for shortcuts:

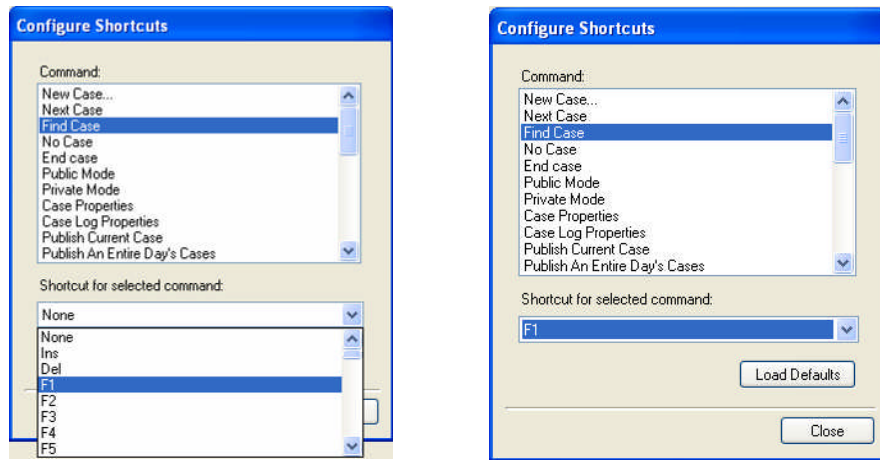

1. Select the menu item **View>Configure Shortcuts** and the **Configure Shortcuts** window will open.

2. Select the command you wish to set a hot key for.

3. Use the **Shortcut for selected command** pull down to choose the keystroke or combination of keystrokes for the command. Press the **Close** button.

4. The command is ready to be used with the new shortcut.
5. You can set the keyboard back to the JAVS default by pressing the **Load Defaults** button. (Warning: This action cannot be un-done).

Load Defaults

Undockable Windows

AutoLog 6.3 allows the user to arrange the tool windows or tabs to any layout you choose. By selecting the particular windows header bar or tab, the window can be pulled from its current location and placed in another location. Double clicking the header or tab will also undock that window to the previously positioned location or upper left of the screen if it has never been moved.

There are two methods for moving and sizing windows:

Docked Method:

The docked method will allow you to use the docking controls to lock a window into place once it has been moved. By selecting the window header or tab, move the window to the area of the screen you want and roll over the docking controls. The controls will allow you to go left, right, up or down and a highlighted area will appear indicating where the window will be positioned. If you position over the center of the docking control, the window will be placed as a tab in that particular window. The windows can be resized by holding the mouse pointer over the edge of a window until the pointer turns into a resize cursor. Click and drag to the size you want.

Undocked method:

The undocked method will allow the user to move a tool window or tab to any position on the screen and be free floating. By selecting the window header or tab, move the window to the area of the screen you want and release the mouse, the window has been repositioned.

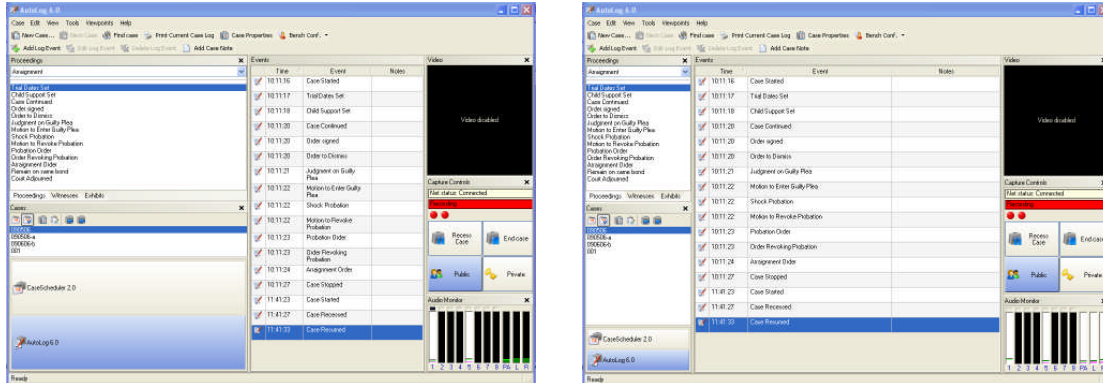

NOTE: Double-clicking on a window header will re-dock the window to the last docked position. Conversely, double-clicking on a docked window header will place it in the last free floating position.

Load Default Tool Arrangement

Occasionally, windows could be adjusted for size or moved to a different position. The Load default Tool Arrangement function will allow the user to set the AutoLog window arrangement back to the default setting.

To set the window arrangement back to the default setting:

1. Select **View>Load Default Tool Arrangement** and the AutoLog window arrangement will re-set to the default arrangement.

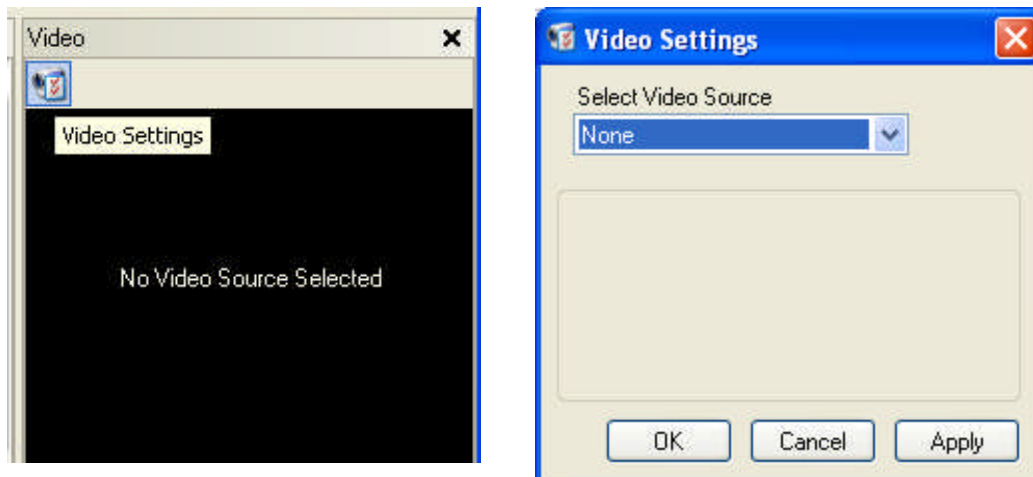

Video Settings

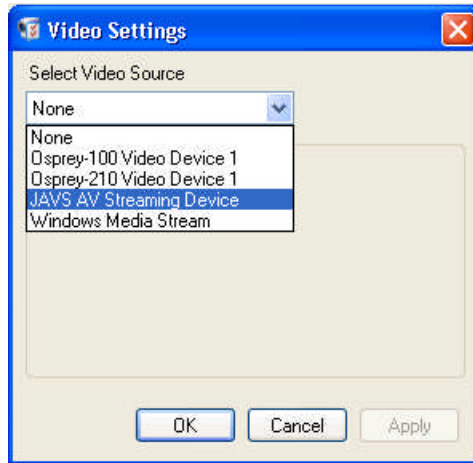

The Video Display window is where the user views the court proceedings. This window will follow the action of the courtroom by displaying the switched camera views of the JAVS AutoLog system. In most cases, the selection of video source will be the video card(s) installed in the AutoLog computer.

To select the video source:

1. In the video window select the **Video Settings** button and the **Video Settings** window will open.

2. Use the **Select Video Source** to choose the device for viewing.
3. Check your documentation to determine the video card installed in your computer.

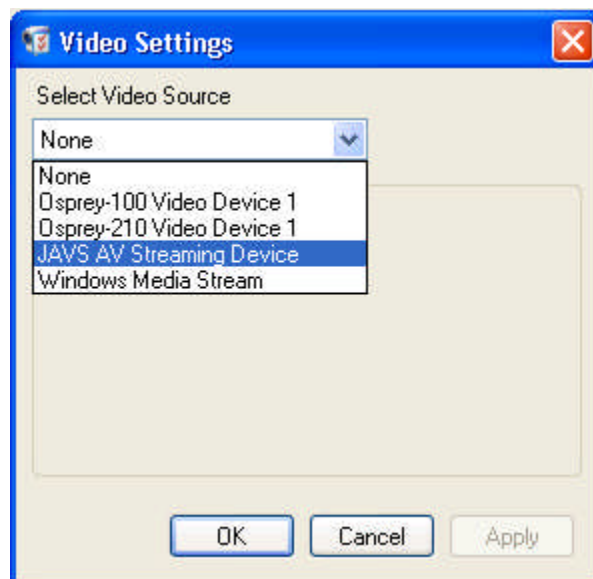

The Video Display window has been enhanced by integrating a video server device so the user can connect to different courtrooms over TCPIP. The service allows viewing of multiple locations by changing to the IP of the video server device.

To use the video server:

1. In the video window select the **Video Settings** button and the **Video Settings** window will open.

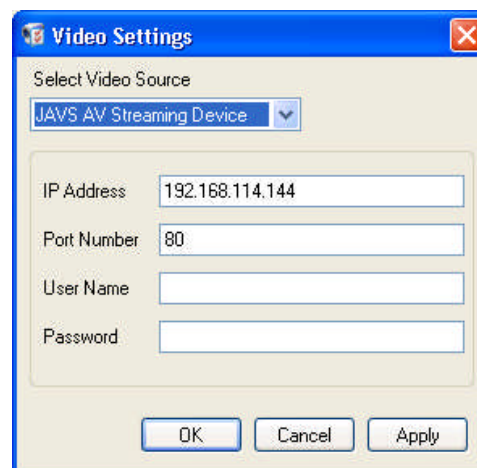

2. Use the **Select Video Source** to choose the device for viewing.

3. There are 4 fields that pertain to the video server setup:

- a. **IP Address:** This field is for entering the IP address of the video server. See your IT personnel for the correct address for the device.
- b. **Port Number:** This field is for entering the port number. 80 is the default port number and in most cases will be a valid port assignment. Your IT department should inform you of any variation to this port number.
- c. **User Name / Password:** Your IT department can set up a user name and password for secure access to the video server

4. Once the setup is complete, press the **OK** button and the video server camera source will appear in the video window.
5. Audio controls for **Speaker On/Off** and **Volume Control** are now available for each selected IP address.

Find Log Event

The **Find Log Event** utility allows the user to search the case log for log events, case notes and event notes. **Find Log Event** is available in the current log or in the [Edit Case Log](#) function.

To find a log event:

1. On the tool bar press the **Find Log Event** button or select **Edit>Find Log Event** and the Find Log Event window will open.
2. Type in all or part of the event or note in the search field to search for.
3. Press the **Find Next** button and Find Log Event will find any note or event that contains the text typed in the search field.
4. Press **Find Next** again to continue the search or change the text for a new search.

NOTE: For more information, see the [Edit Case Log](#) section of this manual

Copy Event Log to Clipboard

The **Copy Event Log to Clipboard** utility allows the user to copy the contents of the case log and paste it into a third party text editing program. **Copy Event Log to Clipboard** is available in the current log or in the [Edit Case Log](#) function.

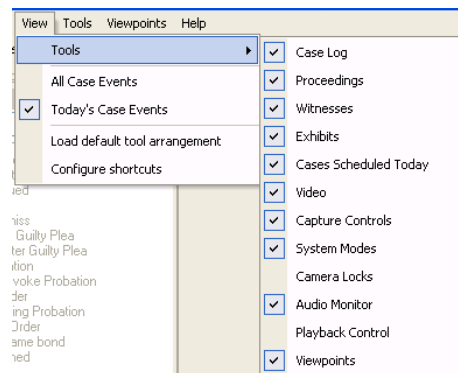

To copy the event log to clipboard:

1. Select **Edit>Copy Event Log to Clipboard** and the entire event log will be placed on the copy clipboard. (Press the **Copy to Clipboard** button if in the **Edit Case Log** dialog).
2. Open a third party text editing program and select the paste function from that program.
3. The contents of the clipboard will be pasted into the text editing program.

Tools

By selecting **View>Tools**, you can toggle the following windows in the AutoLog interface, turning them on (checkmark is visible) or off (checkmark is hidden).

Turning a window off (un-checking it) will hide it from view. Make sure a window's checkmark is on to view it.

Controlling the A/V Processor

Switching System Modes

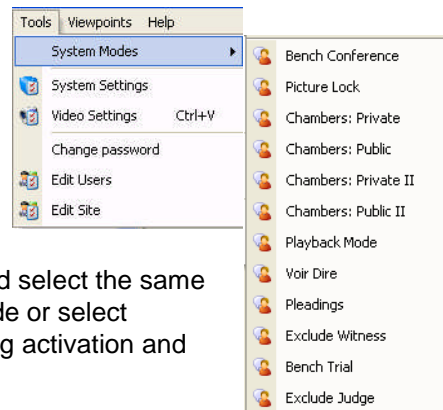

System Modes are set up by your JAVS technician.

Mode Activation

During the recording process, modes can be activated in one of three ways; using the Tools menu and selecting the mode from the list, using the toolbar buttons or by using the System Modes selection panel.

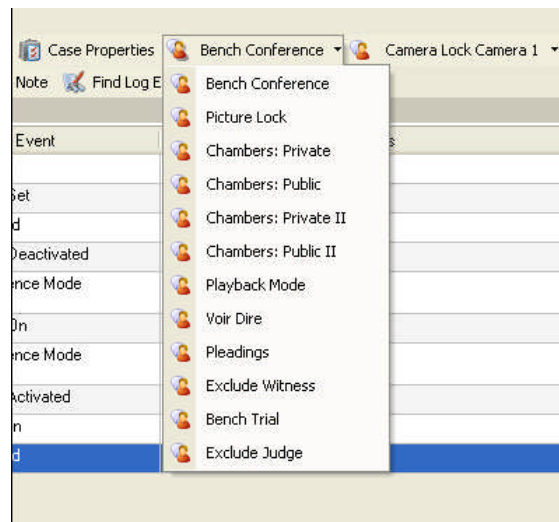

To activate system modes using the Tools menu:

1. Select the menu item **Tools>System Modes** and a drop down list of available modes will appear.
2. Select the mode to activate by selecting that mode from the list. A log entry will be made indicating the mode was activated and the previous mode was deactivated.
3. Select the menu item **Tools>System Modes** and select the same mode to deactivate and return to the normal mode or select another mode. Log entries will be made indicating activation and deactivation of each mode involved.

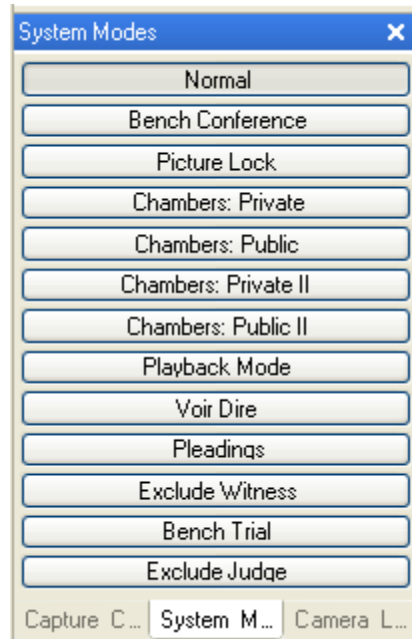

To activate system modes using the toolbar buttons:

1. Select the down arrow on the **System Modes button** located on the toolbar. A list of available modes will drop down.
2. Select the mode to activate by selecting that mode from the list. A log entry will be made indicating the mode was activated and the previous mode was deactivated. The **System Modes button** will now indicate which mode you selected.
3. Press the **System Mode button** again to deactivate and return to the normal mode or select the down arrow and select another mode from the list. Log entries will be made indicating activation and deactivation of each mode involved.

To activate system modes using the selection panel:

1. At the bottom of the **Capture Controls** window, select the **System Modes tab**. A System Modes button panel will open.
2. Select the mode to activate by pressing any of the mode buttons. A log entry will be made indicating the mode was activated and the previous mode was deactivated.
3. Select the **Normal Mode** button to deactivate and return to the normal mode or select another mode to activate.

NOTE: If the mode was set to be private in the System Settings window, a Private mode entry will be made in the log.

Controlling Camera Locks

This function is only available for the CT-4A system.

You can control which cameras are active by accessing the Camera Locks function in the Cases toolbar or by using the Camera Locks selection panel.

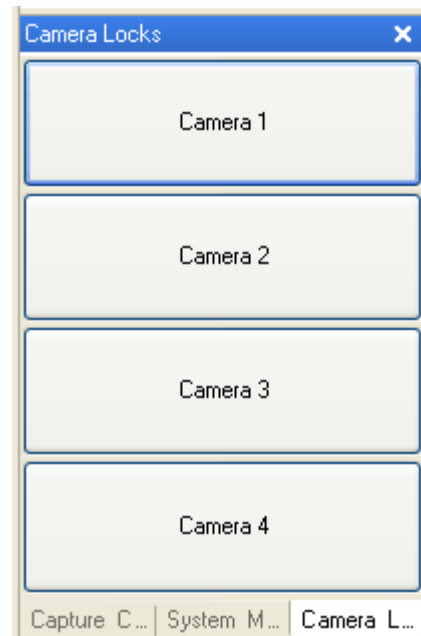

To switch to a specific camera using the toolbar buttons:

1. Press the Camera Locks drop-down menu in the Cases toolbar and click the down arrow.
2. Select the appropriate Camera. The chosen camera will automatically activate and begin a video feed to the video window.
3. Select the Camera Lock button again to deactivate the camera lock and return to a normal switching mode.

To switch to a specific camera using selection panel:

1. At the bottom of the **Capture Controls** window, select the **Camera Locks** tab. A Camera Locks button panel will open.
2. Select the Camera to lock to by pressing any of the camera lock buttons. The chosen camera will automatically activate and begin a video feed to the video window.
3. Select the camera lock button again to return the system to a normal switching mode.

NOTE: With the CT-4A system, camera locks and system modes override each other. For example, if you are currently in a private system mode such as bench conference and you elect to activate another camera, AutoLog will automatically switch to the selected camera rather than stay locked in the private system mode. Conversely, if you've selected this camera and then click back to bench conference, the system will automatically return to the private system mode.

Video Conference

This function is only available for the CT-4A system.

The Video Conference button activates the video conference A/V mode. This function, when activated will force a remote camera to the courtroom monitor while maintaining the normal switching of the system to the recorders.

To activate the video conference function:

1. Select the Video Conference button located on the cases toolbar to activate the video conference mode.

2. Select the Video Conference button again to deactivate the video conference mode.

User Rights

Each user is assigned a user name and password and each user can be given all or limited user rights. User rights give the ability to use certain functions in the AutoLog and CaseScheduler applications or can be used to limit the use of certain functions. User classes and templates are set up by your JAVS technician upon installation of the system and can be assigned by your administrator (see [Edit Users](#)).

AutoLog is broken down into 4 user types, AutoLog Basic, AutoLog Standard, AutoLog Power and AutoLog Advanced. Each user type will be assigned through User Classes and Templates. User classes and templates in the [Edit Users](#) function are based on the rights in this chart.

<u>AutoLog Basic</u>	<u>AutoLog Standard</u>	<u>AutoLog Power</u>	<u>AutoLog Advanced</u>
Access AutoLog	Access AutoLog	Access AutoLog

Appendix-A

Activation

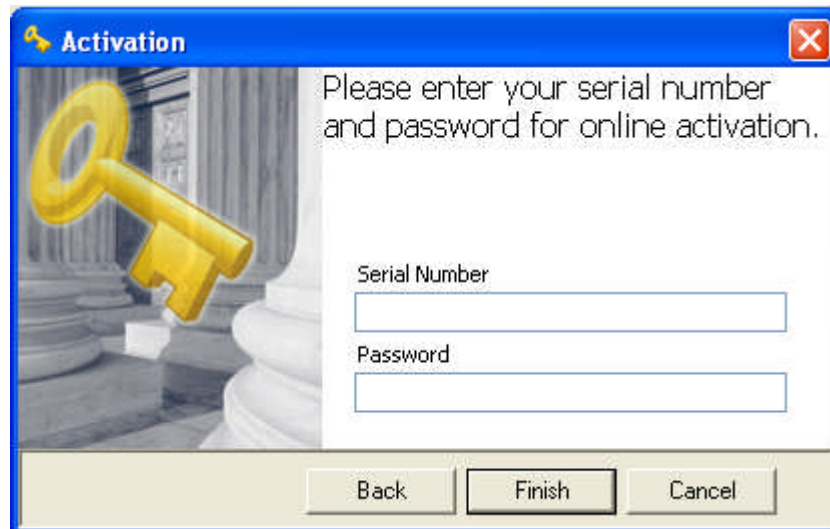

The JAVS software set requires that each user activate the software before it can be used. There are three ways to activate the software; Online Activation, Phone Activation and a 15 day trial period.

The first time AutoLog is launched an activation message will appear with three choices.

Online Activation

Select **Online Activation** and press **Next**. Enter the Serial Number and Password provided on the Installation CD. Observe case sensitivity.

After entering the Password and Serial Number press the **Finish** button and the JAVS AutoLog login screen will appear. Type in your user name and password and AutoLog is ready to use.

The 'Please Login!' dialog box features a blue title bar with a lock icon and a close button. The main area has a blue header with a key icon and the text 'Courtroom Login'. Below this, there are three input fields: 'User Name:', 'Password:', and 'Courtroom:' (a dropdown menu showing 'Default Location'). At the bottom right are 'Login' and 'Cancel' buttons.

Phone Activation

Select **Phone Activation** and press **Next**.

The 'Activation' dialog box has a blue title bar with a key icon and a close button. The left side shows a large yellow key icon over a courtroom scene. The right side contains the text 'Welcome to the Jefferson Audio Video Systems's software activation wizard.' and three radio button options: 'Online Activation', 'Phone Activation' (which is selected), and 'Run Trial (14 days left)'. At the bottom are 'Back', 'Next', and 'Cancel' buttons.

A contact screen will appear with the JAVS help desk phone number. Contact the JAVS help desk with the number provided, and give the **Pin Number** to the help desk technician. The JAVS help desk will then provide you with the appropriate activation code for your particular system. Type this number in the Activation Code field and press **Finish**. All numbers are case sensitive.

The 'Activation' dialog box features a blue title bar with a yellow key icon and a close button. The main area is split: the left side shows a 3D yellow key on a pedestal, and the right side contains text and input fields. The text instructs the user to contact customer service at 1-877-JAVS-HLP (1-877-528-7457). Below this, the 'Pin Number' is displayed in five individual boxes: 9BC5, CA75, 6559, 7ADF, and DF65. An 'Activation Code' field consists of five empty boxes. At the bottom are 'Back', 'Finish', and 'Cancel' buttons.

Activation

Please contact customer service at 1-877-JAVS-HLP (1-877-528-7457) to complete activation.

Pin Number

9BC5 CA75 6559 7ADF DF65

Activation Code

Back Finish Cancel

The JAVS AutoLog login screen will appear. Type in your user name and password and AutoLog is ready to use.

The 'Please Login!' dialog box has a blue title bar with a padlock icon and a close button. The background is a blue-tinted image of a courtroom. The text 'Courtroom Login' is on the right. Below are three input fields: 'User Name:', 'Password:', and 'Courtroom:' (a dropdown menu currently showing 'Default Location'). At the bottom are 'Login' and 'Cancel' buttons.

Please Login!

Courtroom Login

User Name:

Password:

Courtroom: Default Location

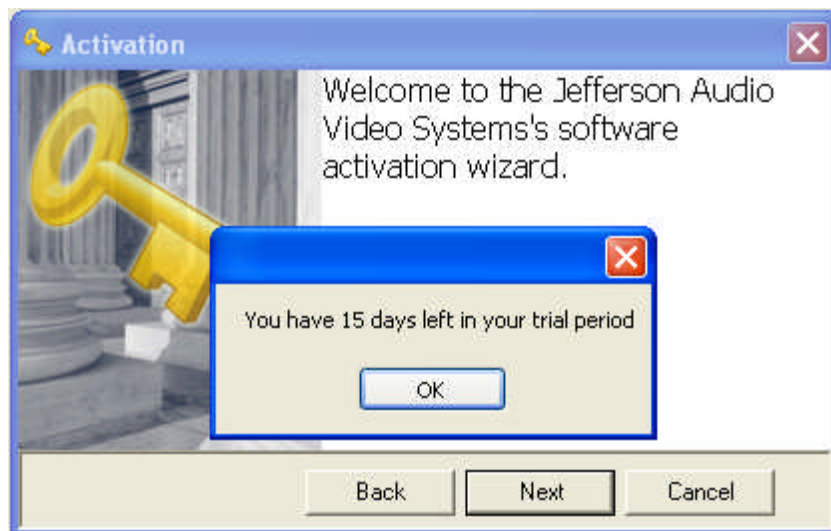

Login Cancel

15 Day Trial Period

Select the **Run Trial** and press the **Next** button.

You will get a message indicating how many days are left on your trial period.

Press **OK** and the AutoLog login screen will appear. Type in your User Name and Password and AutoLog is ready to use.

Appendix-B

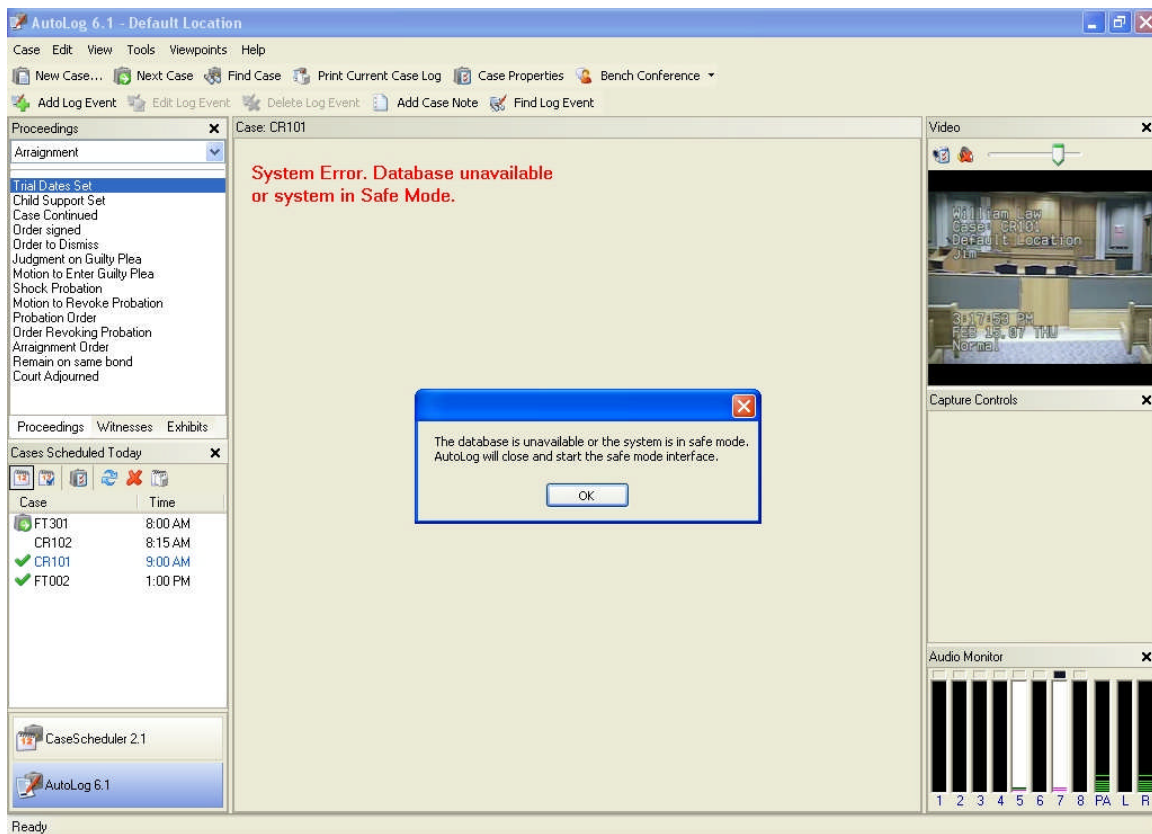

Safe-Mode

AutoLog depends on the internal database for all of the information provided for normal operation of the system. Case information such as judge, attorneys, witnesses and any other information related to the case is stored in the database and retrieved by AutoLog on a continual basis. Although this is vital information, AutoLog also records the video and audio provided by the cameras and microphones, which is not dependant on the internal database.

Failures can occur in any electronic system and can be catastrophic to the user of the system. Safe-Mode was put into place for just such failures. Although database failures are not common, JAVS wants to ensure that if a database failure does occur, that the recorded **Record** continues until the database is restored, thus, the **Court Record** is preserved through the recorded audio and video.

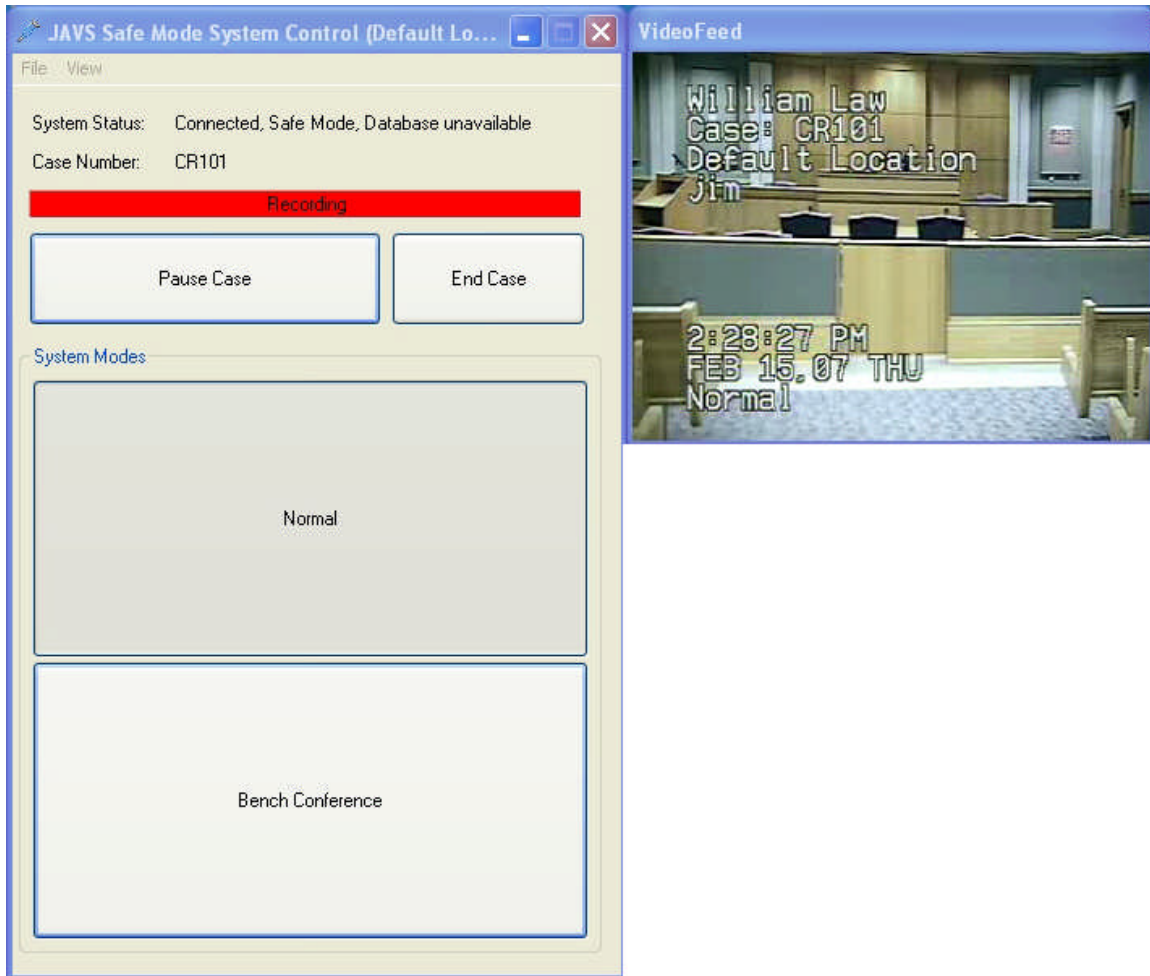

When AutoLog is launched or if AutoLog is in the middle of a court proceeding and the database is not available due to database failure, a message will appear; "System Error. Database unavailable or system in safe mode" An additional window will also appear; "The database is unavailable or system is in safe mode. AutoLog will close and start the safe mode interface".

Press the **OK** button and the Safe Mode Interface will open.

If the system was recording when Safe Mode was initiated, it will remain in record so no part of the recorded Record is lost.

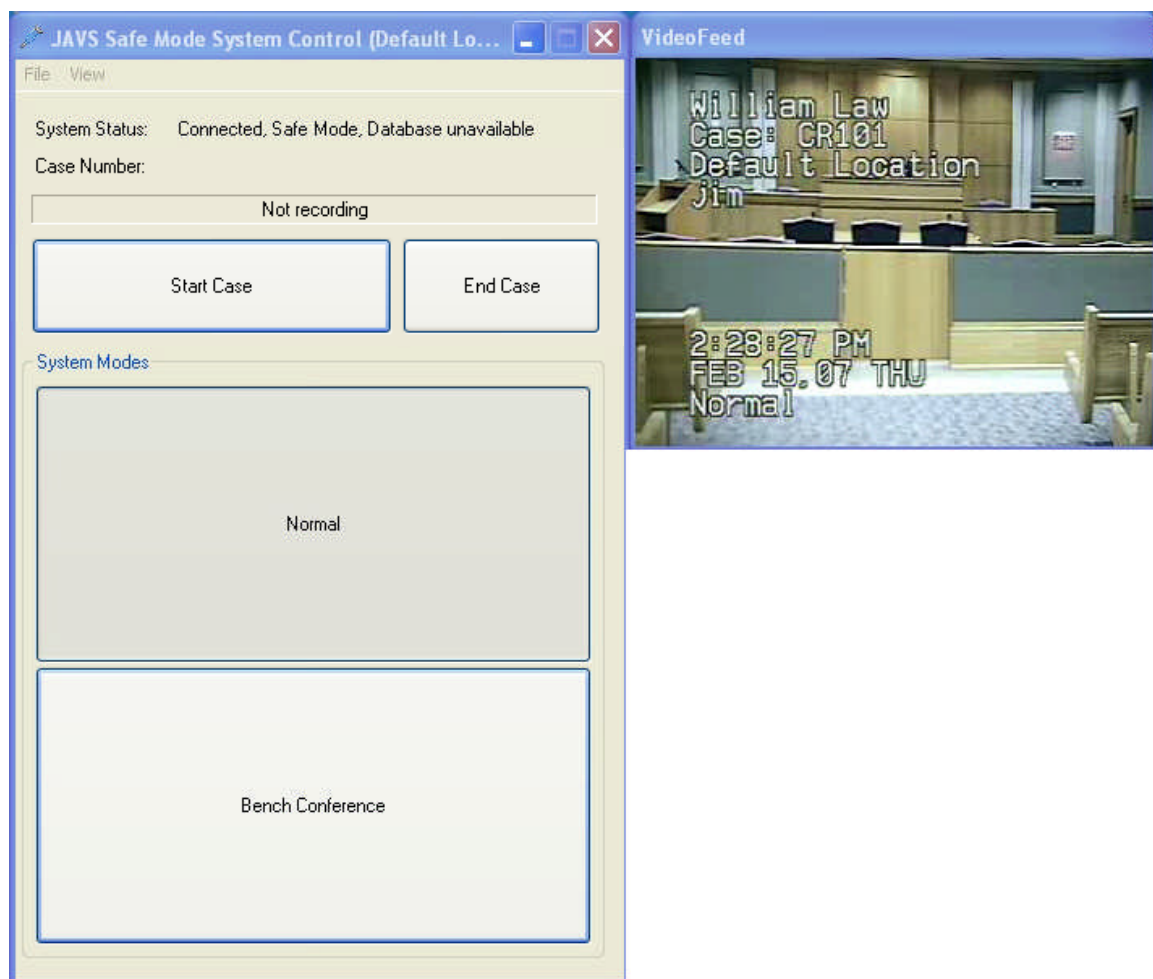

The Safe Mode interface allows the user to Start, Recess, Resume and End a case. All system modes that were available during normal operation will also appear in the Safe Mode interface.

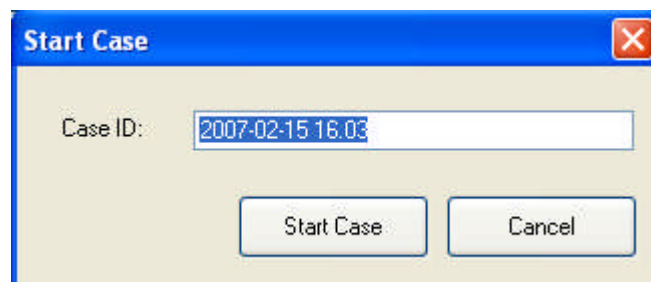

The Interface also provides the user with the video monitor that was selected during normal operation or the user can select a different monitor if the option is available. This selection can be found by selecting the menu item **View>Video Feed**. (For more details on video monitor selection, see the [Video Settings](#) section of this manual).

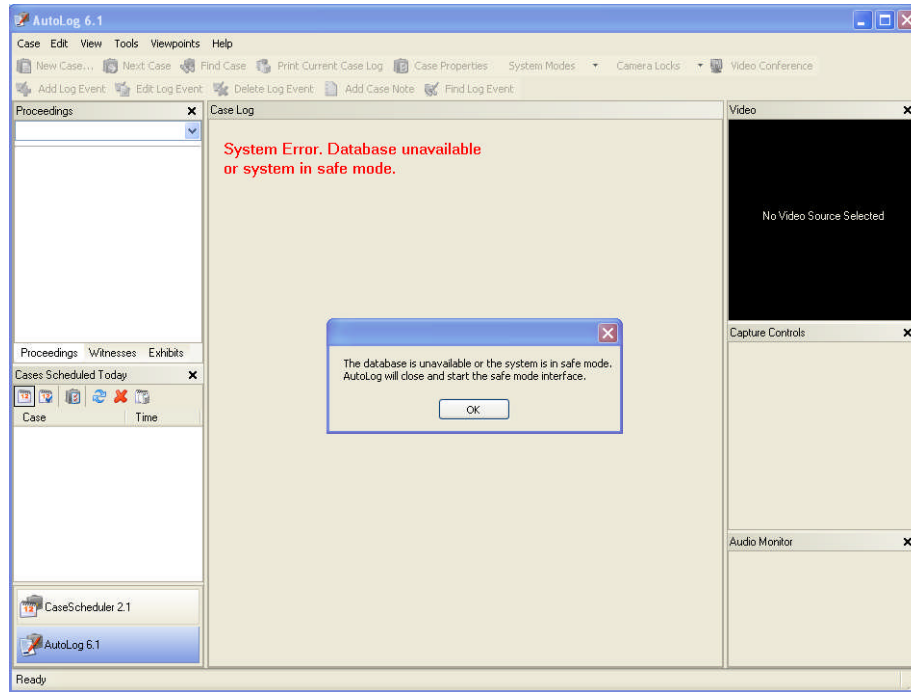

If no case was present when the Safe Mode was initiated, the user can start a new case.

Pressing the **Start Case button** will open a **Start Case window** with an auto generated case number based on the year, month, day and time of day. The user can use this number or can re-enter an appropriate case number. Press the **Start Case** button and the system will start recording.

If the database is unavailable before you login to AutoLog, you will be informed that the database is unavailable and Safe Mode will be initiated. Press the OK button.

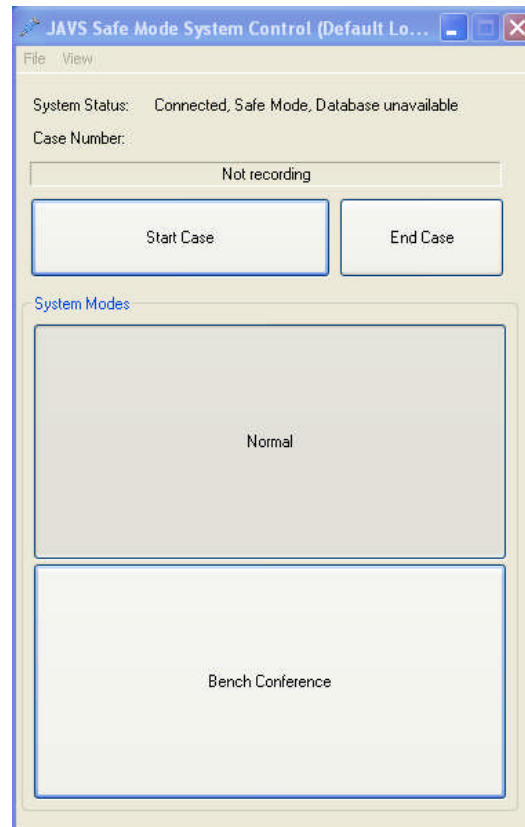

A Select Courtroom prompt will appear. Select the appropriate courtroom with the selection pull-down and Safe Mode will launch.

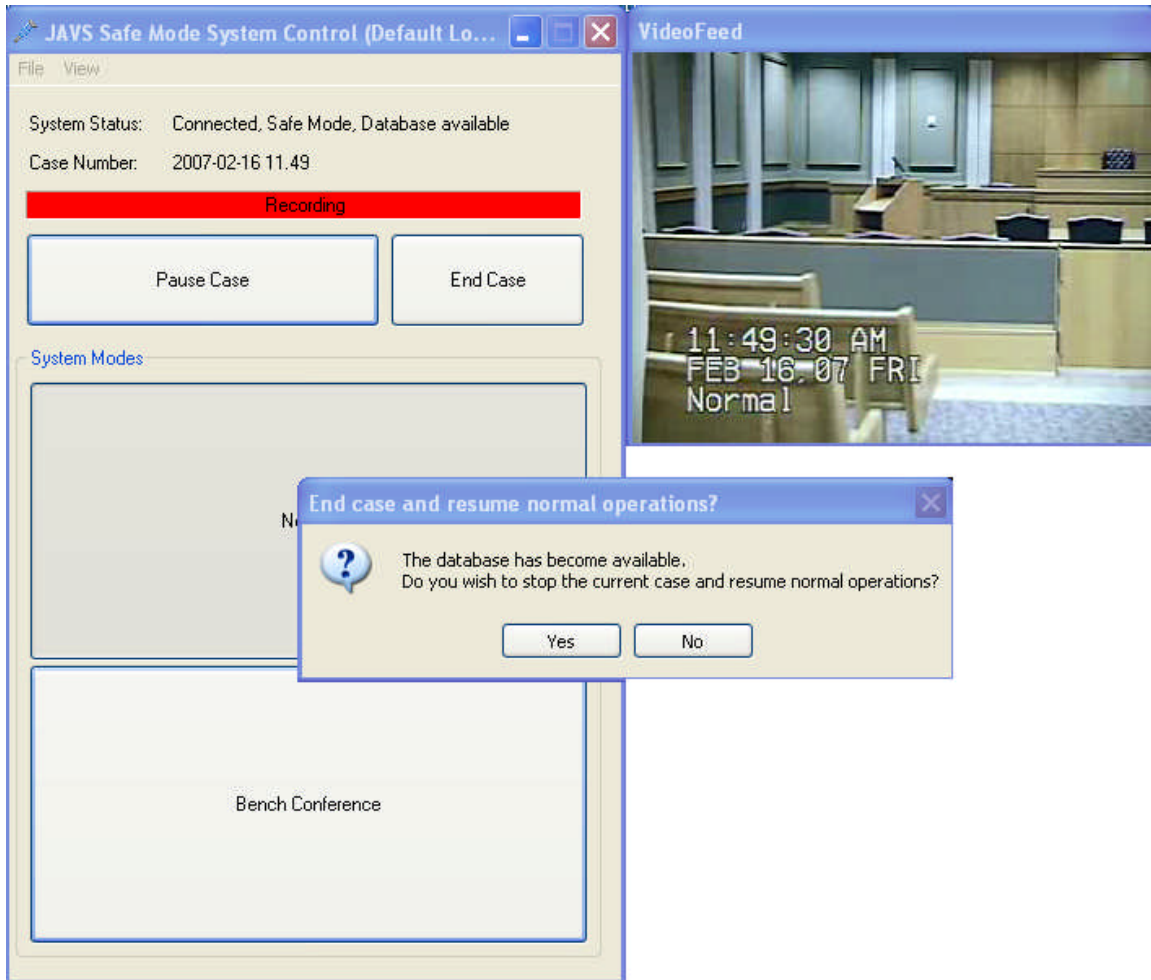

You can change the courtroom you are connected to by selecting the menu item **File>Connect to System**. Use the selection pull-down to change courtrooms.

In this situation you must also select a video monitor. Select the menu item **View>Video Feed**. (For more details on video monitor selection, see the [Video Settings](#) section of this manual).

When the database becomes available a message will appear: **“The database has become available. Do you want to stop the current case and resume normal operation?”** If it is inconvenient to stop the case and continue normal AutoLog operation, press the **No** button and you will continue to record the case in the Safe Mode Interface. If you wish to return to AutoLog, press the **Yes** button and the case will stop.

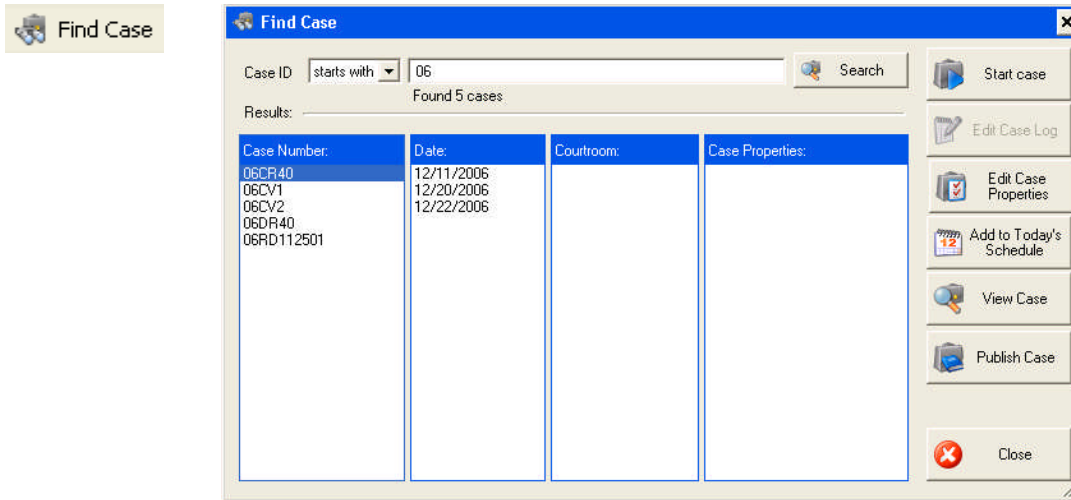

Selecting **Yes** will prompt you to close the Safe Mode interface and launch AutoLog in normal operation.

NOTE: It is necessary to stop a case in the Safe mode interface before returning to AutoLog normal operation.

When AutoLog is launched, you may continue the case by pressing **Find Case**, locating the case and pressing the **Start** button in the **Find Case** window. For more details on the Find Case function see the **Starting an Existing Case** in the [Find Case Utility](#) Section of this manual.

Appendix C

Help Menu

The **Help** menu item contains selections for the **AutoLog Manual** and an **About** information screen. The AutoLog Manual selection opens the AutoLog User Manual in PDF format. The User Manual is a comprehensive look at AutoLog features, and step by step instructions on how to use the many functions.

The AutoLog User Manual is also available for download at <http://galileo.javs.com>.

The **About** selection will provide information about the version of AutoLog, Libraries, Platform and other pertinent information about your JAVS AutoLog system. This information is useful when calling the JAVS HelpDesk.: **1-877-JAVS HLP (528-7457)**.

August 2008 ADDENDUM - AUTOLOG 6.3.1

This addendum will cover the new feature set release of AutoLog 6.3.1. This feature set will enhance the user's interactive ability when operating the JAVS AutoLog system.

New Features Include:

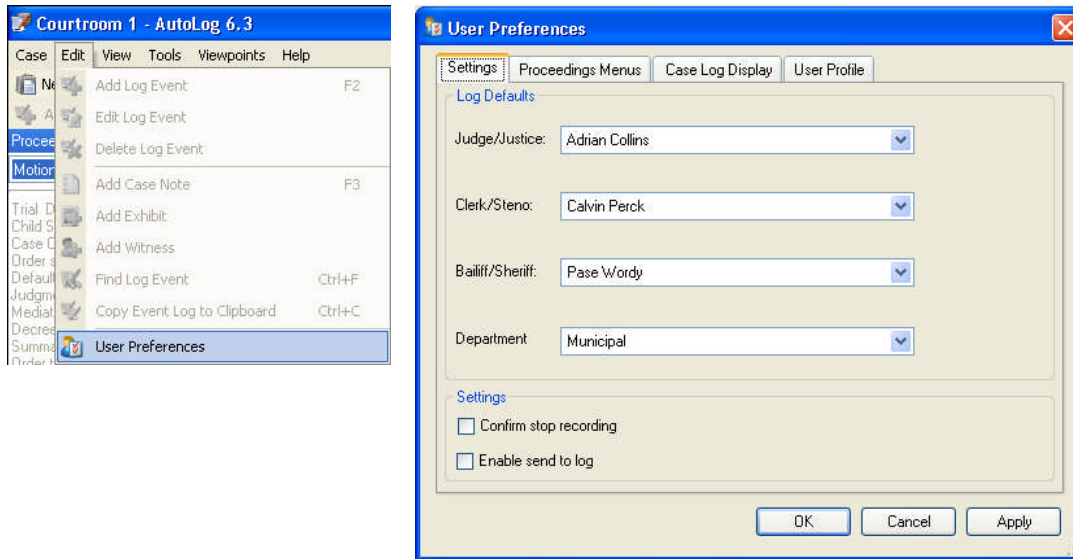

- **Send To Log:** User selectable; Add Case Numbers to the Log.
- **Include Owner:** User selectable; Include user's name associated with notes in printout.
- **Find Case Sorting:** User selectable; Choose method of sorting the Find Case results list. (Alphabetical or Most Recent).

Send To Log

The Send To Log Feature allows the user to have one continuous recording for the day and add case numbers to the log file. This is useful in a situation where the cases come one after the other and stopping and starting recording is too time consuming. The case numbers will be added as log events and will accept notes just like any other event. You can print or publish the log and all the days cases will be reflected as a single day's case. This selection is remembered with each **Window's User** and is not an AutoLog user only preference.

To send a case number to the log:

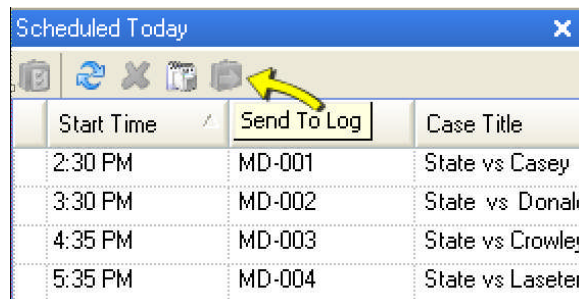

1. Select **Edit>User Preferences** and the User Preferences window will open.

2. Under the **Settings** tab select the **Enable send to Log** checkbox. Press **OK**.

3. A **Send To Log** icon will be added to the **Cases Scheduled** window icon list.

4. Start the day's recording; (it is recommended that you use the current day's date as a case number or a case number that is recognizable as a day long case).
5. Select a case from the **Scheduled Today** list and press the **Send To Log** icon. A green check-mark will appear indicating a completed schedule and the case will be added as a log event. The log event will include one editable note to include the CaseTitle, Plaintiff, Prosecution, Defendant and Defense.

Scheduled Today		
Start Time	Case Number	Case Title
✓ 2:30 PM	MD-001	State vs Casey
3:30 PM	MD-002	State vs Donald
4:35 PM	MD-003	State vs Crowley
5:35 PM	MD-004	State vs Laseter

Case 2008-08-04 Dockets:		
Time	Event	Notes
2:35:15 PM	Case Started	
2:50:09 PM	MD-001	Jim Collins: Case Title:State vs Casey Plaintiff: Black, John Prosecution: Allen, Donald Defendant: Burke, Frank Defense: Shore, Allen

6. You can add proceedings from the Proceedings list that pertains to that case. When that case has completed, you can select another case from the Scheduled Today list and press the Send To Log icon again. The next case has been added to the log.

Case 2008-08-04 Dockets:		
Time	Event	Notes
2:35:15 PM	Case Started	
2:50:09 PM	MD-001	Jim Collins: Case Title:State vs Casey Plaintiff: Black, John Prosecution: Allen, Donald Defendant: Burke, Frank Defense: Shore, Allen
2:55:30 PM	Trial Dates Set	
2:55:41 PM	Order signed	
2:57:58 PM	MD-002	Jim Collins: Case Title:State vs Donaldson

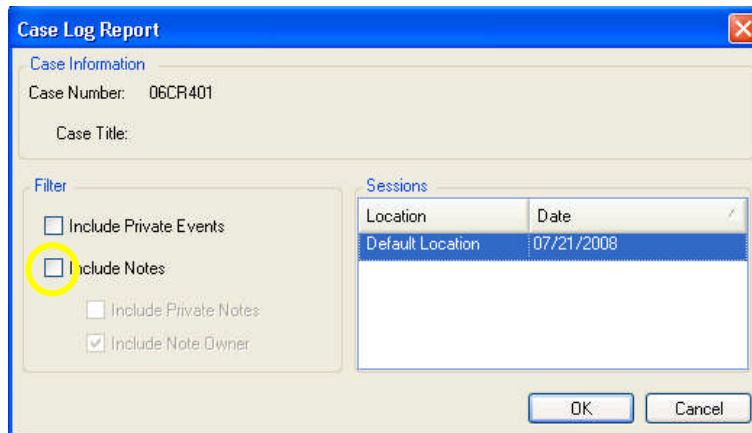

Note: With **Enable send to log** checked, you can double click on a case in the Scheduled Today list to add it to the log, conversely, you cannot load a case into the new case window from the Scheduled today list with Enable Send To Log selected.

Include Owner

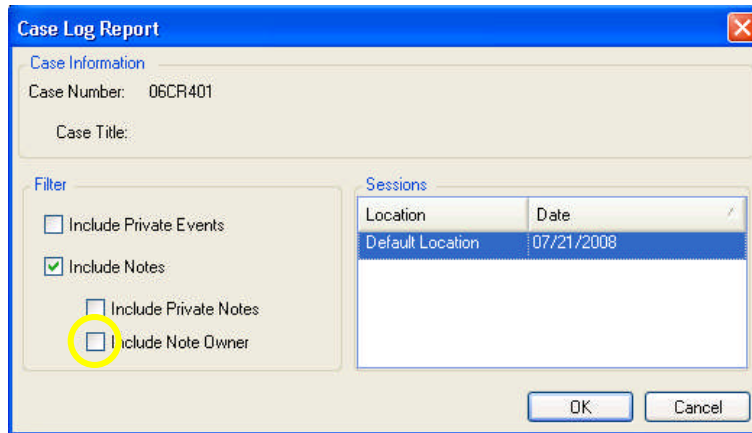

The Include Owner option will allow the user to print Case Logs with or without the owner's name included with the note. This choice is made in the printing process.

To enable or disable Include Owner:

1. Select any of the printing methods outlined in the [Printing](#) section of this manual.
2. In the **Case Log Report** window, select the **Include Notes** checkbox in the **Filter** section of the window.

3. When **Include Notes** is selected, the options will no longer be grayed out.
4. Select or deselect the **Include Owner** Checkbox.

5. Your selection will be reflected in the printout.

Find Case Sorting

The Find Case window has now incorporated a sorting feature. The user can sort the search results list alphabetically or by the most recent. This feature gives the user a broader search base.

To sort the Find Case results list:

1. Follow the [Find Case](#) procedures outlined in this manual.
2. The **Search** button can be pressed before or after the sort method has been chosen.
3. Select either one of the sorting radio buttons. (**Alphatabetical** or **Most Recent**).

Sort Method

Alphabetical: Alpha-Numeric

Most Recent: By date

4. If the list is already present when the selection is made, the list will automatically sort to the method chosen
